**The Economy of Modern Israel** Assaf Razin, Efraim Sadka, 1993-11-15 In this up to date study of the Israeli economy Assaf Razin and Efraim Sadka cover the entire economic history of the state focusing on links between Israel's economic growth its integration into world markets its tax and welfare systems and the political conflicts in the Middle East The authors present the first detailed economic analysis of the Palestinian uprising showing how the unrest has led to a fall in Arab employment in Israel and serious economic loss to the occupied territories with some loss to Israel They also examine how the uprising has affected Israel's financial standing internationally and the inflow of foreign aid Razin and Sadka see promise for Israel's economy in the waves of immigration from the former Soviet Union despite the current difficulties in absorbing the immigrants in the coexistence of a flourishing and highly competitive private sector with a relatively large public sector which is undergoing privatization and in a tax structure that encourages long term saving and business growth By examining the interplay between the exchange rate interest rates and monetary and anti inflation policies the authors investigate the possibilities for renewed growth and conclude that the future of Israel's economy crucially depends on serious efforts to secure peace in the Middle East

*The New Israel* Gershon Shafir, 2018-02-13 *The New Israel* Peacemaking and Liberalization argues that the ongoing Israeli Palestinian peace process will be expedited by increased economic liberalization Israel has undergone dramatic economic change in the 1990s shifting from a strongly protectionist state centered economy to a more international neoliberal one The book maintains that these fundamental changes have in turn transformed Israeli society as a whole resulting in a significant moderation of attitudes toward the Palestinian people and Palestinian nationalism The New Israel contains contributions from both established Israeli sociologists and promising young scholars The New Israel Peacemaking and Liberalization is an insightful commentary on one of the most crucial international issues of our time

*Immigration and Labor Market Mobility in Israel, 1990-2009* Sarit Cohen-Goldner, Zvi Eckstein, Yoram Weiss, 2012 A study of the labor market integration of highly skilled Soviet immigrants to Israel that formulates dynamic models of job search and human capital investment After the collapse of the Soviet Union in 1989 Soviet Jews emigrated in large numbers to Israel Over the next ten years Israel absorbed approximately 900 000 immigrants from the former Soviet Union an influx that equaled about twenty percent of the Israeli population Most of these new immigrants of working age were college educated and highly skilled Once in Israel they were eligible for a generous package of benefits including housing subsidies Hebrew language training and vocational education This episode provides a natural experiment for testing the consequences of a large immigration inflow of skilled workers This book provides a detailed analysis of the gradual process of occupational upgrading of immigrants and the associated rise in their wages Based on their analysis the authors conclude that even a very large and unanticipated wave of immigration can be integrated within the local labor market without any significant long term adverse economic effect on natives The small effect on wages and employment of natives is

explained by the capital inflows into Israel and the gradual entry of immigrants into high skill jobs as they invest in local human capital An important contribution of the book to the immigration literature is the formulation and estimation of stochastic dynamic models that combine job search with investment in human capital and the analysis of alternative government policies within this framework

*Transitions in Domestic Consumption and Family Life in the Modern Middle East: Houses in Motion* R. Shechter, 2003-11-28 The volume focuses on three countries Egypt Israel and Turkey earlier the Ottoman Empire in the period between the mid nineteenth and the early Twenty first centuries It studies the consumption of homes and domesticity as changing processes in space and time It further foregrounds research into the impact of economic political and socio cultural transformations on the private life of individuals Even more so the volume advances the discussion on the processes of restructuring of self identity and lifestyles via acts of consumption The volume focuses on the market where producers and consumers meet the state and the national movements with their respective ideologies and practices the role of advertisers but also the agency of individual and group choice In addition it discusses in different ways the close interrelations between the representation of home and domestic life for example in journals books and photography and the political economy of house consumption Thus this volume avoids the notion of linearity and progress in the transition to modern lifestyles in favour of more subtle accounts of the different venues in which people in the Middle East restructure their most immediate and intimate surroundings

**Supply-Side Economics in an Integrated World Economy** Mr. Enrique G. Mendoza, Ms. Linda L. Tesa, 1993-11-01 The macroeconomic effects of changes in tax and expenditure policies are examined in the context of the competitive equilibrium of a two country two sector model of an integrated world economy

Governments finance purchases and net transfers of tradable and nontradable goods by imposing distortionary taxes on factor incomes and consumption. The model is parameterized and calibrated using data from large industrial economies including estimates of effective tax rates. Numerical simulations provide estimates of the welfare costs associated with existing distortionary taxes and of the potential gains linked to a more efficient use of these taxes. Welfare gains from tax reforms favoring indirect taxation are substantial. The effects of permanent changes in expenditures depend on their sectoral allocation across tradables and nontradables and on whether they are debtor tax financed. Trade in goods and assets is very sensitive to fiscal policy changes but aggregate consumption patterns and welfare implications are not.
