**A Brief History of Entrepreneurship** Joe Carlen, 2016-10-11 A Brief History of Entrepreneurship charts how the pursuit of profit by private individuals has been a prime mover in revolutionizing civilization. Entrepreneurs often butt up against processes, technologies, social conventions, and even laws. So they circumvent, innovate, and violate to obtain what they want. This creative destruction has brought about overland and overseas trade, colonization, and a host of revolutionary technologies, from caffeinated beverages to the personal computer, that have transformed society. Consulting rich archival sources, including some that have never before been translated, Carlen maps the course of human history through nine episodes when entrepreneurship reshaped our world. Highlighting the most colorful characters of each era, he discusses Mesopotamian merchants, creation of the urban market economy, Phoenician merchant sailors, intercontinental trade which came to connect Africa, Asia, and Europe, Chinese tea traders, invention of paper money, the colonization of the Americas, and the current flattening of the world's economic playing field. Yet the pursuit of profit hasn't always moved us forward. From slavery to organized crime, Carlen explores how entrepreneurship can sometimes work at the expense of others. He also discusses the new entrepreneurs who, through the nascent space tourism industry, are leading humanity to a multiplanetary future. By exploring all sides of this legacy, Carlen brings much needed detail to the role of entrepreneurship in revolutionizing civilization.

**The Search for Social Entrepreneurship** Paul C. Light, 2009-10-30 Research on social entrepreneurship is finally catching up to its rapidly growing potential In **The Search for Social Entrepreneurship** Paul Light explores this surge of interest to establish the state of knowledge on this growing phenomenon and suggest directions for future research Light begins by outlining the debate on how to define social entrepreneurship a concept often cited and lauded but not necessarily understood A very elemental definition would note that it involves individuals groups networks or organizations seeking sustainable change via new ideas on how governments nonprofits and businesses can address significant social problems That leaves plenty of gaps however and without adequate agreement on what the term means we cannot measure it effectively The unsatisfying results are apple to orange comparisons that make replication and further research difficult The subsequent section examines the four main components of social entrepreneurship ideas opportunities organizations and the entrepreneurs themselves The copious information available about each has yet to be mined for lessons on making social entrepreneurship a success The third section draws on Light's original survey research on 131 high performing nonprofits exploring how they differ across the four key components The fourth and final section offers recommendations for future action and research in this burgeoning field
