Todas las flores de cacto Miguel Nossar Serpa, 1983 **Cactáceas de Costa Rica** Marta Rivas Rossi, 1998 **Cactus y otras suculentas en Cuba** Luis Rodríguez González, Raimundo R. Apezteguía Caro, 1985 Martín Cárdenas, el eximio botánico y naturalista de América Rodríguez R. Rodríguez, 2005 *Columnar Cacti and Their Mutualists* Theodore H. Fleming, Alfonso Valiente-Banuet, 2021-11-30 Although cacti such as the saguaro and organ pipe have come to define the Sonoran Desert for many people they represent some 170 species of columnar cacti found in many parts of the Americas These giant plants are so dominant in some ecosystems that many species of animals rely on them for food and shelter They are pollinated by bats in central Mexico and Venezuela by birds and bees in northern Mexico and Peru This book summarizes our current knowledge about the ecology evolution and conservation of columnar cacti and their vertebrate mutualists to show that the very survival of these cacti depends on animals who pollinate them and disperse their seeds Contributors from the United States Mexico Venezuela and Colombia explore aspects of geology and evolution that have forged this relationship review findings in anatomy and physiology and discuss recent research in population and community ecology as well as conservation issues Ranging from the Sonoran Desert to the northern Andes these studies reflect recent progress in understanding how abiotic and biotic factors interact to influence the evolution distribution and abundance of cacti and mutualists alike In addition this book examines the ways in which humans through the process of domestication have modified these plants for economic benefit The contributors also review phylogenetic relationships between cacti and nectar feeding bats in an effort to

understand how bat plant interactions have influenced the evolution of diversity and ecological specialization of both. Because of the number of migratory pollinators feeding on columnar cacti, the authors make conservation recommendations aimed at preserving fully functional ecosystems in arid portions of the New World tropics and subtropics. No other book treats the pollination ecology of cacti in such depth or offers such a wealth of up to date material on the nectar feeding bats of the New World. As scientists become increasingly concerned with the need to protect biotic interactions, *Columnar Cacti and Their Mutualists* provides a benchmark for both conservation efforts and future research.

La casa entre los cactus Paul Pen, 2017-06-08. El autor español de éxito internacional Paul Pen regresa con un inquietante thriller psicológico. Elmer y Rose han creado una familia perfecta entre los enormes cactus de un remoto paisaje desértico: un hogar lleno de amor para sus cinco hijas, todas con nombres de flor: Edelweiss, Iris, Melissa, Dahlia y Daisy. Pero la inesperada llegada de Rick, un excursionista en busca de refugio, revoluciona a las hermanas. Y cuando Elmer y Rose descubren que el muchacho no es quien dice ser, el enfrentamiento que librarán es una lucha entre la verdad y la mentira, la justicia y el crimen, destapar terribles secretos que cambiarán para siempre la vida de todos ellos.
