Recent Studies in Geophysical Hazards Mohammed I. El-Sabh, Tad S. Murty, Srinivasan Venkatesh, F. Siccardi, K. Andah, 2012-12-06 Over the past 20 years the costs of natural disasters have escalated significantly The lives of over 800 million people have been disrupted and the number of catastrophes has nearly quadrupled At present the increasing global threat of natural disasters in spite of our increased knowledge is ominous With the growth in world population the increasing of resources in newly developing areas and the increasing cost and sophistication of engineering structures and technical installations there is an urgent need to seek to understand the potential threats posed by natural hazards and to ascertain the best ways of mitigating their damaging effects To meet this urgent threat the United Nations UN General Assembly in December 22 1989 passed a Resolution which declared the 1990s to be the International Decade for Natural Disaster Reduction IDNDR As a contribution to the decade the International Symposium Hazards 91 was held in Perugia Italy during 4 9 August 1991 The conference was attended by specialists from 34 countries and a total of 110 papers were presented at 20 sessions covering a very broad range of topics which proved to be of significant value for future research The sixteen articles included in this book provide a unique overview of the state of the science in geophysical hazards including climatic atmospheric hydrological and geological hazards Furthermore the results of a panel on the IDNDR and the recommendations adopted during the meeting are presented at the end of this volume Recent Studies in Geophysical Hazards is thus an excellent reference source for scientists engineers and policy makers

Urban Waterways. Evolving Paradigms for Hydro-based Urbanisms Nancy M. Clark, 2016-10-31 Urban Waterways Evolving Paradigms for Hydro based Urbanisms investigates the environmental cultural and economic future of cities on the water in the 21st century Collected here are urban projects across the globe from 15 cities on 5 continents representing not only the complexities of urban life in the face of environmental concerns global economic shifts waste and energy management and post industrial legacies but also new thinking and practices that are emerging from a reconsideration of the value of hydro based urbanism through a recalibration of our settlement patterns Contexts range from coastal cities to cities associated with river lake and wetlands ecologies and offer strategies from retrofitting and recovery to imagining new cities on the water Although each of these urban projects proposes site specific responses that are locally relevant and respond to the city's distinctive landscapes they are also linked through their reconceptualization of a land and water dialogue and in the manner in which they tap into the broader spectrum of what portunism that suggests alternative directions and visions for our urban futures The congress was held in Durban South Africa

Engineering Geology Perry H. Rahn,1996 For Reservoir Engineering and Engineering Geology courses Rahn s text provides a quantitative description of methods utilized in Engineering Geology It includes such recent events as the 1989 Loma Prieta earthquake as well as the 1993 Mississippi River floods Case histories and additional worked examples and problems are included to give students a more thorough and current knowledge base from which to learn the principle components of engineering geology

Urban Drought Bhaswati Ray,Rajib Shaw,2018-12-30 This book presents water insecurity issues in urban areas while developing a water security index and explores the innovative approaches to water development and management with examples from Asian cities The urban water crisis is a global phenomenon but it is more obvious in the megacities of the developing world Urban drought although not a familiar term will pose a significant threat to humankind in the near future especially in the context of increasing population in cities Many cities are already unable to provide safe clean water for their citizens Some of the world s largest cities depend heavily on groundwater for their water supply It is unlikely that dependence on aquifers which take many years to recharge will be sustainable As urban populations grow water use will need to shift from agriculture to municipal and industrial uses making decisions about allocating between different sectors difficult Inefficient water use practices by households and industries fragmented management of water between sectors and institutions climate induced water shortages environmental degradation of water sources and inadequate use of alternate sources are also issues of major concern Despite recent advances in the literature there exists a considerable gap in attempting an integrated water resource management approach Covering all aspects of urban drought and water insecurity this book is a valuable resource for students researchers academics policy makers and development practitioners

Sustainable Development in Higher Education in Europe Emilio Chiodo,2013-08-01 Higher Education Institutions among all educational structures are vested with significant responsibility in implementing the concept of Sustainable Development both to incorporate this concept within their activities teaching research operations and to widespread Sustainable Development in the society and business world The report has been elaborated within the ISLE project Innovation in the

teaching of Sustainable Development in Life Sciences in Europe an Erasmus Network composed by 39 partners from 30 European countries representing Higher Education Institutions Research institutes and Enterprises that have a focus in the life sciences The objective of the Compendium is the identification and diffusion of Good Practices concerned with Education for Sustainable Development ESD in Higher Education Institutions The topic is analysed in a broader sense on one side considering the characterisation of the political and institutional framework and on the other side describing formal and informal learning experiences in Higher Education Institutions 36 Good Practices are discussed and presented in systematic forms that have been categorized according to the following topics related to the implementation of Sustainable Development education policies institutional activities teaching and practical experiences The Good Practices represent a wide range of situations concerning different European countries institutions typologies of the initiatives geographical levels of implementation However in this diversity some characterizing aspects emerge the holistic and interdisciplinary approaches to ESD the attention in achieving tangible results the involvement of local communities and the bottom up approaches the importance of partnerships and networking the capacity building the innovation of the initiatives and the attention in building a framework favorable to Sustainable Development Aquananotechnology David E. Reisner,T.

Pradeep,2014-09-24 The world s fresh water supplies are dwindling rapidly even wastewater is now considered an asset By 2025 most of the world s population will be facing serious water stresses and shortages Aquananotechnology Global Prospects breaks new ground with its informative and innovative introduction of the application of nanotechnology to the remediation of contaminated water for drinking and industrial use It provides a comprehensive overview from a global perspective of the latest research and developments in the use of nanotechnology for water purification and desalination methods The book also covers approaches to remediation such as high surface area nanoscale media for adsorption of toxic species UV treatment of pathogens and regeneration of saturated media with applications in municipal water supplies produced water from fracking ballast water and more It also discusses membranes desalination sensing engineered polymers magnetic nanomaterials electrospun nanofibers photocatalysis endocrine disruptors and Al13 clusters It explores physics based phenomena such as subcritical water and cavitation induced sonoluminescence and fog harvesting With contributions from experts in developed and developing countries including those with severe contamination such as China India and Pakistan the book s content spans a wide range of the subject areas that fall under the aquananotechnology banner either squarely or tangentially The book strongly emphasizes sorption media with broad application to a myriad of contaminants both geogenic and anthropogenic keeping in mind that it is not enough for water to be potable it must also be palatable

Innovation, Entrepreneurship and Sustainability Norbert Grünwald,2015-06-03 The ICEBE conference in Windhoek is the sixth in a series of annual conferences on engineering and business education It is organized by the Robert Schmidt Institute University Wismar hosted by Polytechnic of Namibia and co organised by University of Applied Sciences Jena The

conferences were held in Sibiu Romania Manila Philippines Cape Town South Africa and Wismar Germany The theme of the Windhoek Conference is Innovation Entrepreneurship and Sustainability which describes the emphasis that is laid on always using these three terms in combination i e not to consider one in isolation from the others Thus the primary target of this conference is to provide the delegates with cross disciplinary thinking related to the three main streams in engineering and business education

Methods and Approaches in Metropolitan Pollution Research Hui Zhang,2025-01-16 This book focuses on the behaviour and impact of environmental pollutants in metropolitan development by studying the cases of the soil water and atmosphere of both Shanghai and Nanjing which are two of the fastest economically developing areas in recent decades in China Based on samples and experiments some solutions for bottleneck problems in recent practices for urban environment research are systematically discussed proposing the following innovations 1 classifying urban pollution in a developing metropolis based on pollutant behaviour mechanisms 2 identifying the amount of trace metals added by human activities to urban soil and their geological background amount distinguishable from the total amount of detectable trace metals as a whole This book can provide a valuable guide for researchers and engineers in relevant disciplines and for environmental policymakers to consult in decision making practices for urban development and environmental protection

Comparative Perspectives on Inquiry-Based Science Education Bevins, Stuart,Lehane, Louise,Booth, Josephine,2019-03-15 The core practice of professional scientists is inquiry often referred to as research If educators are to prepare students for a role in the professional scientific and technological community exposing them to inquiry based learning is essential Despite this inquiry based teaching and learning IBTL remains relatively rare possibly due to barriers that teachers face in deploying it or to a lack of belief in the teaching community that inquiry based learning is effective Comparative Perspectives on Inquiry Based Science Education examines stories and experiences from members of an international science education project that delivered learning resources based around guided inquiry for students to a wide range of schools in 12 different countries in order to identify key themes that can provide useful insights for student learning teacher support and policy formulation at the continental level The book provides case studies across these 12 different settings that enable readers to compare and contrast both practice and policy issues with their own contexts while accessing a cutting edge model of professional development It is designed for educators instructional designers administrators principals researchers policymakers practitioners and students seeking current and relevant research on international education and education strategies for science courses Paperbound Books in Print 1995 Reed Reference
