Entrepreneurial Wage Dynamics In The Knowledge Economy:

Entrepreneurial Wage Dynamics in the Knowledge Economy Adam K. Korobow, 2012-12-06 The role that small firms and entrepreneurship play in economic development has been particularly contentious Joseph Schumpeter 1911 in his early work argued that through a process of creative destruction small and new firms would serve as agents of change and a catalyst for innovation and growth But he later rescinded this view instead concluding that large corporations were the engines of growth Just as it seemed that a consensus had emerged among scholars and policy makers that small business was at best superfluous and at worst a drag on growth and economic development David Birch provided evidence that in fact small firms were the engines of job creation The early skepticism of challenge to Birch s findings revolved around methodology and measurement However a wave of subsequent studies by different authors spanning different time periods sectors and even countries generally confirmed Birch s original findings for most developed countries and in most time periods small business has provided most of the job creation

Entrepreneurship and Dynamics in the Knowledge Economy Charlie Karlsson, Börje Johansson, Roger Stough, 2006-09-27 In this book the authors argue that there are analytically distinct forms of entrepreneurship They provide a contemporary overview of current research and summarize the policy conclusions that can be drawn

The Geography of Small Firm Innovation Grant Black, 2006-03-30 It has long been recognized that advances in science contribute to economic growth While it is one thing to argue that such a relationship exists it is quite another to establish the extent to which knowledge spills over within and between sectors of the economy Such a research agenda faces numerous challenges Not only must one seek measures of inputs but a measure of output is needed as well to estimate the knowledge production function The identification of such a measure was a compelling goal for Zvi Griliches if not the holy grail The dream of getting hold of an output indicator of inventive activity is one of the strong motivating forces for economic research in this area Griliches 1990 p 1669 Jaffe 1989 made a significant contribution to estimating the knowledge production function when he established a relationship between patent activity and R D activity at the state level Feldman and coauthors 1994a 1994b added considerably to this line of research focusing on innovation counts as the dependent variable instead of patent counts This work was particularly important given that many innovations are never patented Feldman s work also differentiated by firm size and showed that knowledge spillovers from universities play a key role as sources of knowledge for small firms

American Book Publishing Record, 2003 *Knowledge Intensive Entrepreneurship* Frederic Delmar, Karl Wennberg, 2010-01-01 How and

why are firms created expanded and terminated by entrepreneurs in the knowledge intensive economy The authors show these entrepreneurship processes are firmly embedded in a given social and economic context that shapes the process by which some individuals discover entrepreneurial opportunities creating new firms that sometimes grow to remarkable size but more often stay mundane or eventually exit The authors expertly provide a theoretical and empirical examination of new knowledge intensive firms over their whole life cycle using a unique set of matched employee employer data containing over three million individuals and over 200 000 firms With theoretical pillars anchored in industrial organization economics evolutionary organization theory and entrepreneurship research this book presents a detailed investigation of the entrepreneurial processes of firm entry growth and their eventual demise This insightful book will prove to be invaluable for business policymakers as well as postgraduate students and researchers in management economics and entrepreneurship
