The Cambridge History of America and the World: Volume 4, 1945 to the Present David C. Engerman, Max Paul Friedman, Melani McAlister, 2022-03-03 The fourth volume of The Cambridge History of America and the World examines the heights of American global power in the mid twentieth century and how challenges from at home and abroad altered the United States and its role in the world. The second half of the twentieth century marked the pinnacle of American global power in economic political and cultural terms but even as it reached such heights the United States quickly faced new challenges to its power originating both domestically and internationally. Highlighting cutting edge ideas from scholars from all over the world this volume anatomizes American power as well as the counters and alternatives to the American empire. Topics include US economic and military power American culture overseas human rights and humanitarianism third world internationalism immigration communications technology and the Anthropocene.

Regional Inequality in Spain Alfonso Diez-Minguela, Julio Martinez-Galarraga, Daniel A. Tirado-Fabregat, 2018-12-28 This book traces regional income inequality in Spain during the transition from a pre industrial society to a modern economy using the Spanish case to shed further light on the challenges that emerging economies are facing today. Regional inequality is currently one of the most pressing problems in the European Union and this text presents a novel dataset covering 150 years to analyse long run trends in regional per capita GDP. Spatial clustering and a new economic geography approach also contribute to the historical analysis provided which points to the role played by spatial externalities and their growing relevance over time. To identify the presence of spatial dependence is crucial not only for getting a better understanding of distribution dynamics but also for economic policy purposes. What are the potential causes behind the disparities in regional per capita income and productivity? The authors answer this by comparing results with evidence available for other countries chiefly France Italy and Portugal but is of global relevance.

An Economic History of Regional Industrialization Bas van Leeuwen, Robin C.M. Philips, Erik Buyst, 2020-10-22 This book offers a comprehensive study of regional industrialization in Europe and Asia from the early nineteenth century to the present. Using case studies on regional industrialization the book provides insights into similarities and differences in industrialization processes between European Eurasian and Asian countries. Important factors include the transition from traditional to modern industrial production industrial policy

agglomeration forces market integration and the determinants of industrial location over time The book is an invaluable reference that attempts to bridge the fields of economic history political history economic geography and economics while contributing to the debates on economic divergence between Europe and Asia as well as on the role of economic integration and globalization

Effects of Financial Globalization on Developing Countries Mr.Ayhan Kose,Mr.Kenneth Rogoff,Mr.Eswar Prasad,Shang-Jin Wei,2003-09-03 This study provides a candid systematic and critical review of recent evidence on this complex subject Based on a review of the literature and some new empirical evidence it finds that 1 in spite of an apparently strong theoretical presumption it is difficult to detect a strong and robust causal relationship between financial integration and economic growth 2 contrary to theoretical predictions financial integration appears to be associated with increases in consumption volatility both in absolute terms and relative to income volatility in many developing countries and 3 there appear to be threshold effects in both of these relationships which may be related to absorptive capacity Some recent evidence suggests that sound macroeconomic frameworks and in particular good governance are both quantitatively and qualitatively important in affecting developing countries experiences with financial globalization

The Pathology of the

US Economy Michael Perelman, 2016-07-27 This book demonstrates the calamitous consequences of the current US policies that follow a Haitian model of low wage development. The author makes his case by describing the decades long unfolding of the current crisis in the US economy following the post war boom. From the beginning the boom contained the seeds of its own destruction. As the boom disintegrated attempts to stabilize the economy made matters even worse. Efforts at profit maximization reinforced the problems. For example attacks on both labour and government reinforced the decline. This work warns against framing policies predicated upon either Keynesian or neo classical theory since both suffer from an unwarranted belief that a market economy can avoid crisis with appropriate economic management.

The Sources of Social Power: Volume 4, Globalizations, 1945-2011 Michael Mann, 2012 This third volume of Michael Mann's analytical history of social power begins with nineteenth century global empires and continues with a global history of the twentieth century up to 1945. Mann focuses on the interrelated development of capitalism, nation states and empires. Volume 3 discusses the Great Divergence between the fortunes of the West and the rest of the world, the self destruction of European and Japanese power in two world wars, the Great Depression, the rise of American and Soviet power, the rivalry between capitalism, socialism and fascism, and the triumph of a reformed and democratic capitalism. From back cover of Volume 3.

Chinese Research Perspectives on Population and Labor, Volume 4, 2019-07-01 This volume is based on Green Book of Population and Labor No 16 originally published in Chinese. Chapter one reviews developments in population and family planning during the 12th five year plan period 2011-2015. It presents forecast and examines the relationship between demographic changes and economic development. Chapter two focuses on population movement trends and employment situation of rural migrant workers. The country's overall employment situation in this period is presented in chapter three. Chapter four examines trends in China's labor supply and demand. Chapters five and six look at recent progress in and development of China's old age insurance and medical insurance systems. As in previous volumes this one contains policy suggestions for labor market development and population management.

Facilitating Transition by Internationalization Matija Rojec, 2019-10-28 FDI has proved to be the most dynamic defensive and offensive response to globalization. This book provides an in depth evaluation of the rationale as well as theoretical and empirical explanations of the outward internationalization of firms from the Czech Republic, Estonia, Hungary, Poland and Slovenia. The authors present the first broader empirical evidence on transition economies. OFDI and internationalization evaluate the role of transnational companies from transition economies and development implications of outward internationalization for home economies. They put the experience of firms from transition economies into the framework of existing theories, study to what extent are the experiences of Austria, Portugal and Finland applicable to transition economies, illustrate general macro economic trends of the international business practices of firms from transition economies by case studies, examine the main determinants and barriers to the outward internationalization process, offer a representative set of cases and best business government.

practices relevant for other transition economies identify specificity in internationalization by firms from transition economies due to transition processes and systemic background and apply network theory as a complementary explanation for such internationalization due to former historical ties and cultural vicinities A pioneering work on outward investment by transition economies this book is the first in the world to present a more systematic analysis of the internationalization of firms from transition economies based on results of the two ACE projects Outward internationalization facilitating transformation and EU Accession The case of Czech Republic Hungary and Slovenia and Networking Through OFDI including also Poland and Estonia

The American Economy Nicolas Spulber, 1997-07-13 This work focuses on the economic challenges the American economy has met during the post World War II era and on the new challenges represented notably by the competing economies of Japan Germany and the entire European union that confront it as the twenty first century approaches The book shows how the transformations brought about by international competition fit the long term processes of economic growth and change with respect to structural mutations technological development the role of the government and the evolution of government business relations Nicholas Spulber presents a detailed critique of the thesis alleging that the American economy had experienced some kind of decline and argues that the economy will continue to move forward energetically and successfully if growth and change are primarily left to emerge from the impulses and incentives of the private economy

The Pathology of the U.S. Economy Revisited M. Perlman, 2002-01-12 This book describes the deep contradictions plague market economies It shows how the influence of these contradictions sometimes subsides allowing the economy to perform relatively well But in time these contradictions accumulate and economy declines as if it suffers from some degenerative disease The policies designed to rise above these contradictions often spawn even more severe contradictions This book describes how these contradictions have affected the economy of the United States in the past and the dangers that the future poses For example policies to stimulate the economy eventually lead to stagnation Policies to make hold down wages make business even more uncompetitive It also analyzes the destructive consequences of the military finance and the Federal Reserve Finally it debunks the mythological promise of a New Economy

The New Cambridge History of American Foreign Relations: Volume 4, Challenges to American Primacy, 1945 to the Present Warren I. Cohen, 2013-05-13 Since their first publication the four volumes of the Cambridge History of American Foreign Relations have served as the definitive source for the topic from the colonial period to the Cold War The fourth volume of the updated edition explores the conditions in the international system at the end of World War II the American determination to provide leadership and the security dilemma each superpower posed for the other This revised and expanded edition incorporates recent scholarship and revelations carrying the narrative through the years following the end of the Cold War into the administration of Barack Obama The

character of the American political system is explored including the separation of political powers and the role of interest groups that prompted American leaders to exaggerate dangers abroad to enhance their domestic power This new edition examines the conditions in the international system from the end of World War II to the present focusing on the American determination to provide world leadership **Energy Abstracts for Policy Analysis** ,1982 **The Global 2000 Report to the President of the U.S.** Gerald O.
