Economic Crisis Theory:

Economic Crisis and Crisis Theory Paul Mattick Jr., 2020-09-23 Keynesian economics claimed to have overcome the problem of economic depressions However as Mattick argues that crises are inherent within capitalism and that neither the market nor Keynesianism can stop the steady deterioration of the economy Written in 1974 *Economic Crisis and Crisis Theory* is one of Mattick's most valuable contributions to the Marxist critique of political economy and radical theory in general *Crises of Global Economies and the Future of Capitalism* Kiichirō Yagi, Nobuharu Yokokawa, Shinjirō Hagiwara, Gary Dymksi, 2013 Recent events in the global financial markets and macro economies have served as a strong reminder for a need of a coherent theory of capitalist crisis and analysis This book helps to fill the gap with well grounded alternative articulations of the forces which move today's economic dynamics how they interact and how ideas of foundational figures in economic theory can be used to make sense of the current predicament The book presents a comprehensive collection of reflections on the origins dynamics and implications of the interlinked crises of the U S and global economies The book is a thoughtful collaboration between Japanese heterodox economists of the Japan Society of Political Economy JSPE and non Japanese scholars It provides a unique immersion in different sophisticated approaches to political economy and to the crisis The book illustrates with the understanding of Marx's crisis theory and how it can serve as a powerful framework for analyzing the contemporary sub prime world crisis The book explains the subprime loan crisis as a crisis in a specific phase of the capitalist world system and concludes that it is a structural one which destroys the existing capital accumulation regime It pays attention to structural changes and to how these changes beget profound and controversial consequences The result is a must read one which truly contributes to the resurgence of radical analyses of the political economy free from the market optimism of the main stream economics *The New Horizon of China's Economic Law Theory* Shouwen Zhang, 2020-10-26 This book presents the development and reformation of economic law in China and explores the three relationships between the government and market between reform and rule of law and between the constitution and economic law On this basis it subsequently focuses on development theory distribution theory risk theory and crisis theory Further it addresses effective development fair distribution and prevention and resolution of related risks and crises which are important functions of economic law In order to achieve the above functions and objectives the book argues we must vigorously promote the integration of rule of law in economic law and constantly refine the theory of economic rule of law employed in China The book demonstrates that no matter how the three major relationships are adjusted or the relevant systems are reformed i e regarding the implementation of the concept of coordinated development or the optimization of economic structures the solution of distribution problems or the improvement of distribution systems the prevention of risks or the response to crises any such changes depend on economic rule of law The above mentioned theoretical discussion presents a new horizon of contemporary Chinese economic law theory which will be of great value to

World in Crisis Guglielmo Carchedi, Michael Roberts, 2018-10-01 Most mainstream economists view capitalism's periodic breakdowns as nothing more than temporary aberrations from an otherwise unbroken path toward prosperity. For Marxists, this fundamental flaw has long been acknowledged as a central feature of the free market system. This groundbreaking volume brings together Marxist scholars from around the world to offer an empirically grounded defense of Marx's law of profitability and its central role in explaining capitalist crises. *World in Crisis* has a specific aim: to provide empirical validity to the hypothesis that the cause of recurring economic crises or slumps in output, investment, and employment in modern economies can be found in Marx's law of the tendential fall in the rate of profit. Marx believed and we agree that this is the most important law in political economy from the preface.

Economic Theory of Bank Credit L. Albert Hahn, Harald Hagemann, 2015 The first English language translation of L. Albert Hahn's *Volkswirtschaftliche Theorie des Bankkredits* 1920, which by the mid 1920s had become one of the most influential books on monetary theory in the German language.

Disembodiment Banu Bargu, 2024-11-20 *Disembodiment* examines self-destruction, self-injury, and radical self-endangerment as unconventional performances of resistance and refusal. Banu Bargu troubles the dominant approach that treats these acts as individual pathologies, cries for help, and signs of despair, taking the reader on an unsettling journey that passes through the suicides of enslaved Africans, the hunger strikes of woman suffragists, Gandhian fasting practices, Bouazizi's self-incineration, and the lip-sewing practices of migrants and asylum seekers to chart a bleak repertoire of contention performed by the oppressed. As a work in global critical theory whose normative compass is the suffering body, *Disembodiment* offers a bold materialist theory of corporeal agency that upholds the fundamental rebelliousness of the body.

A History of Marxian Economics M.C. Howard, J. E. King, 1992-01-27 This second volume of the highly successful *A History of Marxian Economics* covers the period from 1929 to the present. The main debates and themes of this period are the Great Depression and Stalinism, the Long Boom and its Demise, New Theories of Imperialism, Value and Exploitation, and Current Controversies. As with the first volume, Michael Howard and John King have written an authoritative and stimulating account of the history of Marxian Economics over this period.

The Politics of Ecosocialism Kajsa Borgnäs, Teppo Eskelinen, Johanna Perkiö, Rikard Warlenius, 2015-07-24 As the global economy seeks to recover from the financial crisis and warnings about the consequences of climate change abound, it is clear that we need a fundamentally new approach to tackle these issues. This innovative book offers a unique perspective, stressing the necessity of both ecological and social change, as it discusses how to create a red-green or eco-socialist society. Examining the current crises of welfare capitalism, as well as the challenges and conflicts of an eco-socialist society, the book proposes a new social order that would combine the ideals of egalitarianism and of environmental sustainability. It analyses the key social and ecological issues related to the welfare state, including green Keynesianism, ecological Marxism, the limits of growth, and no-growth capitalist barriers to a renewable energy transition, proposals for a universal basic income, and the role of technology.
