Tales Linda Goddard, 2019-09-03 An original study of Gauguin's writings unfolding their central role in his artistic practice and negotiation of colonial identity As a French artist who lived in Polynesia Paul Gauguin 1848-1903 occupies a crucial position in histories of European primitivism This is the first book devoted to his wide ranging literary output which included journalism travel writing art criticism and essays on aesthetics religion and politics It analyzes his original manuscripts some of which are richly illustrated reinstating them as an integral component of his art The seemingly haphazard collage like structure of Gauguin's manuscripts enabled him to evoke the primitive culture that he celebrated while rejecting the style of establishment critics Gauguin's writing was also a strategy for articulating a position on the margins of both the colonial and the indigenous communities in Polynesia he sought to protect Polynesian society from civilization but remained implicated in the imperialist culture that he denounced This critical analysis of his writings significantly enriches our understanding of the complexities of artistic encounters in the French colonial context Publisher's description

Women, Equality, and the French Revolution Candice E. Proctor, 1990-10-24 This volume represents the first book length study of attitudes toward women in revolutionary France Based on extensive research in the libraries and archives of Paris the book examines the impact of the Revolution's ideology of liberty and equality When the men of 1789 wrote the Declaration of the Rights of Man they were thinking in terms of man the male not man the species But there were some men and women who interpreted it in terms of all humanity The outrage of these individuals over what they perceived as a discrepancy between the principles and the practice of the Revolution motivated them to produce some of the most

unhesitating declarations of sexual equality that had ever been seen in history Dr Proctor demonstrates however these claims of equality were not simply ignored they were categorically rejected by the mainstream revolutionaries The book examines the typical 18th century concept of women as alien and in some ways inferior beings and traces the striking continuity between pre Revolutionary and Revolutionary thought on the subject Against this background Proctor addresses a number of important questions How widespread was the support for a movement in favor of sexual equality What was the response of the Revolution itself to demands for equal rights for women How did the men of the French Revolution justify the contradiction between their suppression of women and the ideologies for which they claimed to be fighting To arrive at the answers an abundance of material produced in France in the 18th century is identified and analyzed and cited in an extensive bibliography of original sources What finally emerges is not only a clearer picture of the French Revolution and its attitude toward women but a deeper understanding of the ambivalent attitudes toward women that still affect our society today This book will be an important resource for courses in European history the French Revolution and women s studies as well as a valuable reference for college university and public libraries
