Economics and Policies of an Enlarged Europe Carlo Altomonte, Mario Nava, 2006-01-01 Increasingly policies and laws commonly agreed within the EU shape the political and economic scenarios of nation states in Europe However the same European context is radically changing essentially due to three major recent developments the adoption of the Euro EU enlargement to the east and the implementation of the Lisbon Strategy of structural reforms for growth and competitiveness The book presents a thorough economic analysis of these three events and of their implications for both existing and potential EU policies and objectives Carlo Altomonte and Mario Nava have written a very rigorous text in an accessible and jargon free style ensuring easy acquisition of invaluable insights into the European economic set up and the possible evolution of EU policies including an update on the reform of the Growth and Stability Pact and of the 2007 13 Financial Perspectives The accessibility of economic concepts combined with the methodological rigour of this up to date text will be of great interest to both policy makers and students

EU Enlargement, Region Building and Shifting Borders of Inclusion and Exclusion James Wesley Scott, 2016-04-22 The 2004 entry of 10 Central and Eastern European countries along with Malta and Cyprus into the EU has caused a huge shift in

the EU's external boundaries. The socio-economic and political transformations that this shift has caused not only suggest new regional development opportunities but also many potential problems and tensions. While the EU insists that enlargement will not signify new divisions, processes of inclusion and exclusion and the imposition of visa restrictions on non-EU citizens could pose obstacles to co-operation, conjuring fears of an emerging fortress Europe that effectively divides the continent. Illustrated with case studies from Central and Eastern European border areas, this book examines capacities for region building across national borders in within the context of EU enlargement, synthesizing the various insights provided by local information and suggesting ways forward for the future development of the EU's Wider Europe strategy. **Regional**

Policy and Planning in Europe Paul Balchin, Ludek Sykora, Gregory Bull, 2002-06-01. Regional Policy and Planning in Europe explores the ways regional policy and planning systems across Europe have been influenced by economic and monetary union, the impending enlargement of the European Union, the devolution of administrative power from central government to regional authorities, the increased importance of environmental and urban issues. Presenting a comprehensive overview of the economic basis of integration, this book examines the evolution of various systems of government planning and forms of devolution. **Smaller Cities in a World of Competitiveness** Peter Karl Kresl, Daniele Ietri, 2016-04-28. Much recent research in Urban Studies has concentrated on the notion of the global city, but discussion has also covered a larger set of mega-cities with populations in excess of 10 million. This analysis has begged the question of the optimal size for a city: is larger always better? Smaller Cities explores the advantages and disadvantages of different sized cities, trying to determine their place in the global economy and hierarchy. How can smaller cities gain or retain their competitiveness in a world of large cities? In a globalized world, the nation has perhaps been diminished as an economic actor, with fiscal shortcomings and political gridlock leaving cities more or less on their own in the task of enhancing their competitiveness and improving the economic lives of their residents. This book argues that smaller cities of varying population can be important actors in competitiveness and aims to bring attention to an area often overlooked by researchers. In short, are Pittsburgh, San Diego and Austin less competitive than London and Mumbai? This volume will be of interest to students, researchers and city professionals who work in urban economy and urban geography.

Modelling Regional Scenarios for the Enlarged Europe Roberta Capello, Roberto P. Camagni, Barbara Chizzolini, Ugo Fratesi, 2008-02-01. Tackling the question of what the European territory will look like over the next fifteen years, this volume provides qualitative and quantitative territorial scenarios for the enlarged Europe under different assumptions on future globalisation strategies of BRIC (Brazil, Russia, India and China) and East and West European countries. The approach is as neutral as possible vis-à-vis the results, leading to a new forecasting model, the MASST model, built by the authors. **The Coherence of EU Regional Policy** John Bachtler, Ivan Turok, 2013-12-16. This book brings together a rich selection of up-to-date practical experience of EU regional policy from across Europe. It provides different perspectives on the design and operation of regional development strategies under the Structural Funds from

people closely involved in studying managing or advising on the process at EU national and regional levels It therefore offers a more comprehensive and detailed understanding of the structural policies than has been available hitherto This will prove particularly useful to researchers practitioners and students interested in European regional policies and processes

Leadership and Change in Sustainable Regional Development Markku Sotarauta, Ina Horlings, Joyce Little, 2012

This book shows first of all that leadership plays a crucial role in reinventing regions and branching out from an old path to something new in order to create more balanced and sustainable regional development Second it maintains that leadership is not a solo but a multi agent and level activity and that it needs to be discussed and studied as such Third as the book argues leadership is shaped differently in various institutional and cultural contexts and on different scales This book explores the ways leadership plays out in regional development context contributing to economically socially and ecologically balanced sustainable future *Innovation Governance in an Open Economy* Annika Rickne, Staffan Laestadius, Henry

Etzkowitz, 2012-05-04 In an increasingly globalised world paradoxically regional innovation clusters have moved to the forefront of attention as a strategy for economic and social development Transcending international success cases like Silicon Valley and Route 128 as sources of lessons successful high tech clusters in niche areas have had a significant impact on peripheral regions Are these successful innovation clusters born or made If they are subject to planning and direction what is the shape that it takes top down bottom up or lateral Cultural Political Economy of Small Cities Anne Lorentzen, Bas van Heur, 2012-02-13 The volume highlights ongoing changes in the political economy of small cities in relation to the field of culture and leisure Culture and leisure are focal points both to local entrepreneurship and to planning by city governments which means that these developments are subject to market dynamics as well as to political discourse and action Public private partnerships as well as conflicts of interests characterise the field and a major issue related to the strategic development of culture and leisure is the balance between market and welfare This field is gaining importance in most cities today in planning production and consumption but to the extent that these changes have drawn academic attention it has focused on large metropolitan areas and on creative clusters and flagship high culture projects Smaller cities and their often substantively different cultural strategies have been largely ignored thus leading to a huge gap in our knowledge on contemporary urban change By bringing together a number of case studies as well as theoretical reflections on the cultural political economy of small cities this volume contributes to an emerging small cities research agenda and to the development of policy relevant expertise that is sensitive to place specific cultural dynamics In taking this approach the volume hopes to contribute to emerging research on culture and leisure economies by developing a differentiated spatial dimension to it without which sustainable urban strategies cannot be developed This book integrates perspectives of economic development with questions of governance and equity in relation to the fields of culture and leisure planning and development This book should be of interest to students and researchers of Urban Studies and Planning Regional Studies and Economics as well as

Sociology and Geography **Regional Development Agencies: The Next Generation?** Nicola Bellini, Mike Danson, Henrik Halkier, 2012-09-10 Across Europe regional development agencies RDAs have become a central feature of regional policy both as innovative policy makers and as the implementers of programmes and initiatives originating from the national or European level By drawing on a combination of conceptual reflection surveys comparative research and systematic use of critical case studies this book provides a new point of reference by identifying key features of the current and indeed next generation of regionally based economic development organisations

Challenged Borderlands Vera Pavlakovich-Kochi, Barbara J. Morehouse, 2017-03-02 In the early 1990s borders within Europe and between the United States and Mexico began to open The increasing flow of goods capital ideas and people across boundaries promised to reduce physical and cognitive distances Simultaneously challenges to identity have arisen within and between the European nation states driven not only by internal cultural and political dynamics but also by processes of globalization Concurrently the US Mexican border emerged in public consciousness as a location of new opportunities largely due to public perception of the benefits of the North American Free Trade Agreement NAFTA This book

explores some of the contradictory yet simultaneous processes affecting border regions A team of leading scientists offers a wide range of perspectives on global national regional and local processes and provides a useful matrix for understanding their complex multilayered implications Key concepts such as globalization borders and identities are illustrated through local and regional case studies *Applied Regional Growth and Innovation Models* Karima Kourtiti, Peter Nijkamp, Robert Stimson, 2013-10-01 Modern spatial economic systems exhibit a high degree of dynamics as a result of technological progress demographic evolution or global change In the past decade an avalanche of new regional economic growth and innovation models has been put forward This volume contains a unique collection of operational models of a strong applied nature that may be seen as original landmarks in the rich tradition of spatial economic growth modelling The contributors are recognized experts from different parts of the world **The Economic Geography of the IT Industry in the Asia Pacific Region** Philip Cooke, Glen Searle, Kevin O'Connor, 2013-07-18 The development of the information technology IT industry in the Asia Pacific region faces two challenges Firstly can its established physical technical regional and governance infrastructures be adapted to meet the challenges embedded in the set of products and processes created by the IT industry Secondly as this adaptation evolves which cities and regions will be best suited to connect to or lead global responses to these challenges The chapters in this book have set out to explore these questions providing details of change in a range of aspects of the IT industry such as mobile phones software services and flat screen design in regions in Japan Korea Taiwan India China and Australia The book also outlines the policy responses of national and regional governments in Singapore India and China and India These case studies provide a basis to understand effective strategies which could be formulated for the future This book's originality emerges from the fine detail provided about firms in particular regions and cities from research carried out by young scholars in the past two years This makes it very useful for readers keen to understand the recent changes in this dynamic industry in a fast growth part of the world and it will also help to shape thinking by policy makers on policy settings that can be applied Thinking Geographically Brendan Bartley, Phil Hubbard, Rob Kitchin, 2004-10-01 Thinking Geographically offers students and faculty alike an elegant concise and thorough overview of contemporary theoretical concerns in geography Easily accessible to those unfamiliar with social theory this volume pushes the envelope of understanding by sketching the contours of post structuralist spatial thought including such critical emerging topics as geographies of text the body money and globalisation Brief biographies of influential theorists demonstrate how ideas are embodied and personified This volume is highly useful for courses in human geography the history and status of the discipline and will stand as a milestone in the discipline's conceptual understanding over the next decade or more Barney Warf Florida State University The last decade has seen Geography transformed by an astonishing range of cultural and philosophical concepts and approaches Thinking Geographically is designed for students as an accessible and enjoyable introduction to this new landscape of geographical ideas The book takes the reader through the history of geographic

thought up to a survey of the present Contemporary theory is then used to explore real world issues drawn from across the discipline of social cultural political and economic geography Entertainingly written and packed with examples and with profiles of key theorists the book is an ideal introduction for any student who wants to discover the potential of thinking geographically
