Enterprises In Europe Fifth Report Enterprises In Europe 5:

Success Factors of Corporate Spin-Offs Alexander Tübke, 2004 Corporate Spin Off processes are very interesting phenomena for management theory and practice In theory Corporate Spin Offs are both a driver and a result of organisational change offering the possibility to investigate an area where companies are genuinely sharing experience and best practice Although Corporate Spin Offs can be clearly distinguished from other types of start ups and divestments and despite combining key characteristics in a unique way existing investigation is sparse and heterogeneous In practice Corporate Spin Off processes are frequent and highly successful but not as well regarded as Merger Acquisition strategies and less understood by the decision makers The present work was designed to meet these demands by analysing the success factors of Corporate Spin Offs their relative contribution to the process and the role of the different actors involved Based on an extensive literature review and a new Spin Off typology a broad range of success factors and success dimensions is proposed Using a combination of multivariate models the responses from 211 European companies to a questionnaire are analysed and typologies derived Among the single factors customer participation the transfer of managerial and market related experience and the main motivation are the most important ones for the Spin Off process and its success The typologies reveal characteristic factors sets showing for example that high growth Spin Offs benefited over proportionally from sector growth or the access to relations with customers or suppliers This produces a new and comprehensive perspective on the relative contribution of each success factor their interaction and the behaviour of both the parent and the Spin Off companies in the process These results are highly valuable for managers scientists in the field and policy makers **A**

three Among the issues addressed are the level of indirect taxation and subsidisation implicit in the pricing structures of public enterprises the links between public enterprise and the public exchequer and the implications of their operations for distributional equity In Part four the extent to which privatisation can solve the problems of public enterprise is discussed The book ends with some broad conclusions on the future of public enterprise Throughout the approach is analytical but the arguments are supported by extensive examples from both developed and developing economies Proceedings of The 5th MAC 2015 group of authors,2015-10-14 The 5th Multidisciplinary Academic Conference in Prague 2015 Czech Republic The 5th MAC 2015 **East European Economic Assessment** ,1981 **ECSM 2018 5th European Conference on Social Media** Prof. Vincent Cunnane,Dr. Niall Corcoran,2018-06-21 These proceedings represent the work of researchers participating in the 5th European Conference on Social Media ECSM 2018 which is being hosted this year by Limerick Institute of Technology Ireland on 21 22 June 2018 **East European Economic Assessment: Regional assessments** ,1981 *East European Economic Assessment: Regional assessments, 1981* United States.
