Conference on Object-Oriented Programming Jean Bezivin, Jean-Marie Hullot, Pierre Cointe, Henry Lieberman, 2007-03-06 In October 1983 an informal meeting was organized in Le Cap d Agde with the help of the BIGRE bulletin Sixty people turned out to hear more than ten presentations on object oriented programming More important was their unanimous demand for other more structured encounters So about one year later the Object group was created by AFCET A second workshop was

organized in Brest and again one year later in Paris each time showing increased attendance and interest. The success of these meetings and the fact that similar activities were taking place in other European countries especially Great Britain and Germany led to the idea of an annual European Conference providing a forum for theorists and practitioners interested in the object oriented programming paradigm. It is impossible to acknowledge here all the people and organizations that welcomed with great enthusiasm the birth of the ECOOP conference and contributed to its organization. More than a hundred submissions were received and the program committee had the unpleasant task of turning down many valuable contributions. We hope however that the selection of papers for ECOOP 87 emphasizes the fundamental issues and problems of object oriented programming and will point toward interesting future research directions.

ECOOP '88 European Conference on Object-Oriented Programming Stein Gjessing, Kristen Nygaard, 1988-07-19. The field of Object Oriented Programming OOP has attracted increasing attention during the last few years. OOP is now recognized as an important tool for making better and more flexible information systems. This book is the proceedings of the second European Conference on Object Oriented Programming ECOOP 88 that was held in Oslo Norway from August 15 to 17 1988. The objectives of ECOOP 88 were to present the best international work in the field of OOP to interested persons from industry and academia and to be a forum for the exchange of ideas and the growth of professional relationships. Each of the 103 papers submitted was subject to a thorough refereeing process. The 22 papers selected are collected in these proceedings together with one invited paper. These 23 papers from 13 different countries comprise the currently best international work in the field of OOP. The contents of the papers include areas such as Theory Languages Didactics Implementation Applications Concurrency and Databases. The interest in object oriented programming is rapidly increasing especially within the areas of Concurrency and Databases. With its 5 papers on concurrency and 7 papers on databases the proceedings contain important new material on these subjects. This book is a must for persons who want to keep themselves up to date in the field of OOP.

ECOOP '91 European Conference on Object-Oriented Programming Pierre America, 1991-07-03. ECOOP 91 is the fifth annual European Conference on Object Oriented Programming. From their beginning the ECOOP conferences have been very successful as a forum of high scientific quality where the newest developments connected to object oriented programming and related areas could be presented and discussed. Over the last few years object oriented technology has gained widespread use and considerable popularity. In parallel with this the field has matured scientifically but there is still a lot of room for new ideas and for hot debates over fundamental issues as these proceedings show. The 22 papers in this volume were selected by the programme committee from 129 submissions. Important issues discussed in the contributions are language design specification databases concurrency types and software development.

ECOOP 2005 - Object-Oriented Programming Andrew Black, 2005-08-25. The 19th Annual Meeting of the European Conference on Object Oriented Programming ECOOP 2005 took place during the last week of July in Glasgow Scotland UK. This volume includes

the refereed technical papers presented at the conference and two invited papers. It is traditional to preface a volume of proceedings such as this with a note that emphasizes the importance of the conference in its respective field. Although such self-evaluations should always be taken with a large grain of salt, ECOOP is undisputedly the pre-eminent conference on object orientation outside of the United States. In its turn, object orientation is today's principal technology not only for programming but also for design analysis and specification of software systems. As a consequence, ECOOP has expanded far beyond its roots in programming to encompass all of these areas of research, which is why ECOOP has remained such an interesting conference. But ECOOP is more than an interesting conference. It is the nucleus of a technical and academic community, a community whose goals are the creation and dissemination of new knowledge. Chance meetings at ECOOP have helped to spawn collaborations that span the boundaries of our many subdisciplines, bring together researchers and practitioners, cross cultures, and reach from one side of the world to the other. The ubiquity of fast electronic communication has made maintaining these collaborations easier than we would have believed possible only a dozen years ago. But the role of conferences like ECOOP in establishing collaborations has not diminished.

ECOOP 2004 - Object-Oriented Programming
Martin Odersky, 2004-06-08. This book constitutes the refereed proceedings of the 18th European Conference on Object Oriented Programming, ECOOP 2004, held in Oslo, Norway, in June 2004. The 25 revised full papers presented together with the abstracts of 2 invited talks were carefully reviewed and selected from a total of 132 submissions. The papers are organized in topical sections on encapsulation, program analysis, software engineering aspects, middleware, types, verification, and systems.

ECOOP '95 - Object-Oriented Programming
Walter Olthoff, 2003-05-16. For the ninth time now, the European Conference on Object Oriented Programming provides a mid-summer gathering place for researchers, practitioners, students, and newcomers in the field of object technology. Despite fierce competition from an increasing number of attractive conferences on object-related topics, ECOOP has successfully positioned itself as the premier European object technology conference. One reason is without doubt the composition of the conference week and the nature of its events. Running in parallel on the first two days, a comprehensive tutorial program and a very selective workshop program are offered to attendees. This is followed by a three-day technical program organized in a single track, providing a highly communicative atmosphere of scientific exchange and learning. Overlapping with these events are a two-day industrial exhibition and a two-day opportunity for non-industrial system developers to demonstrate their software. Thus, ECOOP is not just a conference on programming but an event touching on the full spectrum of object technology. This volume constitutes the proceedings of the Ninth European Conference on Object Oriented Programming, ECOOP, held in Aarhus, Denmark, August 7-11, 1995. Previous ECOOP conferences were held in Paris, France; Oslo, Norway; Nottingham, England; Ottawa, Canada, jointly with OOPSLA; Geneva, Switzerland; Utrecht, the Netherlands; Kaiserslautern, Germany; and Bologna, Italy. Object technology continues to increase its impact on the corporate world.
