## **Environment And Christian Ethics:**

**The Environment and Christian Ethics** Michael S. Northcott, 1996-09-28 This book is about the extent origins and causes of the environmental crisis Dr Northcott argues that Christianity has lost the biblical awareness of the interconnectedness of all life He shows how Christian theologians and believers might recover a more ecologically friendly belief system and life style The author provides an important corrective to secular approaches to environmental ethics including utilitarian individualism animal rights theories and deep ecology

**Ecologies of Grace** Willis Jenkins, 2013-02-12 Christianity struggles to show how living on earth matters for living with God While people of faith increasingly seek practical ways to respond to the environmental crisis theology has had difficulty contextualizing the crisis and interpreting the responses In *Ecologies of Grace* Willis Jenkins presents a field shaping introduction to Christian environmental ethics that offers resources for renewing theology Observing how religious environmental practices often draw on concepts of grace Jenkins maps the way Christian environmental strategies draw from traditions of salvation as they engage the problems of environmental ethics He then uses this new map to explore afresh the ecological dimensions of Christian theology Jenkins first shows how Christian ethics uniquely frames environmental issues and then how those approaches both challenge and reinhabit theological traditions He identifies three major strategies for making environmental problems intelligible to Christian moral experience Each one draws on a distinct pattern of grace as it adapts a secular approach to environmental ethics The strategies of ecojustice stewardship and ecological spirituality make environments matter for Christian experience by drawing on patterns of sanctification redemption and deification He then confronts the problems of each of these strategies through critical reappraisals of Thomas Aquinas Karl Barth and Sergei Bulgakov Each represents a soteriological tradition which Jenkins explores as an ecology of grace letting environmental questions guide investigation into how nature becomes significant for Christian experience By being particularly sensitive to the ways in which environmental problems are made intelligible to Christian moral experience Jenkins guides his readers toward a fuller understanding of Christianity and ecology He not only makes sense of the variety of Christian environmental ethics but by showing how environmental issues come to the heart of Christian experience prepares fertile ground for theological renewal

**This Is My Father's World** Gale Heide, 2008-04-01 This Is My Father's World critically engages contemporary environmental ethics and provides Christians with a theological foundation for appropriately relating to the world they call God's creation a creation ethic It is refreshingly and thoroughly scriptural However what the Bible says may shock people with conservative or liberal presuppositions already in mind This book is a challenge to both sides of the debate

**Diversity and Dominion** Kyle Schuyler Van Houtan, Michael S. Northcott, 2010 Description This book records a set of dialogues between scientists theologians and philosophers on what can be done to prevent a global slide into ecological collapse It is a uniquely multidisciplinary book that exemplifies the kinds of cultural and scholarly dialogue urgently needed to address the threat to

the earth represented by our super industrial civilization The authors debate the conventional account of nature conservation as protection from human activity In contrast to standard accounts they argue what is needed is a new relationship between human beings and the earth that recovers a primal respect for all things This approach seeks to recover forgotten resources in ancient cultures and in the foundational narratives of Western civilization contained in the Bible and in the culture of classical Greece Endorsements A refreshing critique of both evangelical and liberal North American environmental discourse a bold exercise in multi disciplinary conversation and a welcome retrieval of the virtues of creaturely humility and gratitude Ernst M Conradie University of the Western Cape South Africa This wonderfully rich book is a model of deep conversation on crucial challenges we face The most important issues are intrinsically interdisciplinary yet we often settle for talking at or to one another This is especially true among the environmental and religious communities The conversations in this book show that deep interdisciplinary engagements offer opportunities to re frame the questions and re describe the challenges in more promising and life giving ways transforming participants and the issues alike A terrific achievement L Gregory Jones Duke University Underlying the environmental movement are a set of mostly undiscussed ethical and theological assumptions about the nature of the world and our relationship to it In this pioneering volume scholars from various perspectives engage in a deep exploration of the relationship of ecology theology and ethics The results are often illuminating sometimes surprising and uniformly worth engaging Paul Root Wolpe Emory University Van Houtan and Northcott engage scientists ethicists theologians and other thinking persons in dialogue working to re ligate the torn academic and social fabric and bringing all to see and respond to the biosphere the awesome creation that calls for our guardianship and respectful service They have us join this dialogue motivating us gardeners all toward nurturing the kind of wisdom and humility that brings good news to every creature Calvin DeWitt University of Wisconsin About the Contributor s Kyle S Van Houtan is a Post Doctoral Fellow in the Program in Science and Society and a Research Fellow in the Center for Ethics at Emory University He has served as a biologist with the Smithsonian Institution and the U S Geological Service Michael S Northcott is Professor of Ethics in the School of Divinity in the University of Edinburgh Scotland He is the author of *The Environment and Christian Ethics* 1996

**Earthkeeping and Character** Steven Bouma-Prediger, 2019-11-19 Addressing a topic of growing and vital concern this book asks us to reconsider how we think about the natural world and our place in it Steven Bouma Prediger brings ecotheology into conversation with the emerging field of environmental virtue ethics exploring the character traits and virtues required for Christians to be responsible keepers of the earth and to flourish in the challenging decades to come He shows how virtue ethics can enrich Christian environmentalism helping readers think and act in ways that rightly value creation

*Sacramental Commons* John Hart, 2006-07-27 The increasing awareness of environmental issues as ultimately moral issues has led to the intersection of religion and environment *Sacramental Commons* presents a unique way of looking at this topic by relating the Christian word sacrament signs of divine presence to the term commons shared place and shared

goods among people and between people and the natural world suggesting that local natural settings and local communities can be a source for respect and compassion Sacramental Commons uses Earth oriented biblical teachings and ideas from such thinkers as Hildegard St Francis John Muir and Black Elk to provide insights about divine immanence in creation human commitments to creation and human accountability to the Spirit Earth and biotic community It extends the concept of natural rights beyond humans to include all nature and affirms intrinsic value in ecosystems in whole and in part Sacramental Commons declares that the Earth commons and its goods should be shared equitably by human communities and individuals living in interdependent relationships with other members of the community of life It suggests essential values that will stimulate care for the commons and embodies them in principles of an innovative Christian Ecological Ethics

**Christianity and Ecology** Dieter T. Hessel, Rosemary Radford Ruether, 2000 What can Christianity as a tradition contribute to the struggle to secure the future well being of the earth community This collaborative volume the third in the series on religions of the world and the environment announces that an ecological reformation an eco justice reorientation of Christian theology and ethics is prominent on the ecumenical agenda The authors explore problematic themes that contribute to ecological neglect or abuse and offer constructive insight into and responsive imperatives for ecologically just and socially responsible living

The Gardeners' Dirty Hands Noah J. Toly, 2019-05-21 The past three centuries have witnessed the accumulation of unprecedented levels of wealth and the production of unprecedented risks These risks include the declining integrity and stability of many of the world's environments which face dramatic and possibly irreversible change as the environmental burdens of late modern lifestyles increasingly shift to fragile ecosystems vulnerable communities and future generations Globalization has increased the scope and scale of these risks as well as the pace of their emergence It has also made possible global environmental governance attempts to manage risk by unprecedented numbers and types of authoritative agents including state and non state actors at the local national regional and global levels In The Gardeners Dirty Hands Environmental Politics and Christian Ethics Noah Toly offers an interpretation of environmental governance that draws upon insights into the tragic the need to forego give up undermine or destroy one or more goods in order to possess or secure one or more other goods Toly engages Christian and classical Greek ideas of the tragic to illuminate the enduring challenges of environmental politics He suggests that Christians have unique resources for responsible engagement with global environmental politics while acknowledging the need for mutually agreed and ultimately normative restraints

Doctrine in Shades of Green Andrew J. Spencer, 2022-01-13 How we come to our conclusions about ethical issues matters as much as the specific policies or practices we commend This book argues that four key doctrines form a theological perspective for environmental ethics They are the key ideas upon which people build their ethics of the environment By looking at the doctrines of revelation creation anthropology and eschatology we can find points of contact to work together more effectively for the common good and have more meaningful debates when our positions differ This book

uses examples from four different theological positions ecotheology theological liberalism fundamentalism and evangelicalism to show that a creation positive ethic is possible from all of these positions and it explores why people who stand within various theological streams may engage in environmental issues in diverse ways Environment, Economy, and Christian Ethics Alistair Young, 2015-01-01 What is to be done about the damaging impact of economic activity on the environment In recent years there has been growing debate over this question This book by an economist urges Christians to support strong governmental and intergovernmental action to improve the workings of existing global economic systems so as to provide adequate environmental protection As such it draws on the tradition of mainstream environmental economics and on recent developments in ecological economics But it acknowledges that environmental policy raises important ethical and theological issues often briefly or inadequately covered within economic literature ethically responsible attitudes to uncertainty inequality within and between generations the rights of traditional communities and the obligation to respect nonhuman elements within creation This book tries to develop sound ethical foundations for environmental policy while providing concrete perspective on economic realities **The Future of Ethics** Willis Jenkins, 2013-10-28 The Future of Ethics interprets the big questions of sustainability and social justice through the practical problems arising from humanity's increasing power over basic systems of life What does climate change mean for our obligations to future generations How can the sciences work with pluralist cultures in ways that will help societies learn from ecological change Traditional religious ethics examines texts and traditions and highlights principles and virtuous behaviors that can apply to particular issues Willis Jenkins develops lines of practical inquiry through prophetic pragmatism an approach to ethics that begins with concrete problems and adapts to changing circumstances This brand of pragmatism takes its cues from liberationist theology with its emphasis on how individuals and communities actually cope with overwhelming problems Can religious communities make a difference when dealing with these issues By integrating environmental sciences and theological ethics into problem based engagements with philosophy economics and other disciplines Jenkins illustrates the wide understanding and moral creativity needed to live well in the new conditions of human power He shows the significance of religious thought to the development of interdisciplinary responses to sustainability issues and how this calls for a new style of religious ethics

**An Introduction to Christian Environmentalism** Associate Professor and Chair Kathryn D Blanchard, Associate Professor of Christian Ethics Kevin J O'Brien, 2020-11-15 Christians share a common concern for the earth Evangelicals emphasize creation care mainline Protestants embrace the green movement the Catholic Church lists 10 deadly environmental sins and the Eastern Orthodox Patriarch has declared climate change an urgent issue of social and economic justice This textbook examines seven contemporary environmental challenges through the lens of classical Christian virtues Authors Kathryn Blanchard and Kevin O'Brien use these classical Christian virtues to seek a golden mean between extreme positions by pairing each virtue with a pernicious environmental problem Students are thus led past political pitfalls and

encouraged to care for other creatures prudently to develop new energy sources courageously to choose our food temperately to manage toxic pollution justly to respond to climate change faithfully to consider humanity's future hopefully and to engage lovingly in advocacy for God's earth Readers will emerge from this text with a deeper understanding of contemporary environmental problems and the fundamentals of Christian virtue ethics

**Sacramental Commons** John Mason Hart, Leonardo Boff, Thomas Berry, 2006-07-27 The increasing awareness of environmental issues as ultimately moral issues has led to the intersection of religion and environment Sacramental Commons presents a unique way of looking at this topic by relating the Christian word sacrament signs of divine presence to the term commons shared place and shared goods among people and between people and the natural world suggesting that local natural settings and local communities can be a source for respect and compassion Sacramental Commons uses Earth oriented biblical teachings and ideas from such thinkers as Hildegard St Francis John Muir and Black Elk to provide insights about divine immanence in creation human commitments to creation and human accountability to the Spirit Earth and biotic community It extends the concept of natural rights beyond humans to include all nature and affirms intrinsic value in ecosystems in whole and in part Sacramental Commons declares that the Earth commons and its goods should be shared equitably by human communities and individuals living in interdependent relationships with other members of the community of life It suggests essential values that will stimulate care for the commons and embodies them in principles of an innovative Christian Ecological Ethics

*Christian Environmental Ethics* James B. Martin-Schramm, Robert L. Stivers, 2003

**Christians, the Care of Creation, and Global Climate Change** Lindy Scott, 2008-03-01 Christians the Care of Creation and Global Climate Change is a wake up call for Christians and others It is a cogent and persuasive call to love God and our neighbors by caring for creation especially in light of the dramatic climate changes occurring before our eyes This book is not the final word on the subject but it is a sincere invitation to examine the scientific evidence for global warming and to respond with individual and collective faithful actions

**For the Beauty of the Earth ()** Steven Bouma-Prediger, 2001-10-01 Caring for the environment is a growing interest among evangelicals This award winning book provides the most thorough evangelical treatment available on a theology of creation care Authentic Christian faith requires ecological obedience writes Steven Bouma Prediger He urges Christians to acknowledge their responsibility and privilege as stewards of the earth The second edition has been substantially revised and updated with the latest scientific and environmental research

*Gratitude for the Wild* Nathaniel Van Yperen, 2019-06-17 Since the passage of the Wilderness Act of 1964 a hotly contested debate over the value of wilderness reveals cultural anxieties about an American society that has spurned limits Gratitude for the Wild explores how the wild known in wilderness raises our tolerance for mystery in the recognition of our limits and in the celebration of a God loved world that exceeds our grasping The idea of wilderness

introduces questions about the balance between utility and appreciation and between enjoyment and restraint Wilderness is a nexus of competing and contested accounts of responsibility In conversation with the work of Doug Peacock Terry Tempest Williams James Gustafson and Martin Luther King Jr Nathaniel Van Yperen offers an original argument for how wilderness can evoke a vision of a good life in which creaturely limits are accepted in gratitude even in the face of ambiguity and mystery Through the theme of gratitude the book refocuses attention on the role of affection and testimony in ecological ethics and Christian ethics

**Christian Ethics of Creation** Michael Rosenberger, 2022-11-04 Wenn die gewaltigen kologischen Herausforderungen der Gegenwart bew ltigt werden sollen braucht es klare ethische Orientierungen und tiefe Quellen innerer Kraft Der Autor reflektiert die Potenziale der christlichen Tradition f r eine Ethik und Spiritualit t der Sch pfung Daf r greift er auf biblische und liturgische Impulse ebenso zur ck wie auf die Enzyklika Laudato si von Papst Franziskus und setzt sie mit naturwissenschaftlichen soziologischen und konomischen berlegungen in Beziehung Auf dieser Grundlage entwickelt es eine Handlungs und Hoffnungsperspektive die durch Schwierigkeiten und Entt uschungen hindurch tragf hig ist
