Environment A Revolution In Attitudes Information Plus Reference Series:

The Environment Kim Masters Evans, 2010-04-09 The Information Plus Reference Series provides statistical data on 32 of today's most controversial and most studied social issues. Each Information Plus title is a compilation of current and historical statistics with analysis on aspects of one contemporary social issue such as abortion, capital punishment, and genetic engineering. Each title is divided into chapters that are devoted to a particular topic. The text provides a clear and comprehensive summary of up-to-date research on the topic and is interspersed with the statistical tables, charts, and graphs. Each table is directly referred to and carefully explained in the text. **The Environment** Kimberly Masters Evans, Information Plus, 2002-11

The Environment Kim Masters Evans, 2012 Preface Environment a revolution in attitudes is part of the Information Plus Reference Series. The purpose of each volume of the series is to present the latest facts on a topic of pressing concern in modern American life. These topics include the most controversial and studied social issues of the 21st century. Ecological Sustainability and Integrity: Concepts and Approaches J. Lemons, L. Westra, Robert Goodland, 2013-04-17 This book follows upon earlier work which culminated in the publication of two recent books: Sustainable Development Science Ethics and Public Policy (John Lemons and Donald A. Brown, editors) and Perspectives on Ecological Integrity (Laura Westra and John Lemons, editors). Both of these books also were published by Kluwer Academic Publishers. In this book we seek to explore more fully the concepts of sustainability and ecological integrity as well as the connections between them. We have divided chapters into three groups. In the first, the concept of sustainability in relation to science, law, and ethics is explored. In the second, concepts of sustainability and ecological integrity are applied to problems in specific natural resources. Finally, in the third group, we examine possible approaches to public policy which might include concepts of sustainability and ecological integrity. Overall, we believe that this collection presents a wide variety of perspectives, discussions, and case studies. John Lemons, Laura Westra, Robert Goodland, Editors. ix CONTENTS PART I
