

The background of the book cover is a photograph of a textured, light-colored surface, possibly a wall or a piece of paper, with strong, dark shadows cast across it. The shadows are irregular and elongated, suggesting a light source from the upper left. The overall tone is warm and somewhat somber.

## **Environmental Imagination:**

**The Environmental Imagination** Lawrence Buell, 1996-09-01 With Thoreau's Walden as a touchstone Buell offers an account of environmental perception the place of nature in the history of Western thought and the consequences for literary scholarship of attempting to imagine a more ecocentric way of being In doing so he provides a profound rethinking of our literary and cultural reflections on nature      The Environmental Imagination Lawrence Buell, 1995 With Thoreau's Walden as a touchstone Buell offers an account of environmental perception the place of nature in the history of Western thought and the consequences for literary scholarship of attempting to imagine a more ecocentric way of being In doing so he provides a profound rethinking of our literary and cultural reflections on nature      German Culture and the Modern Environmental Imagination Sabine Wilke, 2015-03-20 Thinking about and relating to the environment what the Germans call Umwelt i e the world that surrounds us in the way that we do today has a long tradition within modern German culture German scientists were among the many European explorers that left Europe in the late eighteenth century on voyages of discovery to then unknown parts of the world For some explorers discovery meant the fundamental confirmation of their own superiority vis vis primitive peoples and primitive natures for others it resulted in a shake up of their belief in the superiority of European civilization in the face of the achievements of other civilizations or in the face of spectacular nature scenes that outperformed the temperate European landscapes in terms of scale sublimity and grandeur The documents that contain these stories of discovery left an important impression not only on German culture but on European civilization at large defining it vis vis other civilizations and other natures Europe today is the product of these encounters including the way we conceive of our Umwelt the environment that surrounds us The story told in this book is the story of the rise of the modern German environmental imagination with particular emphasis on its narrative and visual components complementing and expanding Barbara Stafford's important work in her seminal study of the illustrated travel account from 1984 Chapters on Georg Forster Alexander von Humboldt Albert Bierstadt Leni Riefenstahl and Werner Herzog unfold the key stages in a process that constitutes the unfolding of the modern German environmental imagination      Ovid's Metamorphoses and the Environmental Imagination Giulia Sissa, Francesca Martelli, 2023-07-27 This book positions Ovid's Metamorphoses as a foundational text in the western history of environmental thought The poem is about new bodies Stones springs plants and animals materialize out of human origins to create a world of hybrid objects which retain varying degrees of human subjectivity while taking on new physical form In bending the boundaries of known categories of being these hybrid entities reveal both the porousness of human and other agencies as well as the dangers released by their fusion Metamorphosis unsettles the category of the human within the complex ecologies that make up the world as we know it Drawing on a range of modern environmental theorists and approaches the contributors to this volume trace how the Metamorphoses models the relationship between humans and other life forms in ways that resonate with the preoccupations of contemporary eco

criticism They make the case for seeing the worldview depicted in Ovid's poem as an exemplar of the premodern ecological mindset that contemporary environmental thought seeks to approximate They also highlight critical moments in the history of the poem's ecological reception including reflections by a contemporary poet as well as studies of Medieval and Renaissance responses to Ovid

*A Language of Things* Devin P. Zuber, 2020-01-01 Long overlooked the natural philosophy and theosophy of the Scandinavian scientist turned mystic Emanuel Swedenborg 1688 1772 made a surprising impact in America Thomas Jefferson while president was so impressed with the message of a Baltimore Swedenborgian minister that he invited him to address both houses of Congress But Swedenborgian thought also made its contribution to nineteenth century American literature particularly within the aesthetics of American Transcendentalism Although various scholars have addressed how American Romanticism was affected by different currents of Continental thought and religious ideology surprisingly no book has yet described the specific ways that American Romantics made persistent recourse to Swedenborg for their respective projects to re-enchant nature In *A Language of Things* Devin Zuber offers a critical attempt to restore the fundamental role that religious experience could play in shaping nineteenth century American approaches to natural space By tracing the ways that Ralph Waldo Emerson John Muir and Sarah Orne Jewett among others variously responded to Swedenborg Zuber illuminates the complex dynamic that came to unfold between the religious the literary and the ecological *A Language of Things* situates this dynamic within some of the recent new materialisms of environmental thought showing how these earlier authors anticipate present concerns with the other than human in the Anthropocene

**Imagination and Environmental Political Thought** Joshua J. Bowman, 2018-03-16 *Imagination and Environmental Political Thought* The Aftermath of Thoreau seeks to correct oversimplified readings of Henry David Thoreau's political thought by elucidating a key tension within his imagination With the celebration of Thoreau's two hundredth birthday now past this study outlines and builds on his own understanding of imagination and considers its implications for environmental politics Despite the use of the word aftermath Thoreau's legacy for environmental political thought is primarily constructive and foundational for modern environmentalism Thoreau's virtues and vices have been inherited by his environmentally conscious readers The author of *Walden*'s preference for an abstract ahistorical higher law his radical concept of autonomy and his frustration with government and community foster an impractical political thought characteristic of an idyllic imagination Nevertheless Thoreau demonstrates a more prudential and moral imagination by emphasizing the inescapable relationship between the moral order of individuals and the order of political communities and by pioneering the central questions of humanity's relationship to non-human nature Can this tension of imaginations be resolved What are the consequences of this tension Thoreau's overall vision ultimately creates significant problems with which environmentalists still struggle While Thoreau's emphasis on freedom and the immaterial

aspects of human and non human nature are of considerable value his abstract political morality misanthropy and escapism must be resisted both for the sake of environmental well being and human dignity In addition this book is an exercise in re thinking how the humanities may provide scholars critical insights to better diagnose and respond to the environmental challenges of our time The Environmental Imagination Dean Hawkes,2008 **The Environmental Imagination** Dean Hawkes,2019-11-07 The Environmental Imagination explores the relationship between tectonics and poetics in environmental design in architecture Working thematically and chronologically from the eighteenth century to the present day this book redefines the historiography of environmental design by looking beyond conventional histories to argue that the environments within buildings are a collaboration between poetic intentions and technical means In a sequence of essays the book traces a line through works by leading architects of the nineteenth and twentieth centuries that illustrate the impact of new technologies on the conception and realisation of environments in buildings In this a consideration of the qualitative dimension of environment is added to the primarily technological narratives of other accounts In this second edition the book has been substantially rewritten and restructured to include further research conducted in the decade since the first edition A number of important buildings have been revisited in order to extend the descriptions of their environments and studies have been made of a number of newly studied significant buildings A completely new essay offers an environmental interpretation of Luis Barrag n s magical own house in Mexico City and the earlier studies of buildings by Peter Zumthor have been gathered into a single extended essay that includes a body of new research On the fiftieth anniversary of the publication of Reyner Banham s The Architecture of the Well tempered Environment the book concludes with a critical tribute to that seminal text The Environmental Imagination will appeal to academics and practitioners with interests in the history theory and technology of architecture **Sense of Place and Sense of Planet** Ursula K Heise,2008-10-16 Examines the connections between environmentalism ecocriticism and theories of globalization and cosmopolitanism on the one hand and risk theory especially Ulrich Beck s theory of the risk society on the other Publisher s website Maine's Place in the Environmental Imagination Michael D. Burke,2020-12-15 The essays in Maine s Place in the Environmental Imagination address from a variety of perspectives how Maine s unique identity among the states of the United States has been formed and what that identity is A place that is still imagined by others primarily through its environmental associations its nature and landscape rather than through its social arrangements and human history The collection attempts a foundational study not of a regional literature but of a state literature In doing so it makes the case that Maine was constructed imaginatively and environmentally through its literature and that this image is the one that endures even now The essays suggest how this identity was formed by discussing writings ranging from the recently recovered work of Joseph Nicolai a member of the Penobscot Nation in the late 19th century to the contemporary Maine author Carolyn Chute from Thoreau s canonical essay Ktaadn to the modernist E B White whose works have an under appreciated environmental project

**The Future of Environmental Criticism** Lawrence Buell, 2009-02-09 Written by one of the world's leading theorists in ecocriticism this manifesto provides a critical summary of the ecocritical movement A critical summary of the emerging discipline of ecocriticism Written by one of the world's leading theorists in ecocriticism Traces the history of the ecocritical movement from its roots in the 1970s through to its diversification and proliferation today Takes account of different ecocritical positions and directions Describes major tensions within ecocriticism and addresses major criticisms of the movement Looks to the future of ecocriticism proposing that discourses of the environment should become a permanent part of literary and cultural studies Routledge Handbook of Ecocriticism and Environmental Communication Scott Slovic, Swarnalatha Rangarajan, Vidya Sarveswaran, 2019-02-01 Ecocriticism and environmental communication studies have for many years co-existed as parallel disciplines occasionally crossing paths but typically operating in separate academic spheres These fields are now rapidly converging and this handbook aims to reinforce the common concerns and methodologies of the sibling disciplines The Routledge Handbook of Ecocriticism and Environmental Communication charts the history of the relationship between ecocriticism and environmental communication studies while also highlighting key new paradigms in information studies diverse examples of practical applications of environmental communication and textual analysis and the patterns and challenges of environmental communication in non-Western societies Contributors to this book include literary film and religious studies scholars communication studies specialists environmental historians practicing journalists art critics linguists ethnographers sociologists literary theorists and others but all focus their discussions on key issues in textual representations of human nature relationships and on the challenges and possibilities of environmental communication The handbook is designed to map existing trends in both ecocriticism and environmental communication and to predict future directions This handbook will be an essential reference for teachers students and practitioners of environmental literature film journalism communication and rhetoric and well as the broader meta-discipline of environmental humanities Encyclopedia of the Environment in American Literature Geoff Hamilton, Brian Jones, 2014-01-10 This encyclopedia introduces readers to American poetry fiction and nonfiction with a focus on the environment broadly defined as humanity's natural surroundings from the discovery of America through the present The work includes biographical and literary entries on material from early explorers and colonists such as Columbus Bartolome de Las Casas and Thomas Harriot Native American creation myths canonical 18th and 19th century works of Jefferson Emerson Thoreau Whitman Hawthorne Twain Dickinson and others to more recent figures such as Jack London Ernest Hemingway Norman Mailer Stanley Cavell Rachel Carson Jon Krakauer and Al Gore It is meant to provide a synoptic appreciation of how the very concept of the environment has changed over the past five centuries offering both a general introduction to the topic and a valuable resource for high school and university courses focused on environmental issues

**The Truth of Ecology** Dana Phillips, 2003-03-27 The Truth of Ecology is a wide ranging polemical appraisal of contemporary environmental thought Focusing on the new field of ecocriticism from a thoroughly interdisciplinary perspective this book explores topics as diverse as the history of ecology in the United States the distortions of popular environmental thought the influence of Critical Theory on radical science studies and radical ecology the need for greater theoretical sophistication in ecocriticism the contradictions of contemporary American nature writing and the possibilities for a less devotional wilder approach to ecocritical and environmental thinking Taking his cues from Thoreau Stevens and Ammons from Wittgenstein Barthes and Eco from Bruno Latour and Michel Serres from the philosophers Rorty Hacking and Dennett and from the biologists Ernst Mayr and Stephen Jay Gould author Dana Phillips emphasizes an eclectic but pragmatic approach to a variety of topics His subject matter includes the doctrine of social construction the question of what it means to be interdisciplinary the disparity between scientific and literary versions of realism the difficulty of resolving the tension between facts and values or more broadly between nature and culture the American obsession with personal experience and the intellectual challenges posed by natural history Those challenges range from the near impossibility of defining ecological concepts with precision to the complications that arise when a birder tries to identify chickadees in poor light on a winter s afternoon in the Poconos

**Writing for an Endangered World** Lawrence Buell, 2009-07-01 The environmental imagination does not stop short at the edge of the woods Nor should our understanding of it as Lawrence Buell makes powerfully clear in his new book that aims to reshape the field of literature and environmental studies Emphasizing the influence of the physical environment on individual and collective perception his book thus provides the theoretical underpinnings for an ecocriticism now reaching full power and does so in remarkably clear and concrete ways Writing for an Endangered World offers a conception of the physical environment whether built or natural as simultaneously found and constructed and treats imaginative representations of it as acts of both discovery and invention A number of the chapters develop this idea through parallel studies of figures identified with either natural or urban settings John Muir and Jane Addams Aldo Leopold and William Faulkner Robinson Jeffers and Theodore Dreiser Wendell Berry and Gwendolyn Brooks Focusing on nineteenth and twentieth century writers but ranging freely across national borders his book reimagines city and country as a single complex landscape

**Environmental Practice and Early American Literature** Michael Ziser, 2013-07-29 This text rethinks American literary history by focusing on the non human environmental agents that have shaped its development

**Environmental Aesthetics** Martin Drenthen, Jozef Keulartz, 2014-02-03 Environmental aesthetics crosses several commonly recognized divides between analytic and continental philosophy Eastern and Western traditions universalizing and historicizing approaches and theoretical and practical concerns This volume sets out to show how these perspectives can be brought into conversation with one another The first part surveys the development of the field and discusses some important future directions The second part explains how widening the scope of environmental

aesthetics demands a continual rethinking of the relationship between aesthetics and other fields How does environmental aesthetics relate to ethics Does aesthetic appreciation of the environment entail an attitude of respect What is the relationship between the theory and practice The third part is devoted to the relationship between the aesthetics of nature and the aesthetics of art Can art help save the Earth The final part illustrates the emergence of practical applications from theoretical studies by focusing on concrete case studies     There Before Us Lundin,2007-01-02 Despite the crucial importance of religion in American life the place of religion in literary studies continues to take a backseat to trendier academic causes This book helps remedy this deficiency by exploring the place of faith in the lives of writers beginning with Ralph Waldo Emerson     Our Common Dwelling Lance Newman,2005-05-12 OurCommonDwelling explores why America s first literary circle turned to nature in the 1830s and 40s When the New England Transcendentalists spiritualized nature they were reacting to intense class conflict in the region s industrializing cities Their goal was to find a secular foundation for their social authority as an intellectual elite New England Transcendentalism engages with works by William Wordsworth Henry David Thoreau Ralph Waldo Emerson Margaret Fuller Nathaniel Hawthorne and others The works of these great authors interpreted in historical context show that both environmental exploitation and conscious love of nature co evolved as part of the historical development of American capitalism
