The Middle East Military Balance, 2001-2002 Shlomo Brom, Yiftah Shapir, 2002 Up to date authoritative information on military capabilities in the Middle East The explosion of violence between Israelis and Palestinians that began in late 2000 is a tragic reminder of the potential for armed conflict in the Middle East Although many developments in the 1990s appeared to have reduced the likelihood of war in the region stability between Israel and its Arab neighbors remains tenuous Security in the Persian Gulf also remains uncertain as Iran and Iraq have continued their pursuit of weapons of mass destruction Understanding the

dynamics of security in the Middle East requires detailed information on the military capabilities of the region's countries. The Middle East Military Balance is prepared annually by the Jaffee Center for Strategic Studies in Tel Aviv. It is based on data from many sources including some that are unavailable to other institutes. With its wealth of current hard-to-find information, it offers an authoritative and indispensable guide to military capabilities in the Middle East. Governments, the media, and researchers pay close attention to its data and analysis each year.

Extreme Programming and Agile Processes in Software Engineering Hubert Baumeister, Michele Marchesi, Mike Holcombe, 2005-05-24. Extreme Programming has come a long way since its first use in the C3 project almost 10 years ago. Agile methods have found their way into the mainstream and at the end of last year we saw the second edition of Kent Beck's book on Extreme Programming containing a major refactoring of XP. This year the 6th International Conference on Extreme Programming and Agile Processes in Software Engineering took place June 18-23 in Sheffield. As in the years before, XP 2005 provided a unique forum for industry and academic professionals to discuss their needs and ideas on Extreme Programming and its methodologies. These proceedings reflect the activities during the conference which ranged from presentation of research papers, invited talks, posters, and demonstrations, panels, and activity sessions to tutorials and workshops. Included are also papers from the Ph.D. and Master's Symposium which provided a forum for young researchers to present their results and to get feedback. As varied as the activities were, the topics of the conference which covered the presentation of new and improved practices, empirical studies, experience reports, and case studies, and last but not least the social aspects of agile methods. The papers and the activities went through a rigorous reviewing process. Each paper was reviewed by at least three Program Committee members and was discussed carefully among the Program Committee. Of 62 papers submitted, only 22 were accepted as full papers.

The Limits of Voice Luiz Costa Lima, 1996 The title of this work derives from Costa Lima s reading of what is probably the most famous passage in Kant s Third Critique In Kant s thesis that the results of aesthetic judgment are generally communicable but without the mediation of a concept Costa Lima discovers the necessity to identify

and underscore a silence This silence these limits of voice becomes the complex metonymy for the central theme of this book literary experience as a case of aesthetic experience In pursuing this theme Costa Lima views aesthetic and literary experience as a historically limited potentiality and examines the limits of aesthetic experience which comes from its dependence on contextual requirements The concern about limits of voice is developed on three different levels First Costa Lima focuses as a historical and systematic condition for aesthetic and literary experience on subjectivity as the subject's right to speak in his/her own name Second he argues that although historical modes of speaking and experiencing were inscribed into and legitimized by cosmological constructions subjectivity requires the existence of a context no longer grounded in cosmology which he refers to as the Law Third he postulates the double dependence of literary and aesthetic experience on the emergence of subjectivity and the existence of the Law as its enabling and limiting frame condition This book answers a challenge that has persisted in literary theory and literary history for almost two decades how to historicize the concept of literature
