Purvis, 2024-05 As the environmental justice movement slowly builds momentum Diane J Purvis highlights the work of Indigenous peoples in Alaska's small rural villages who have faced incredible odds throughout history yet have built political clout fueled by vigorous common cause in defense of their homes and livelihood Starting with the transition from Russian to American occupation of Alaska Alaska Natives have battled with oil and gas corporations fought against U S plans to explode thermonuclear bombs on the edge of Native villages litigated against political plans to flood Native homes sought recompense for the Exxon Valdez oil spill disaster and struggled against the federal government's fishing restrictions that altered Native paths for subsistence In *They Came but Could Not Conquer* Purvis presents twelve environmental crises that occurred when isolated villages were threatened by a governmental monolith or big business In each Native peoples rallied together to protect their land waters resources and a way of life against the bulldozer of unwanted often dangerous alterations labeled as progress In this gripping narrative

Bryant, Dennis L. Peck, 2007 Publisher Description **Urban Soils** Andrew W. Rate, 2022-01-07 This textbook addresses the increasing trend in urbanization of the world's population and its relation with urban soils. Written by active practitioners of university level teaching and research, this book is designed primarily as an educational text while it also provides readers with an authoritative gateway to the primary literature. It includes explicit coverage of spatial and statistical multivariate techniques and case studies to illustrate key concepts and to support practical guidance in issues such as data collection and analysis. The authors reflect current developments in research and urban trends. In China, for example, the proportion of the population living in cities increased from 13% in 1950 to 45% in 2010. World Bank data shows Australia is one of the world's top ten urbanised countries with a population greater than ten million, with approximately 90% of its population living in cities, mainly along Australia's coast. The most rapidly urbanising populations are currently in nations of the African continent. Soils in urban areas have multiple functions which are becoming more valued by urban communities: soils supply water, nutrients, and physical support for urban plant and animal communities; parks, reserves, gardens, and are becoming increasingly valued for growing food. Soils may be used for building foundations or as building materials themselves. Urban hydrology relies on the existence of unsealed soils for aquifer protection and flood control. This volume presents the importance of urban ecosystems and the impacts of global change. It examines pedogenesis of urban soils, natural materials affected by urban phenomena, and natural processes acting on urban materials, including an examination of different climatic zones. There is a focus on soils formed on landfill, reclaimed land, dredge spoils, as well as soil-related changes in urban geomorphology. There is plenty of discussion on urban soil as a source and sink, as well as soil geochemistry and health. The book is intended primarily as a text for upper level undergraduate and postgraduate Masters students. It will also be invaluable as a resource for professionals such as researchers, environmental regulators, and environmental consultants. **Today's Social Issues** Timothy W.
