Geography in America at the Dawn of the 21st Century Gary L. Gaile,Cort J. Willmott,2005 Geography in America at the Dawn of the 21st Century surveys American geographers current research in their specialty areas and tracks trends and innovations in the many subfields of geography As such it is both a state of the discipline assessment and a topical reference It includes an introduction by the editors and 47 chapters each on a specific specialty The authors of each chapter were chosen by their specialty group of the American Association of Geographers AAG Based on a process of review and revision the chapters in this volume have become truly representative of the recent scholarship of American geographers While it focuses on work since 1990 it additionally includes related prior work and work by non American geographers The initial Geography in America was published in 1989 and has become a benchmark reference of American geographical research during the 1980s This latest volume is completely new and features a preface written by the eminent geographer Gilbert White

Psychological Theories for Environmental Issues Mirilia Bonnes,2017-03-02 Environmental psychology is an increasingly important area of research

focusing on the individual and social factors responsible for many critical human responses to the physical environment With such rapid and widespread growth the main theoretical strands have often been left unclear and their scientific and practical implications have been underdeveloped This essential and stimulating book contextualizes and critically analyzes the main theoretical ideas It compares the different theories assessing each one s possibilities and limitations and demonstrates how each approach has been used for the development of knowledge of environmental psychology The research area infiltrates a broad selection of disciplines including psychology architecture planning geography sociology environmental issues economics and law It also offers significant contributions to a wide range of policy evaluations It will prove invaluable to academics and practitioners from across these disciplines above all those in planning environmental studies human geography and psychology

Behavior and Environment T. Garling,R.G. Golledge,1993-01-28 Active researchers in the areas of geography and psychology have contributed to this book Both fields are capable of increasing our scientific knowledge of how human behavior is interfaced with the molar physical environment Such knowledge is essential for the solution of many of today s most urgent environmental problems Failure to constrain use of scarce resources pollution due to human activities creation of technological hazards and deteriorating urban quality due to vandalism and crime are all well known examples The influence of psychology in geographical research has long been appreciated but it is only recently that psychologists have recognized they have something to learn from geography In identifying the importance of two way interdisciplinary communication a psychologist and a geographer have been invited to each write a chapter in this book on a designated topic so that close comparisons can be drawn as to how the two disciplines approach the same difficulties Since the disciplines are to some extent complementary it is hoped that this close collaboration will have synergistic effects on the attempts of both to find solutions to environmental problems through an increased understanding of the many behavior environment interfaces
