**Entrepreneurship Education and Training** Jose C. Sanchez-Garcia, 2015 Entrepreneurship has a tremendous impact

on the economic development of a country so much that entrepreneurship is seen as a solution for the fast changing economic demands worldwide and has been recognized as a path to sustainable economic development. Despite recognition of entrepreneurship on the road to global economic development, a large body of research on the elements of entrepreneurship education remains unresolved. Are these behaviors inherent to human beings: their genetic code, their psychological traits, or can students, young children, and even adults be taught how to become an entrepreneur? This book presents several chapters following different approaches to answer these questions. Researchers explore education programs in different countries; they show experiences in entrepreneurship education, explain how to teach entrepreneurial skills, cultural issues, and propose some orientations and reflections on entrepreneurship education.

Global Considerations in Entrepreneurship Education and Training Carvalho, Luísa Cagica, Daniel, Ana Dias, 2019-03-29 Entrepreneurship education has gained considerable interest in the last decade both in the political and academic arenas because it fosters innovation and plays a crucial role in developing the business landscape. However, instructors are faced with challenges related to creating successful learning objectives, suitable methodologies, and measuring the impact of these programs. *Entrepreneurship Education* Sukanlaya Sawang, 2020-06-26 This book explores how entrepreneurship education can be embedded throughout the learner's lifetime. To date, entrepreneurship education has tended to begin on an ad hoc basis at the higher education level; some institutions offer it as an elective or compulsory course, while others offer it as a degree program. In most countries, entrepreneurship has not yet been widely adopted in the core curriculum, and formal entrepreneurship education is almost exclusively offered to young learners. In addition to presenting critical views on who can benefit from entrepreneurship education, including children, schoolchildren, students in higher education, and older people, the book proposes a model of holistic entrepreneurship education to promote a lifelong learning journey for educators and learners alike.

the nascent stage of their careers Publishing from Your PhD precisely focuses on providing early career researchers with emotional and collegial support that is often not available in academe It seeks to dispel nepotistic notions of superiority that places Professors and such on a pedestal It specifically clarifies the difficulty in having written the PhD thesis and then rewriting it to suit the genre of journal articles It does not deal with the how of academic writing in general This book endeavours to shed light on the path one must take to navigate the jungles of academia This is an untrodden path which is unique to every researcher especially those who employ abstract or critical theories in their research and each journey through the jungle is different However because there is little literature about this embryonic journey this book illuminates the processes and difficulties of publishing in journals and culling one's finely honed thesis into small chunks a difficult task to which few admit
