Tales of alien abductions, miraculous relics and haunted castles have attracted believers and skeptics across the globe for centuries. Paranormal investigator Joe Nickell tackles the world's most seemingly inexplicable myths in *Adventures in Paranormal Investigation*. With four decades of experience in the field, Nickell employs skepticism and scientific analysis to pull truth from the mires of false evidence and trickery that surround both old and new legends and mysteries. Unlike authors who engage in hype and sensationalism in order to foster or debunk myths, Nickell approaches each case with a rational and scientific approach intended to find the truth. Occam's Razor, all things being equal, the simplest solution is the best one, is a principal instrument in his investigative toolbox, as well as the belief that it is the claimant's responsibility to provide the extraordinary proof required in such extraordinary cases. *Adventures in Paranormal Investigation* features Nickell's on-site explorations in unusual phenomena. Among the forty unique cases, Nickell examines mysteries ranging from snake charmers who purport to hold influence over the reptiles to the Holocaust victims who reportedly haunt a gas chamber in Dachau to Lake Simcoe's resident lake monster, Igopogo in Canada. In addition to the case studies, Nickell analyzes how the propensity to fantasize can affect human perceptions of and belief in paranormal activity and how his personal experience with the paranormal was altered when intuition led to the discovery of a daughter he didn't know existed. More than just another myth-busting text, *Adventures in Paranormal Investigation* brings together reason and scientific analyses to explain both the phenomena and the role of human perception therein, establishing Nickell as the foremost paranormal investigator of our time.

Hearing Things Leigh Eric Schmidt, 2002-11-30. Faith cometh by hearing, so said Saint Paul, and devoted Christians from Augustine to Luther down to the present have placed particular emphasis on spiritual arts of listening. In quiet retreats for prayer in the noisy exercises of Protestant revivalism, in the mystical pursuit of the voices of angels, Christians have listened for a divine call. But what happened when the ear tuned to God's voice found itself under the inspection of Enlightenment critics? This book takes us into the ensuing debate about hearing things, an intense, entertaining even spectacular exchange over the auditory immediacy of popular Christian piety. The struggle was one of encyclopedic range, and Leigh Eric Schmidt conducts us through natural histories of the oracles, anatomies of the diseased ear, psychologies of the unsound mind, acoustic technologies from speaking trumpets to talking machines, philosophical regimens for educating

the senses and rational recreations elaborated from natural magic notably ventriloquism and speaking statues Hearing Things enters this labyrinth all the new disciplines and pleasures of the modern ear to explore the fate of Christian listening during the Enlightenment and its aftermath In Schmidt s analysis the reimagining of hearing was instrumental in constituting religion itself as an object of study and suspicion The mystic s ear was hardly lost but it was now marked deeply with imposture and illusion

Employing the ground rules of science and the standards of scientific evidence, Prothero and Callahan discuss a wide range of topics including the reliability of eyewitness testimony, psychological research into why people want to believe in aliens and UFOs, and the role of conspiratorial thinking in UFO culture. They examine a variety of UFO sightings and describe the standards of evidence used to determine whether UFOs are actual alien spacecraft. Finally, they consider our views of aliens and the strong cultural signals that provide the shapes and behaviors of these beings. While their approach is firmly based in science, Prothero and Callahan also share their personal experiences of Area 51, Roswell, and other legendary sites, creating a narrative that is sure to engross both skeptics and believers.

50 Popular Beliefs that People Think are True Guy P. Harrison, 2011-12-20

What would it take to create a world in which fantasy is not confused for fact and public policy is based on objective reality, asks Neil deGrasse Tyson, science popularizer and author of *Astrophysics for People in a Hurry*. I don't know for sure, but a good place to start would be for everyone on earth to read this book. Maybe you know someone who swears by the reliability of psychics or who is in regular contact with angels. Or perhaps you're trying to find a nice way of dissuading someone from wasting money on a homeopathy cure. Or you met someone at a party who insisted the Holocaust never happened or that no one ever walked on the moon. How do you find a gently persuasive way of steering people away from unfounded beliefs, bogus cures, conspiracy theories, and the like? This down-to-earth, entertaining exploration of commonly held extraordinary claims will help you set the record straight. The author, a veteran journalist, has not only surveyed a vast body of literature but has also interviewed leading scientists, explored the most haunted house in America, frolicked in the inviting waters of the Bermuda Triangle, and even talked to a contrite Roswell alien. He is not out simply to debunk unfounded beliefs. Wherever possible, he presents alternative scientific explanations, which in most cases are even more fascinating than the wildest speculation. For example, stories about UFOs and alien abductions lack good evidence, but science gives us plenty of reasons to keep exploring outer space for evidence that life exists elsewhere in the vast universe. The proof for Bigfoot or the Loch Ness Monster may be nonexistent, but scientists are regularly discovering new species, some of which are truly stranger than fiction. Stressing the excitement of scientific discovery and the legitimate mysteries and wonder inherent in reality, this book invites readers to share the joys of rational thinking and the skeptical approach to evaluating our extraordinary world.

 book presents new and astonishing interpretations of ancient history mythology and world religions that will call many
 established beliefs into question In *Gateway of the Gods* author Craig Hines invites readers to reconsider preconceived
 notions concerning Biblical theology in light of recent scientific discoveries and inquiries concerning the nature of the
 universe This fascinating exploration reveals a number of ideas that have been suppressed and obscured behind layers of
 symbolism and misguided propaganda for thousands of years until now Why is it that so many world cultures share details of
 an event when fallen angels descended upon the earth and fathered hybrid offspring called the Nephilim Is it possible that
 these beings used gateway technology housed within pyramids and holy temples to travel between the heavenly and earthly
 realms Do the latest advances in theoretical physics lend credibility to the idea that otherworldly beings might reside in
 dimensions parallel to our own Do the recorded voices of the dead known as Electronic Voice Phenomena EVP indicate that
 we may be able to communicate with these other realms Was a secret message embedded within ancient texts that could only
 be revealed after we have attained the knowledge and technology necessary to understand it Does this message offer a
 solution to the approaching environmental disaster that scientists warn will be more devastating to human civilization than
 any others in recorded history Drawing from a variety of historical sources and years of meticulous research the author
 weaves together a compelling argument involving a range of seemingly disparate topics that when considered together

formulate a radically new narrative concerning the history and destiny of the human race
