Enterprise And Technology The German And British Steel Industries 1897 1914:

Enterprise and Technology Ulrich Wengenroth, 2009-03-19 This is a detailed account of the British and German steel industries performance during three decades that were marked by dramatic change Relying on governmental and corporate archives as well as on the contemporary trade literature Professor Wengenroth has drawn a meticulous picture of how managements in the two countries met the strategic problems raised by these changes The author does not however merely trace technological developments rather he uses them as a backdrop for a contribution to the long running debate on Britain's relative industrial decline in the late nineteenth century

Visual Cultures in Science and Technology Klaus Hentschel, 2014 This book aims to provide a synthesis of the history generation use and transfer of images in scientific practice It delves into the rich reservoir of case studies on visual representations in scientific and technological practice that have accumulated over the past couple of decades by historians sociologists and philosophers of science The main aim is thus located on the meta level It adopts an integrative view of recurrently noted general features of visual cultures in science and technology something hitherto unachieved and believed by many to be a mission impossible By systematic comparison of numerous case studies the purview broadens away from myopic microanalysis in search of overriding patterns The many different disciplines and research areas involved encompass mathematics technology natural history medicine the geosciences astronomy chemistry and physics The chosen examples span the period from the Renaissance to the late 20th century The broad range of visual representations in scientific practice is treated as well as schooling in pattern recognition design and implementation of visual devices and a narrowing in on the special role of illustrators and image specialists

The History of Foreign Investment in the United States to 1914 Mira Wilkins, 1989 From the colonial era to 1914 America was a debtor nation in international accounts owing more to foreigners than foreigners owed to us By 1914 it was the world's largest debtor nation Mira Wilkins provides the first complete history of foreign investment in the United States during that period The book shows why the United States was attractive to foreign investors and traces the changing role of foreign capital in the nation's development covering both portfolio and direct investment The immense new wave of foreign investment in the United States today and our return to the status of a debtor nation once again the world's largest debtor nation makes this strong exposition far more than just historically interesting Wilkins reviews foreign portfolio investments in government securities federal state and local and in corporate stocks and bonds as well as foreign direct investments in land and real estate manufacturing plants and even such service sector activities as accounting insurance banking and mortgage lending She finds that between 1776 and 1875 public sector securities principally federal and state securities drew in the most long term foreign investment whereas from 1875 to 1914 the private sector was the main

attraction The construction of the American railroad system called on vast portfolio investments from abroad there was also sizable direct investment in mining cattle ranching the oil industry the chemical industry flour production and breweries as well as the production of rayon thread and even submarines In addition there were foreign stakes in making automobile and electrical and nonelectrical machinery America became the leading industrial country of the world at the very time when it was a debtor nation in world accounts *Technikgeschichte* ,2006 Technology and Change, 1750-1914 ,1983
