Berman, 2016-04-19 A state of the art one stop resource Public Administration in South Asia India Bangladesh and Pakistan examines public administration issues and advances in the Indian subcontinent The book fulfills a critical need These nations have the largest public administration programs in South Asia yet existing knowledge on them is fragmented at best Bringing together leading scholars from these countries this book provides both an insider perspective and a scholarly look at the challenges and accomplishments in the region Focusing on the machinery of government the book explores questions such as What is the history of public administration development How are major decisions made in the agencies Why are anti corruption efforts so much a challenge What is the significance of intergovernmental relations What is the success of administrative reform What are examples of successful social development programs How successful is e

government and what are its challenges Why is civil service reform difficult to achieve How is freedom of information being used as a means to combat corruption and invoke grassroots activism What can be learned from the successes and failures While public administration practice and education have become considerably professionalized in the last decade a sufficiently in depth and well rounded reference on public administration in these countries is sorely lacking Most available books tackle only aspects of public administration such as administrative reforms civil service economic developments or public policy and are country specific None provide the in depth analysis of the sphere of public action in South Asia found in this book It supplies an understanding of how public administration can be either the source of or solution to so many of the problems and achievements in the Indian subcontinent

**Political Engagement in Canadian City Elections** R. Michael McGregor, Laura B. Stephenson, 2024-03-12 Municipal elections in Canada don't look much like those held at the federal and provincial levels A key difference is a significant discrepancy in voter turnout but relatively little is known about why far fewer people vote in city elections Voters show less interest in local government seeing it as less influential than other levels yet they believe their views matter more to local politicians Political Engagement in Canadian City Elections explores this apparent contradiction by asking who participates in politics how they go about it and why Drawing from the Canadian Municipal Election Study a novel survey of electors in eight large cities across the country in 2017 and 2018 contributors consider factors ranging from the universal such as the demographic profile of voters or how economic conditions affect them to the specific for example participation in school board and council elections There are more municipal elections than any other kind in Canada The discoveries in Political Engagement in Canadian City Elections collectively represent a major leap forward in our understanding of voter activity at the community and municipal level
