Economics In Perspective A Critical History:

Economics in Perspective John Kenneth Galbraith, 2017-08-29 In *Economics in Perspective* renowned economist John Kenneth Galbraith presents a compelling and accessible history of economic ideas from Aristotle through the twentieth century Examining theories of the past that have a continuing modern resonance he shows that economics is not a timeless objective science but is continually evolving as it is shaped by specific times and places From Adam Smith's theories during the Industrial Revolution to those of John Maynard Keynes after the Great Depression Galbraith demonstrates that if economic ideas are to remain relevant they must continually adapt to the world they inhabit A lively examination of economic thought in historical context *Economics in Perspective* shows how the field has evolved across the centuries

Economics in Perspective John Kenneth Galbraith, 1987 This work puts the history of economic ideas securely in the life of their times and it tells especially of those ideas that have survived to influence our present beliefs and actions

Economics in the Long Run Theodore Rosenof, 2000-11-09 Though understandably preoccupied with the immediate problems of the Great Depression the generation of economists that came to the forefront in the 1930s also looked ahead to the long term consequences of the crisis and proposed various solutions to prevent its recurrence Theodore Rosenof examines the long run theories and legacies of four of the leading members of this generation John Maynard Keynes of Great Britain who influenced the New Deal from afar Alvin Hansen and Gardiner Means who fought over the direction of New Deal policy and Joseph Schumpeter an opponent of the New Deal Rosenof explores the conflicts that arose among long run theorists arguing that such disputes served eventually to set the stage for the emergence and domination of a short run Keynesian approach to economic policy that collapsed under the impact of 1970s stagflation Tracing the subsequent revival of long run theories Rosenof demonstrates their relevance to an understanding of the economy's problems over the past quarter century and to the current debate over public policy Originally published in 1997 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value

The Legacy of John Kenneth Galbraith STEVEN PRESSMAN, 2013-10-18 When John Kenneth Galbraith passed away on April 29 2006 the economics profession lost one of its true giants And this is not just because Galbraith was an imposing figure at 6 feet 9 inches tall Throughout his life Galbraith advised Presidents made important professional contributions to the discipline of economics and also tried to explain economic ideas to the general public This volume pays tribute to Galbraith's

life and career by explaining some of his major contributions to the canon of economic ideas The papers describe the series of unique contributions that Galbraith made in many different areas He was a founder of the Post Keynesian view of money and a proponent of the Post Keynesian view that price controls were necessary to deal with the problem of inflation in a modern economy where large firms already control prices and prices are not determined by the market He promulgated the view that firms manipulate individual preferences and tastes through advertising and other means of persuasion and he drew out the economic implications of this view He was a student of financial frauds and euphoria and a forerunner of the Post Keynesian Minskean view of finance and how financial markets really work This book was published as a special issue of the *Review of Political Economy* History of Economic Thought E. K. Hunt, 2015 *Chicagonomics* Lanny Ebenstein, 2015-10-06 *Chicagonomics* explores the history and development of classical liberalism as taught and explored at the University of Chicago Ebenstein's tenth book in the history of economic and political thought it deals specifically in the area of classical liberalism examining the ideas of Friedrich Hayek and Milton Friedman and is the first comprehensive history of economics at the University of Chicago from the founding of the University in 1892 until the present The reader will learn why Chicago had such influence to what extent different schools of thought in economics existed at Chicago the Chicago tradition vision and what Chicago economic perspectives have to say about current economic and social circumstances Ebenstein enlightens the personal and intellectual relationships among leading figures in economics at the University of Chicago including Jacob Viner Frank Knight Henry Simons Milton Friedman George Stigler Aaron Director and Friedrich Hayek He recasts classical liberal thought from Adam Smith to the present **International Business** Riad A. Samuels, 2011-09-12 This book examines the use principally in economics of the concept of the invisible hand centering on Adam Smith It interprets the concept as ideology knowledge and a linguistic phenomenon It shows how the principal Chicago School interpretation misperceives and distorts what Smith believed on the economic role of government The essays further show how Smith was silent as to his intended meaning using the term to set minds at rest how the claim that the invisible hand is the foundational concept of economics is repudiated by numerous leading economic theorists that several dozen identities given the invisible hand renders the term ambiguous and inconclusive that no such thing as an invisible hand exists and that calling something an invisible hand adds nothing to knowledge Finally the essays show that the leading doctrines purporting to claim an invisible hand for the case for capitalism cannot invoke the term but that other nonnormative invisible hand processes are still useful tools T.M.C.
