Leslie, 2008-06-02 This work is based on the Mexico 2000 meeting under the auspices of ICRISAT International Crops Research Institute for Semi Arid Tropics and INTSORMIL International Sorghum and Millet Collaborative Research Support Program Sorghum and millet are very important agronomic crops in many parts of the world specifically in the semi arid regions in warm areas The crops are of great significance in supplying food and feed in the developing areas of Latin America Africa and Asia **Ennemis du mil au Sahel** M. Matthews, N. D. Jago, 1993-01 **Les ailes du Sahel** Le Zwarts, Rob G. Bijlsma, Jan van der Kamp, Eddy Wymenga, 2014-04-14 Living on the Edge examines the function of the Sahel region of Africa as an important wintering area for long distance migrant birds It describes the challenges the birds have to cope with climate change of course and rapid man made habitat changes related to deforestation irrigation and reclamation of wetlands How have all these changes affected the birds and have birds adapted to these changes Can we explain the changing numbers of breeding birds in Europe by changes in the Sahel or vice versa Winner of the BB BTO Best Bird Book Award 2010 The Jury commented It is a tremendous book in every department It marks a step change in our knowledge of the ecology of this critically important region in the European African migration system and of the many species familiar to us on their breeding grounds that winter there The authors combine the latest scientific information with vivid descriptions of landscapes and animals Their book is richly illustrated with large numbers of drawings maps and photographs by acclaimed experts The wealth of coloured graphics has been particularly well thought out and encourages readers to delve into the figures and learn more about the region rather than having the all too common opposite effect Summing up the jury praises not just the high quality of the texts the information and the illustrations but also the sheer pleasure of reading the book One of the key attributes of a good book is to be able to grip the reader's attention and transport him or her to another place We feel confident that Living on the edge will have that effect **Advances in Downy Mildew Research** P.T.N.

**Use of Pheromone Traps for Monitoring the Millet Stem Borer (Coniesta ignefusalis)** Ousmane Youm,D. R. Hall,D. Russell,1998 **The Pesticide Detox** Jules N. Pretty,2012-07-26 Since the 1960s the world's population has more than doubled and agricultural production per person has increased by a third Yet this growth in production has masked enormous hidden costs arising from widespread pesticide use massive ecological damage and high incidences of farmer poisoning and chronic health effects Whereas once the risks involved with pesticide use were judged to be outweighed by the potential benefits increasingly the external costs of pesticides to environments and human health are being seen as unacceptable In response to this trend recent years have seen millions of farmers in communities around the world reduce their use of harmful pesticides and develop cheaper and safer alternatives The Pesticide Detox explores the potential for the phasing out of hazardous pesticides and the phasing in of cost effective alternatives already available on the market This book makes clear that it is time to start the pesticide detox and to move towards a more sustainable agriculture
