Enterprising Women:

Enterprising Women Virginia G. Drachman, 2002 An inspiring collection of American women entrepreneurs introduces readers to women who have carved out their own slice of the economic pie from Colonial times to present **Taking Control of Your Life** Gail Blanke, Kathleen Walas, 1990 Based on the author's professional experience with Avon's Women of Enterprise Awards which honors women who have overcome significant obstacles to achieve success in their own small businesses the book shares case histories of exceptional women who have demonstrated that determination courage and ingenuity can triumph over adversity *Enterprising Women* Mary Hallward-Driemeier, 2013-06-10 This book brings together new household and enterprise data from 41 countries in Sub-Saharan Africa to inform policy makers and practitioners on ways to expand women entrepreneurs' economic opportunities Sub-Saharan Africa boasts the highest share of women entrepreneurs but they are disproportionately concentrated among the self-employed rather than employers Relative to men women are pursuing lower opportunity activities with their enterprises more likely to be smaller informal and in low value added lines of business The challenge in expanding opportunities is not helping more women become entrepreneurs but enabling them to shift to higher return activities A central question addressed in the book is what explains the gender sorting in the types of enterprises that women and men run The analysis shows that many Sub-Saharan countries present a challenging environment for women Four key areas of the agenda for expanding women's economic opportunities in Africa are analyzed strengthening women's property rights and their ability to control assets improving women's access to finance building human capital in business skills and networks and strengthening women's voices in business environment reform These areas are important both because they have wide gender gaps and because they help explain gender differences in entrepreneurial activities It is particularly striking that while gender gaps in education tend to close with higher incomes gaps in women's property rights and in women's participation in reform processes do not As simply raising a country's income is unlikely to be sufficient to give women equal ability to control assets or have greater voice more proactive steps will be needed Practical guidelines to move the agenda forward are discussed for each of these key areas

Enterprising Women Kit Candlin, Cassandra Pybus, 2015-01-15 In the Caribbean colony of Grenada in 1797 Dorothy Thomas signed the manumission documents for her elderly slave Betty Thomas owned dozens of slaves and was well on her way to amassing the fortune that would make her the richest black resident in the nearby colony of Demerara What made the transaction notable was that Betty was Dorothy Thomas's mother and that fifteen years earlier Dorothy had purchased her own freedom and that of her children Although she was just one remove from bondage Dorothy Thomas managed to become so rich and powerful that she was known as the Queen of Demerara Dorothy Thomas's story is but one of the remarkable accounts of pluck and courage recovered in *Enterprising Women* As the microbiographies in this book reveal free women of color in Britain's Caribbean colonies were not merely the dependent concubines of the white male elite as is commonly

assumed In the capricious world of the slave colonies during the age of revolutions some of them were able to rise to dizzying heights of success These highly entrepreneurial women exercised remarkable mobility and developed extensive commercial and kinship connections in the metropolitan heart of empire while raising well educated children who were able to penetrate deep into British life

Enterprising Women and Shipping in the Nineteenth Century Helen Doe,2009 An examination of women entrepreneurs who invested in and often managed non feminine businesses such as shipping and shipbuilding in the late eighteenth and nineteenth centuries Far from the genteel notion of Victorian women as milliners and haberdashers this book shows that women could and did manage male businesses and manage men Women invested in the expanding shipping industry throughout the late eighteenth and the nineteenth century and actively ran non feminine businesses such as shipbuilding By setting the businesswomen firmly in the context of the industry the book examines the business challenges from the woman s perspective It demonstrates how a woman needed to understand the business requirements while in some cases also being a single parent As business managers they had to manage a male workforce deal with large and important customersand ensure they maintained their firm s reputation and continued to win orders Nor were these women mere caretakers for the next generation in many cases continuing to run the business in an active manner after their son or sons were of age This book reveals communities of independent women in England who were active entrepreneurs and investors in a period when women were increasingly supposed to be relegated to a more domestic role It includes briefbiographies of many of these women entrepreneurs who were also conventional mothers wives and daughters Helen Doe is an Honorary Fellow of the Centre for Maritime Historical Studies University of Exeter a Council Member ofthe Society for Nautical Research chair of their marketing committee a member of the British Commission for Maritime History on the Advisory Council of the SS Great Britain and a Trustee of the National Maritime Museum Cornwall Women's Quick Facts STEMconnector®,2016-11-08

Women's Quick Facts is the indispensable resource on the status and contribution of women The only resource of its kind it is a book that will be highly sought after for multiple uses both in the US and globally It is unique with more than 310 sources and resources cited It is about the game changers organizations media entities businesses resource institutions and women s associations all driving towards progress *Women on Their Own* Rudolph Bell,Virginia Yans,2007-12-06 Despite what would seem some apparent likenesses single men and single women are perceived in very different ways Bachelors are rarely considered lonely or aberrant They are not pitied Rather they are seen as having chosen to be footloose and fancy free to have sports cars boats and enjoy a series of unrestrictive relationships Single women however do not enjoy such an esteemed reputation Instead they have been viewed as abnormal neurotic or simply undesirable attitudes that result in part from the long standing belief that single women would not have chosen her life Even the single career woman is seldom viewed as enjoying the success she has achieved No one believes she is truly fulfilled Modern American culture has raised generations of women who believed that their true and most important role in society was to get married and have children Anything

short of this role was considered abnormal unfulfilling and suspect This female stereotype has been exploited and perpetuated by some key films in the late 40 s and early 50 s But more recently we have seen a shift in the cultural view of the spinster The erosion of the traditional nuclear family as well as a larger range of acceptable life choices has caused our perceptions of unmarried women to change The film industry has reflected this shift with updated stereotypes that depict this cultural trend The shift in the way we perceive spinsters is the subject of current academic research which shows that a person s perception of particular societal roles influences the amount of stress or depression they experience when in that specific role Further although the way our culture perceives spinsters and the way the film industry portrays them may be evolving we still are still left with a negative stereotype Themes of choice and power have informed the lives of single women in all times and places When considered at all in a scholarly context single women have often been portrayed as victims unhappily subjected to forces beyond their control This collection of essays about women on their own attempts to correct that bias by presenting a more complex view of single women in nineteenth and twentieth century United States and Europe Topics covered in this book include the complex and ambiguous roles that society assigns to widows and the greater social and financial independence that widows have often enjoyed widow culture after major wars the plight of homeless middle class single women during the Great Depression and comparative sociological studies of contemporary single women in the United States Britain Ireland and Cuba Composed of papers presented to the Rutgers Center for Historical Analysis project on single women this collection incorporates the work of specialists in anthropology art history history and sociology It is deeply connected with the emerging field of singleness studies to which the RCHA has contributed an Internet based bibliography of more than 800 items All of the essays are new and have not been previously published
