Nelson, 2015-06-13 Robert Nelson's Reaching for Heaven on Earth Economics as Religion and The New Holy Wars Economic Religion Versus Environmental Religion in Contemporary America read almost like a trilogy exploring and charting the boundaries of theology and economics from the Western foundations of ancient Greece through the traditions that Nelson identifies as Protestant and Roman and on into modern economic forms such as Marxism and capitalism as well as environmentalism Nelson argues that economics can be a genuine form of religion and that it should inform our understanding of the religious developments of our times This edition of Economics as Religion situates the influence of his work in the scholarly economic and theological conversations of today and reflects on the state of the economics profession and the potential implications for theology economics and other social sciences **Religion and Economics: Normative Social Theory** J.M. Discipleship of the Mind James W. Sire, 1990-04-04 Discussing worldview thinking the foundations of knowledge and the relationship between knowing and doing James W Sire shows Christians how to honor God with their minds **Nazism, Liberalism, and Christianity** Kenneth C. Barnes, 2021-11-21 The Great Depression devastated the economies of both Germany and Great Britain Yet the middle classes in the two countries responded in vastly different ways German Protestants perceiving a choice among a Bolshevik style revolution the chaos and decadence of Weimar liberalism and Nazi authoritarianism voted Hitler into power and then acquiesced in the resulting dictatorship In Britain Labour and Tory politicians moved gingerly together to form a National Government that muddled through the Depression with piecemeal reform In this troubling book about troubled times Kenneth Barnes looks into the question of how theologians and church leaders contributed to a cultural matrix that predisposed Protestants in these two countries to very different political alternatives Holding fast to the liberal social gospel British churchmen diagnosed the problems of the 1920s and the

Depression as solvable and called for genuine reforms many of which foreshadowed the coming welfare state. German leaders in contrast were terrified by the socioeconomic and political problems of the Weimar era and offered no social message or solution. Despairingly they referred the problems to secular politicians and after 1933 beat the drum for obedience to the Nazi state. Based on extensive research in European archives especially the rich papers of the interwar ecumenical movement housed at the World Council of Churches in Geneva, this book examines key intellectual figures such as Karl Barth, Paul Tillich, Dietrich Bonhoeffer, and Archbishop William Temple, as well as many lesser-known church officials and theologians. Barnes brings to life the intellectual struggles and dilemmas of the interwar period to help explain why good people could, for moral and religious reasons, choose opposing courses of political action.
