Economic Policies in Canada Ingrid A. Bryan, 1982 *Capital Transfers and Economic Policy: Canada, 1951-1962*
Richard E. Caves, Grant L. Reuber, 1971 Between 1951 and 1962 nearly ten billion dollars in long term capital both direct investment and purchase of securities flowed into Canada This massive amount represented one third of all long term capital moving among industrial nations Its transfer marked the first time since before World War I that the world witnessed such a large scale international movement of capital motivated primarily by a prospect of higher rates of return In *Capital Transfers and Economic Policy* the authors test the theory of the causes and effects of international capital movements against the evidence drawn from Canada's experience They explore Canada's adjustment to capital flows and show how the operation of her economic policy is affected by the sensitivity of capital flows to the country's interest rates and foreign exchange rate Their brilliant analysis is particularly valuable in light of current trends in capital flows among industrial nations and the June 1970 return of the Canadian dollar to a flexible exchange rate which put the economy in a working situation similar to that of the fifties

Winer,2012 Given Canada s vast geography and uneven distribution of economic activity almost all Canadians have at one time or another faced the question of whether an interprovincial move would make them better off Using a unique dataset based on income tax records authors Kathleen Day and Stanley Winer examine the factors influencing the decision to migrate within Canada paying special attention to the role of regional variation in the generosity of public policies including unemployment insurance taxation and public expenditure the influence of extraordinary events such as the election of a separatist government in Quebec and the closure of the east coast cod fishery is also considered They look at why we ought to be concerned about public policies that interfere with market based incentives to move provide a wealth of information on interregional differences in public policies and market conditions and examine what other researchers have discovered about fiscally induced migration culminating in a discussion of the likely impact of various policy changes on migration and provincial unemployment rates the authors assessment of the lessons to be learned from their own and past research on policy induced migration in Canada will be of interest to students of migration and policy makers alike *Macro-economic Policy* J.
