Environment and Our Global Community Susan Shapiro, 2005 *Our Global Environment* Anne Nadakavukaren, Jack Caravanos, 2020-01-23

The eighth edition features a new chapter on climate change and the public health impacts of global warming incorporating the latest assessments of the Intergovernmental Panel on Climate Change with regard to the physical science basis mitigation efforts and adaptation strategies. Extensive revisions and updates throughout the volume reflect current topics of concern including the magnitude of global hunger and malnutrition outbreaks of the Zika virus vaping and the incidence of serious lung injury MTBE contamination of groundwater recycling of lead acid batteries in developing countries mercury exposure among artisanal gold miners and lead contaminated drinking water in Flint Michigan and other communities. A Global Environmental Right Stephen Turner, 2013-09-11

The development of an international substantive environmental right on a global level has long been a contested issue. To a limited extent environmental rights have developed in a fragmented way through different legal regimes. This book examines the potential for the development of a global environmental right that would create legal duties for all types of decision makers and provide the bedrock for a new system of international environmental governance. Taking a problem solving approach the book seeks to demonstrate how straightforward and logical changes to the existing global legal architecture would address some of the fundamental root causes of environmental degradation. It puts forward a draft global environmental right that would integrate duties for both state and non state actors within reformed systems of environmental governance and a rational framework for business and industry to adhere to in order that those systems could be made operational. It also examines the failures of the existing international climate change regime and explains how the draft global environmental right could remedy existing deficits. This innovative and interdisciplinary book will be of great interest to policy makers students and researchers in international environmental law climate change environmental politics and global environmental governance as well as those studying the WTO international trade law human rights law constitutional law and corporate law.

Many of the concepts values and basic assumptions on which modern economic and business theory is based do not translate into or convey the same meaning in non European languages or non Western cultures as they do in Western societies. This results in

a mismatch between what Many of the concepts values and basic assumptions on which modern economic and business theory is based do not translate into or convey the same meaning in non European languages or non Western cultures as they do in Western societies This results in a mismatch between what have now become global economic values and local cultural ones Kensei Hiwaki considers a new paradigm that a sound culture is needed to underpin development employment and trade and an optimal development path This concept is discussed against the background of the author s contention that his own Japanese society has succumbed to unsustainable modern tendencies leading to the antithesis of sustainable development and placing the society and economy in a credibility trap into which it is predicted other countries like China might also fall Professor Hiwaki presents a detailed theoretical framework for balanced socioeconomic development relevant to sustainable development of the global community explaining the pivotal concepts on which it is based as well as the institutional and practical implications of adopting the paradigm including new approaches to taxation employment trade multi media communications and global governance Culture and Economics in the Global Community is a challenging but ultimately hopeful book that introduces new perspectives for leaders in the political arena in business in development agencies and to researchers and others with a professional or academic interest in economics trade governance and environmental issues social policy or cultural anthropology

Gender and the Environment Nicole Detraz, 2017-05-23 Climate change natural disasters and loss of biodiversity are all considered major environmental concerns for the international community both now and into the future Each are damaging to the earth but they also negatively impact human lives especially those of women Despite these important links to date very little consideration has been given to the role of gender in global environmental politics and policy making This timely and insightful book explains why gender matters to the environment In it Nicole Detraz examines contemporary debates around population consumption and security to show how gender can help us to better understand environmental issues and to develop policies to tackle them effectively and justly Our society often has different expectations of men and women and these expectations influence the realm of environmental politics Drawing on examples of various environmental concerns from countries around the world Gender and the Environment makes the case that it is only by adopting a more inclusive focus that embraces the complex ways men and women interact with ecosystems that we can move towards enhanced sustainability and greater environmental justice on a global scale This much needed book is an invaluable guide for those interested in environmental politics and gender studies

Congress. Senate. Commerce,1971 International Environmental Law, Policy, and Ethics Alexander Gillespie,2014-08-21 This second edition of International Environmental Law Policy and Ethics revises and expands this groundbreaking study into the question of why the environment is protected in the international arena This question is rarely asked because it is assumed that each member of the international community wants to achieve the same ends However in his innovative study of international environmental ethics Alexander Gillespie explodes this myth He shows how nations like individuals create environmental laws and policies which are continually inviting failure as such laws can often be riddled with inconsistencies and be ultimately contradictory in purpose Specifically he seeks a nexus between the reasons why nations protect the environment how these reasons are reflected in law and policy and what complications arise from these choices This book takes account of the numerous developments in international environmental law and policy that have taken place the publication of the first edition most notably at the 2002 World Summit on Sustainable Development and the 2012 Rio 20 United Nations Conference on Sustainable Development Furthermore it addresses recent debates on the economic value of nature and the problems of the illegal trade in species and toxic waste The cultural context has also been considerably advanced in the areas of both intangible and tangible heritage with increasing attention being given to conservation wildlife management and the notion of protected areas The book investigates the ways in which progress has been made regarding humane trapping and killing of animals and how in contrast the Great Apes initiative and similar work with whales have failed Finally the book addresses the fact that while the notion of ecosystem management has been embraced by a number of environmental regimes it has thus far failed as an international philosophy **Foundation Concepts of Global Community Health Promotion and Education** Barbara Hernandez,2011-08-24 Foundation Concepts of Global Community Health Promotion and Education examines the underlying concepts appropriate in any global community health promotion and education course It investigates the history terminology philosophy theory ethics programs resources and settings for the practice of community health education and promotion The roles and responsibilities of health promotion practitioners are also explored in detail as are the many employment opportunities for health education and health promotion professionals *25th Anniversary of the United Nations* United States.
