*Economic Efficiency in Agricultural and Food Marketing* Richard L. Kilmer, Walter J. Armbruster, 1987      **US Programs Affecting Food and Agricultural Marketing** Walter J. Armbruster, Ronald D. Knutson, 2012-11-06 With increasing globalization of markets a wider array of programs has come to affect the food and agricultural marketing system and many of today's programs are more consumer oriented than producer oriented This book brings together the thinking of the best researchers addressing the topics involved in these programs and provides readily understood analyses of the challenges and opportunities facing the food and agricultural industry and the programs which impact industry performance Many public sector programs and institutions affecting food and agricultural marketing were designed in the early and mid 1900s and while they have been updated new demands are constantly being placed on them The authors discuss the increased scope complexity and globalization of markets the changes in technology that brought these changes about and the need for policy and program adjustments They also discuss the development of supply chains domestically and globally from farm to consumption The book addresses the safety of the food supply from both domestic and international sources and the need to assure security of the food supply from external events while maintaining trade and open markets The breadth of programs treated makes this book valuable to students and scholars in agricultural economics and agribusiness management as well as to practitioners and policy makers in the field      Journal of Agricultural Economics Research ,1989      **The Journal of Agricultural Economics Research** ,1987      **Agricultural Economics Research** ,1976      **Federal Marketing Orders for Fruits, Vegetables, Nuts, and Speciality Crops** Nicholas John Powers,1990      **The Ethics and Economics of Agrifood Competition** Harvey S. James, Jr.,2013-03-19 This edited volume presents ethical and economic analyses of agrifood competition By systematically examining fairness and openness in agricultural markets it seeks to answer the question of whether there is adequate competition in the agrifood industry and whether the system is fair to all participants It outlines ethical and economic principles important for understanding agrifood competition presents arguments for and against consolidation globalization and the integration of agrifood industries and looks at the implications of globalization on the nature of competition in specific agricultural contexts      *A Comprehensive Assessment of the Role of Risk in U.S. Agriculture* Richard E. Just, Rulon D. Pope, 2013-11-11 After all the research on agricultural risk to date the treatment of risk in agricultural research is far from harmonious Many competing risk models have been proposed Some new methodologies are largely untested Some of the leading empirical methodologies in agricultural economic research are poorly suited for problems with aggregate data where risk averse behavior is less likely to be important This book is intended to i define the current state of the literature on agricultural risk research ii provide a critical evaluation of economic risk research on agriculture to date and iii set a research agenda that will meet future needs and prospects This type of research promises to become of increasing importance because agricultural policy in the United States and elsewhere has decidedly shifted from

explicit income support objectives to risk related motivations of helping farmers deal with risk Beginning with the 1996 Farm Bill the primary set of policy instruments from U S agriculture has shifted from target prices and set aside acreage to agricultural crop insurance Because this book is intended to have specific implications for U S agricultural policy it has a decidedly domestic scope but clearly many of the issues have application abroad For each of the papers and topics included in this volume individuals have been selected to give the strongest and broadest possible treatment of each facet of the problem The result is this comprehensive reference book on the economics of agricultural risk     *Productivity* ,1990
