

What is Environmental Dispute Resolution (EDR)?

- EDR is the shift we are seeing in natural resource management decision making processes away from command and control methods to a less authoritarian form of conflict resolution
- Unlike traditional methods that often end in litigation in which a judge or jury makes the final decision EDR techniques use various forms of assisted negotiation to help parties reach a mutually satisfactory agreement on their own terms
- With the exception of binding arbitration all EDR processes are based on the idea of negotiation that allows for a give-and-take among disputants who want to find a solution to a common problem
