monumental work of economic theory and social criticism that sought to reveal the basic nature of the capitalism of their time. Their theory and its continuing elaboration by Sweezy, Harry Magdoff and others in *Monthly Review* magazine influenced generations of radical and heterodox economists. They recognized that Marx's work was unfinished and itself historically conditioned and that any attempt to understand capitalism as an evolving phenomenon needed to take changing conditions into account. Having observed the rise of giant monopolistic or oligopolistic firms in the twentieth century, they put monopoly capital at the center of their analysis, arguing that the rising surplus such firms accumulated as a result of their pricing power, massive sales efforts and other factors could not be profitably invested back into the economy. Absent any epoch-making innovations like the automobile or vast new increases in military spending, the result was a general trend toward economic stagnation, a condition that persists and is increasingly apparent to this day. Their analysis was also extended to issues of imperialism or accumulation on a world scale, overlapping with the path-breaking work of Samir Amin. In particular, John Bellamy Foster is a leading exponent of this theoretical perspective today, continuing in the tradition of Baran and Sweezy's *Monopoly Capital*. This new edition of his essential work *The Theory of Monopoly Capitalism* is a clear and accessible explication of this outlook brought up to the present and incorporating an analysis of recently discovered lost chapters from *Monopoly Capital* and correspondence between Baran and Sweezy. It also discusses Magdoff and Sweezy's analysis of the financialization of the economy in the 1970s, 80s and 90s, leading up to the Great Financial Crisis of the opening decade of this century. Foster presents and develops the main arguments of monopoly capital theory, examining its key exponents and addressing its critics in a way that is thoughtful but rigorous, suspicious of dogma but adamant that the deep-seated problems of today's monopoly finance capitalism can only truly be solved in the process of overcoming the system itself.
