**Atlantic Automobilmism** Gijs Mom, 2014-12-01 Our continued use of the combustion engine car in the 21st century despite many rational arguments against it makes it more and more difficult to imagine that transport has a sustainable future Offering a sweeping transatlantic perspective this book explains the current obsession with automobiles by delving deep into the motives of early car users It provides a synthesis of our knowledge about the emergence and persistence of the car using a broad range of material including novels poems films and songs to unearth the desires that shaped our present car society Combining social psychological and structural explanations the author concludes that the ability of cars to convey transcendental experience especially for men explains our attachment to the vehicle **Entering the Auto Age** Robert Emerson Ireland, 1990 A book for the social historian as well as the old car buff this entertaining study examines the social economic and cultural impact made on the state by the introduction of the automobile Includes information on the Good Roads movement and contains more than 60 black and white illustrations **Old Age and the Search for Security** Carole Haber, Brian Gratton, 1993-12-22 Haber and Gratton lay to rest many conventional assumptions concerning the place of older persons in American history Choice Haber and Gratton's meaty little book does more than provide an intelligent synthesis of existing old age history its new interpretations insights and shifts of emphasis will provoke responses and help move historians work away from the now threadbare original disputes in the field toward new questions and approaches American Historical Review Indeed Haber and Gratton give us a refreshingly multidimensional history of the shift in old age security from work assets or children to government annuities Contemporary Sociology the history of old age has finally come of age The authors successfully synthesize the best of the earlier social and cultural studies with new empirical evidence and recent findings of economic historians Journal of Economic History A truly revisionary interpretation of the cultural and structural forces that shaped the elderly's lives from the colonial period to the present Lucid and controversial it is bound to be widely cited and hotly contested W Andrew Achenbaum This social history of the American elderly offers a provocative new view of aging in the United States It revises traditional assumptions about the economic status of the old and challenges the long held contention that industrialization destroyed family relationships **Arts & Humanities Citation Index**, 2001

*Paperbound Books in Print*, 1992 **The Plunder of Black America** Calvin Schermerhorn, 2025-02-11 The long history of the racial wealth gap in America told through the stories of seven Black families who struggled to build wealth over multiple generations Wealth is central to the American pursuit of happiness and is an overriding measure of well being Yet wealth is conspicuously absent from African American households Why do some 3.5 million Black American families have zero or negative wealth Historian Calvin Schermerhorn traces four hundred years of Black dispossession and decapitalization what Frederick Douglass called plunder through the stories of families who have strived to earn and keep the fruits of their toils Their struggles reveal that the ever evolving strategies to strip Black income and wealth have been critical to sustaining

a structure of racialized disadvantage These accounts also tell of the quiet heroism of those who worked to overcome obstacles and defy the plunder From the story of Anthony and Mary Johnson abducted from Angola and brought to Virginia in 1619 to the enslaved Black workers dispossessed by the Custis Washington family to Venture Smith born Broteer Furro who purchased his freedom to three generations of a family enslaved in the South who moved north after Emancipation to the Tulsa massacre and the subprime lending crisis Schermerhorn shows that we cannot reckon with today's racial wealth inequality without understanding its unrelenting role in American history

**The Railway Age** ,1902 *New Energies*  
Stephen G. Gross,Andrew Needham,2023-02-28 Over the past 250 years energy transitions have occurred repeatedly the rise of coal in the nineteenth century the explosion of oil in the twentieth century the nuclear utopianism of the 1950s and 1960s These transitions have been as revolutionary as any political or economic upheaval and they required changes in infrastructure and behavior Yet new energies never wholly replace old ones This volume historicizes energy production and consumption while demonstrating how energy use has reshaped everything from social life and economic organization to political governance It foregrounds the importance of energy for big historical questions about capitalism democracy inequality the environment and identity and it argues that energy systems themselves merit attention as key agents of historical change Given the urgency of climate change and the central position that energy plays in causing and potentially solving global warming this volume engages history as a discipline in the debate over what may be most monumental energy transition of all time the shift away from fossil fuels
