Enterprising States The Public Management Of Welfare To Work:

Enterprising States Mark Considine, 2001-05-02 This book explores two fundamental shifts in the paradigms of governance in Western bureaucracies the widespread use of privatization private firms and market methods to run core public services and the conscious attempt to transform the role of citizenship from ideals of entitlement and security to new notions of mutual obligation selectivity and risk Mark Considine examines a key service of the modern welfare state unemployment assistance to explain and theorize the nature of these radical changes He has undertaken extensive research in the United Kingdom the Netherlands Australia and New Zealand four countries which have been among the boldest reformers within the OECD yet each adopting distinctively different models and programs *Getting Welfare to Work* Mark Considine, Jenny M. Lewis, Siobhan O'Sullivan, E. Sol, 2015 *Getting Welfare to Work* traces the development of the Australia UK and Dutch employment services systems Each system has undergone radical policy change since 1998 with a trend toward outsourcing and service privatisation as governments search for ways to get welfare systems working in effective efficient and politically acceptable ways Using interviews and survey data this book tells the story of those bold reforms from the perspective of the frontline staff who work directly with jobseekers over a fifteen year period It shows how new ways of thinking about public services have impacted on service delivery organisations and those who work with welfare clients

International Perspectives on Welfare to Work Policy Richard Hoefer, James Midgley, 2006 The international contributors to this text present the various interpretations of welfare to work in the United States the United Kingdom Australia and Hong Kong and on the role social work plays in creating and implementing social welfare policies *From Rights to Management: Vol. 18: Contract, New Public Management and Employment Services* Terry Carney, 2002-07-31 *From Rights to Management* presents a powerful and thoroughly documented new thesis about the transformation of the concept of work during the period 1970 2000 The authors remind us of what we now easily forget that not so long ago the right of an unemployed person to social security benefits and services was not questioned Over the years this right has been gradually replaced by a two way bargain with the state And in the place of this old social citizenship there has arisen a government corporate alliance that manages job seekers by contract The shift from the needs of the person to the demands of business is complete Those tempted to argue with this provocative thesis will find a formidable array of evidence assembled in this well researched book Focusing primarily on Australia where the marketisation of welfare and employment services has gone farther than in any other country Professors Carney and Ramia draw not only on the recent literature of several relevant disciplines but also on in depth interviews with thirty unemployed people from a wide range of backgrounds and situations By assessing the inner workings and impacts of public management transformations on the lives of those most deeply affected the authors provide a keen understanding of how the management theories initiatives and pretexts economic and legal work out in actuality The interdisciplinary discussion incorporates debates about civil society social capital and other

germane topics of great concern to scholars policymakers and administrators in this era of globalisation A deep analysis of the new policy network of social services examines the types of contracts that govern the various parts of the system The analysis concludes with a proposed new framework that reinstalls citizenship as the basis for welfare policy but in a way that places real obligations and accountability on government and does not leave disadvantaged persons to fight a losing battle No lawyer professional academic or official in the social policy environment can afford to ignore this challenging work

Public Value John Benington, Mark Moore, 2010-11-30 This text provides a concise and internationalized restatement of the public value approach an assessment of its impact to date in theory and practice and of its particular relevance to the challenges of public management in a time of crisis and austerity **Political Accountability** Antonino

Palumbo, 2017-03-02 Political accountability forms a cornerstone of modern democracy it directs the political system towards the public interest and allows the exercise of the principles of autonomy and self determination that lie at the core of democratic politics Sadly existing democracies with their large centralized bureaucracies have evolved in ways that progressively undermine the ability of citizens to keep their representatives accountable and political regimes responsive Far from reversing this trend the neoliberal reforms introduced since the 1980s have increased that accountability gap

Globalization and the alleged passage from government to governance have aggravated the problem further The notion of accountability that survives these changes is a problematic form of auditing carried out by a constellation of quangos autonomous agencies and NGOs whose own accountability is problematic This volume collects the main contributions to current debates on political accountability It explores the challenges traditional conventions of accountability face today at the domestic trans and international levels and indicates the distinctive solutions those challenges require **Creating and**

Implementing Public Policy Gemma Carey, Kathy Landvogt, Jo Barraket, 2015-12-14 In order to address major social policy problems governments need to break down sectoral barriers and create better working relationships between practitioners policymakers and researchers Currently major blockages exist and stereotypes abound Academics are seen as out of touch and unresponsive policymakers are perceived to be justifying policy decisions and the community sector seeks more funding without demonstrating efficacy These stereotypes are born out of a lack of understanding of the work and practices that exist across these three sectors Drawing on ground breaking research and partnerships with contributions from senior public servants this book explores the competing demands of different actors involved in policy change It challenges current debates assumptions and reflects a unique diversity of experiences Combined with differing theoretical perspectives it provides a uniquely practical insight for those seeking to influence public policy This innovative text provides essential reading for community sector practitioners academics and advanced level students in public policy social policy and public administration as well as for public service professionals **Benchmarking Carrots and Sticks** Julie Castonguay, 2009

Social benchmarking is an evaluation method in which the performance levels of different public social programs are

compared either relatively to each other or to an absolute value The first part of this research discusses the use of social benchmarking for the evaluation of active labour market policies This part also develops a social benchmark model which can be used to assess the performance of active labour market policies in general and work based employment programs in specific The second part of this research consists of the actual benchmarking of the work based employment programs in five countries Australia Canada the Netherlands Switzerland and the United Kingdom

Neoliberalizing the University: Implications for American Democracy Sanford Schram, 2017-10-02 This collection brings together essays to address the crisis of Higher Education today focusing on its neoliberalization Higher Education has been under assault for several decades as neoliberalism's preference for market based reforms sweeps across the US political economy The recent push for neoliberalizing the academy comes at a time when it is ripe for change especially as it continues to confront growing financial pressure particularly in the public sector The resulting cutbacks in public funding especially to state universities led to a variety of debilitating changes increases in tuition growing student debt more students combining working and schooling declining graduation rates for minorities and low income students increased reliance on adjuncts and temporary faculty and most recently growing interest in mass processing of students via online instruction While many serious questions arise once we begin to examine what is happening in higher education today one particularly critical question concerns the implications of these changes on the relationship of education to as yet still unrealized democratic ideals The 12 essays collected in this volume create important resources for students faculty citizens and policymakers who want to find ways to address contemporary threats to the higher education democracy connection This book was originally published as a special issue of New Political Science

Changing Teacher Professionalism Sharon Gewirtz, Pat Mahony, Ian Hextall, Alan Cribb, 2009-01-08 Significant changes in the policy and social context of teaching over the last 30 years have had substantial implications for teacher professionalism This collection of work by leading international scholars in the field makes a unique contribution to understanding both how these changes are impacting on teaching and how teachers might change their practice for the better

The Constitutional School of American Public Administration Stephanie Newbold, David H. Rosenbloom, 2016-10-26 The growing constitutional school of public administration has roots in the Federalist Papers constitutional law and the writings of several contemporary leaders and contributors in the field It is comprised of a loose grouping of scholars who subscribe to the proposition that constitutions and the constitutional characteristics of a regime are key determinants of public administrative culture institutions organizations personnel practices budgetary and decision making processes commitment to the rule of law and human rights and myriad aspects of overall behavior Participants in constitutional school research believe that the big questions in public administration cannot be answered without reference to constitutional designs institutions and regime values This edited volume brings together the most prominent names in constitutional school scholarship in an aim to make it more visible accessible and central to the field of public administration

s pedagogy scholarship and intellectual development It will be essential reading for scholars and students of public administration with an interest in constitutional administrative law and political theory around the globe

The Library and the Workshop Jenny Andersson,2009-12-04 This book offers a detailed account of the way that social democracy today makes sense of capitalism In particular it challenges the idea that social democracy has gone neoliberal arguing that so called Third Way policies seem to have brought out new aspects of a thoroughgoing social interventionism with roots deep in the history of social democracy Author Jenny Andersson expertly develops the claim that what distinguishes today s social democracy from the past is the way that it equates cultural and social values with economic values which in turn places a premium on individuals who are capable of succeeding in the knowledge economy Offering an insightful study of Britain s New Labour and Sweden s SAP and of the political cultural transformations that have taken place in those countries this is the first book that looks seriously into how the economic social and cultural policies of contemporary social democracy fit together to form a particular understanding of capitalism and capitalist politics

Leadership of Public Bureaucracies: The Administrator as Conservator Larry D. Terry,2015-05-15 The revolution in public management has led many reformers to call for public managers to reinvent themselves as public entrepreneurs Larry D Terry opposes this view and presents a normative theory of administrative leadership that integrates legal sociological and constitutional theory

Activation and Labour Market Reforms in Europe S. Betzelt,S. Bothfeld,2011-06-14 This book analyzes in what way activation policies impact on given patterns of social citizenship that predominate in national contexts It argues that the liberal paradigm of activation introduced into labour market policies in all Western European states challenges the specific patterns of social citizenship in each country

Agencies C. Pollitt,C. Talbot,J. Caulfield,A. Smullen,2004-10-15 Many

countries now use agencies rather than ministries to deliver central government services There have been many claims about the benefits of organizing and delivering government in this way but there has been little research into how they work in practice Agencies both reviews existing theories and models of agentification and adds detailed analysis of major new empirical evidence Based partly on a major international research project and partly on a reinterpretation of the existing literature this book gets inside the world of agencies and ministries An in depth analysis of agencies in four EU countries serves as a basis for testing alternative theoretical models and developing a new approach to the complexities of contemporary government

The Governance of Active Welfare States in Europe Willibrord de Graaf,Rik Van Berkel,T. Sirovátka,2011-05-27 During the last decade many European countries introduced extensive reforms to the way that income protection and activation programmes for the unemployed are implemented and delivered This book analyzes and compares these reforms in nine European countries focusing on the reforms programmes themselves as well as on their effects
