Environmental Law And American Business Dilemmas Of Compliance:

Environmental Law and American Business Joseph F. DiMento, 2013-06-29 We are in the second decade of modern environmental law. By some indicators this body of regulation has matured greatly. We can point to statutes and codes at the federal, state and local levels which address almost every conceivable form of pollution and environmental insult. Yet despite the existence of this large body of law despite considerable expenditures on enforcement and despite the energetic efforts of people sympathetic to environmental objectives violations are numerous. Serious pollution problems are commonplace. Love Canal, the Valley of the Drums, Times Beach and Stringfellow Acid Pits epitomize the national environmental quality challenge. Daily a major illegal disposal of hazardous waste is recorded, a new mismanaged dump site is discovered, a toxic substance is found in our drinking water or a failure to meet a water or air quality standard is identified. Many of these violations involve American business. Failures to comply are of several types. A small businessman in Pennsylvania mistakenly allows a spillover of a pollutant into a protected stream. An industrialist in the Midwest adds to his fortune by illegally dumping dangerous chemicals. A series of errors by several firms, some of which no longer exist, combine to create a health-threatening conflagration on the West Coast. An automobile company interprets one of the almost innumerable air pollution rules differently from government. It produces a car which the government says fails to comply with the Clean Air Act. Training Manual on International Environmental Law, 2006 It is widely recognized that most environmental problems, challenges and solutions are transboundary, regional or global in scope. The environment is an area where states and stakeholders are cooperating extensively and progressively. This manual seeks to provide a comprehensive overview of the current body of environmental law. Publisher's description Wolf and Stanley on Environmental Law Susan Wolf, Neil Stanley, 2013-10-23 Written with real clarity by authors teaching and researching in the field, Wolf and Stanley on Environmental Law offers an excellent starting point for both law and non-law students encountering this diverse and rapidly developing subject for the first time. The focus of the book is on the regulation and control of pollution and includes chapters on environmental permitting, waste management, air and water pollution and contaminated land. The book also includes the administration and enforcement of environmental law, EU environmental law, the environmental torts and the private regulation of environmental law. The book is supported by a range of learning features designed to help students consolidate their learning. Chapter learning objectives and detailed summaries clarify and highlight key points. Understand how the law works in practice. Law in Action features demonstrate the application of pollution control law. Plan your research. Detailed end of chapter further reading sections outline articles, books and online resources that provide next steps for your research. This sixth edition has been updated and revised to take into account recent developments in the subject, including coverage of the Environmental Permitting (England and Wales) Regulations 2010, developments in the Environment Agency enforcement and sanctions policy, documents updates relating to the defence of statutory authority in the tort of private nuisance and current issues relating to

compliance with the Aarhus Convention Suitable for students of environmental law and the wider environmental studies Wolf and Stanley on Environmental Law is a valuable guide to this wide ranging subject **Environment and Law** David Wilkinson,2005-07-05 This textbook provides a concise introduction for students with little or no legal background to the role of law in environmental protection It describes and explains law and legal systems the concept of the environment sources of environmental law and some of the techniques used in environmental law Interdisciplinary in approach the book explores some of the major connections between law and the disciplines of ethics science economics and politics Environment and Law offers a greater understanding of international and national environmental law and has case studies from all over the world including examples from UK US and Australian law **Environmental Crime and Criminality** Sally M. Edwards,Terry D. Edwards,Charles B. Fields,2013-08-01 First published in 1996 One of the primary goals of this series has been to explore new areas of criminology and criminal justice topics that constitute the frontiers of the field This work edited by Sally Edwards Terry Edwards and Charles Fields exemplifies that purpose in its coverage of environmental crime While corporate and political crime developed slowly into mainstream criminology over the last half century environmental crime as an area of emphasis is still in its infancy It is unusual to have many varied and informative perspectives early in a subject s development This volume however demonstrates that many people are already examining environmental crime perhaps as an extension of both the greater environmental movement and the broadening of the popular parameters of crime **The Global Environment and International Law** Joseph F. C. DiMento,2010-01-01 2004 A Choice Outstanding Academic Book International law has become the key arena for protecting the global environment Since the 1970s literally hundreds of international treaties protocols conventions and rules under customary law have been enacted to deal with such problems as global warming biodiversity loss and toxic pollution Proponents of the legal approach to environmental protection have already achieved significant successes in such areas as saving endangered species reducing pollution and cleaning up whole regions but skeptics point to ongoing environmental degradation to argue that international law is an ineffective tool for protecting the global environment In this book Joseph DiMento reviews the record of international efforts to use law to make our planet more livable He looks at how law has been used successfully often in highly innovative ways to influence the environmental actions of governments multinational corporations and individuals And he also assesses the failures of international law in order to make policy recommendations that could increase the effectiveness of environmental law He concludes that a supranational model is not the preferred way to influence the actions of sovereign nations and that international environmental law has been and must continue to be a laboratory to test approaches to lawmaking and implementation for the global community *The Nature and Impacts of Noncompliance* Edvaldo Moita,2023-06-29 Over 2 billion people 61% of the world s employed population work in the informal economy Due to its pervasiveness informality plays a major role in understanding a wide swath of ideas such as development work employment governance and growth Its

scope nonetheless goes far beyond economic definitions and political agendas As the book argues at the root of informality lies another comprehensive yet generally unnoticed or at best improperly treated phenomenon that of noncompliance with the law Whilst it is true that much attention has been paid to the economic aspect over the past 5 decades the same cannot be said about the legal aspect which is one of its constitutive features This book takes the first steps in this direction The book provides an account of the phenomenon s legal nature through the lens of a case study on street vendors in Brazil focusing on what can be conceived as noncompliance and by which forms noncompliant behaviour can be assessed It goes on to set out the most striking impacts of noncompliance specifically what happens with the legal system when noncompliance becomes pervasive The Nature and Impacts of Noncompliance was awarded The European Award for Legal Theory 2022 from the European Academy of Legal Theory EALT Pr mio Abrafi de Teses 2022 from the Brazilian Association for Philosophy of Law and Sociology of Law Abrafi and the 2024 RCSL ISA Adam Podg recki Prize *Barriers and Bridges to the Renewal of Regional Ecosystems* Lance H. Gunderson, C. S. Holling, Stephen S. Light, 1995-06-01 *Barriers and Bridges to the Renewal of Regional Ecosystems* Handbook of Multi-Level Climate Actions Mark Starik, Gordon P. Rands, Jonathan P. Deason, Patricia Kanashiro, 2023-01-20 The Handbook of Multi Level Climate Actions emphasizes the need for significant climate action by every capable person on the planet at multiple levels of human experience and society This includes individuals households formal and informal groups organizations communities from local to global and all levels of businesses governments and nonprofit organizations It highlights the many ways that our species can meet the climate crisis and how entities at every level of human experience are could be and should be developing and implementing climate solutions including those advancing energy efficiency renewable energy utilization and nature s ability to sequester carbon *The New European Criminology* Vincenzo Ruggiero, Nigel South, Ian Taylor, 2002-09-11 The New European Criminology gathers together leading criminologists from all over Europe to consider crime and responses to crime within and across national borders For the first time it allows students to experience the most exciting work in European criminology and to compare approaches to crime in different parts of Europe The five sections of the book look at the effects of European harmonisation on crime criminal justice law enforcement and penal reform organised crime from the Mafia in Italy to drug running in the Balkans local crime in international contexts possible future directions for criminology and some suggestions for a new criminology of war *Regulating Transnational Corporations in Domestic and International Regimes* Evaristus Oshionebo, 2009-01-01 This study explores the range of strategies for regulating the social and environmental practices of TNCs in Africa s extractive industries **Law as Last Resort** Keith Hawkins, 2002 This is a book about the life of the legal system Its concern is legal decision making its focus the handling of prosecution cases in a regulatory agency In almost all legal disputing formalities are employed as a last resort for a small proportion of cases Case attrition is a constant feature in the legal system whether criminal or civil since extensive pre trial negotiations search for solutions to problems that avoid

the costs risks and delays of trial This book analyzes the attrition of cases by studying decisions made about their creation handling disposal and prosecution Exploring these issues asks questions about the public face of law the meaning of formal processes and their impact on pre trial legal manoeuvring To prosecute is to enforce the law in both a public and a consequential way In enforcing regulation prosecution visibly takes sides in the fundamental dilemma of regulatory control about how far law should justifiably intervene in business Using extensive data collected over a fifteen year period and with privileged access to the UK Health and Safety Executive the book presents a multi level analysis of decisions about prosecution policy and individual cases in a variety of inspectorates Reflections on Water Joachim Blatter, Helen M.

Ingram, 2001 This book offers conceptual and empirical support for the idea that the human relationship with water must move beyond rationalist definitions of water as product property and commodity **Eco-global Crimes** Ragnhild

Sollund, 2016-04-29 Building on knowledge within the fields of green and eco global criminology this book uses empirical and theoretical arguments to discuss the multi dimensional character of eco global crime It provides an overview of eco global crimes and discusses them from a justice perspective The persistence of animal abuse and speciesism are also examined together with policies aimed at controlling the natural world and plant species Pollution by large corporations rights of indigenous peoples and the damage caused by the mineral extraction are also considered Providing new ideas and insights which will be relevant on a global scale this book is an interesting and useful study of the exploitation of nature and other species It will be invaluable for students and scholars globally working within or connected to the field of green and eco global criminology The book will also be important for the participants of various social movements especially the environmental and animal advocacy movements **Dealing with an Angry Public** Lawrence Susskind, Patrick

Field, 1996-04-17 Some portion of the American public will react negatively to almost any new corporate initiative as Disney discovered when it announced its plans to build an historical theme park in Virginia Similarly government efforts to change policy or shift budget priorities are invariably met with stiff resistance In this enormously practical book Lawrence Susskind and Patrick Field analyze scores of both private and public sector cases as well as crisis scenarios such as the Alaskan oil spill the silicone breast implant controversy and nuclear plant malfunction at Three Mile Island They show how resistance to both public and private initiatives can be overcome by a mutual gains approach involving face to face negotiation a strategy applied successfully by over fifteen hundred executives and officials who have attended Professor Susskind's MIT Harvard Angry Public seminars Susskind and Field outline the six key elements of this approach in order to help business and government leaders negotiate rather than fight with their critics In the process they show how to identify who the public is whose concerns to address first which people and organizations must be convinced of the legitimacy of action taken and how to assess and respond to different types of anger effectively Acknowledging the crucial role played by the media in shaping public perception and understanding Susskind and Field suggest a way to develop media interaction which is consistent with

the six mutual gains principles and also discuss the type of leadership that corporate and government managers must provide in order to combine these ideas into a useful whole We all need to be concerned about a society in which the public's concerns, fears and anger are not adequately addressed When corporate and government agencies must spend crucial time and resources on rehashing and defending each decision they make a frustrated and angry public contributes to the erosion of confidence in our basic institutions and undermines our competitiveness in the international marketplace In this valuable book Susskind and Field have produced a strong, clear framework which will help reduce these hidden costs for hundreds of executives, managers, elected and appointed officials, entrepreneurs and the public relations, legal and other professionals who advise them

The Open Corporation Christine Parker, 2002-07-08 The Open Corporation originally published in 2002 set out a blueprint for effective corporate self-regulation offering practical strategies for managers, stakeholders and regulators to build successful self-regulation management systems Christine Parker examined the conditions under which corporate self-regulation of social and legal responsibilities were likely to be effective covering a wide range of areas from consumer protection to sexual harassment to environmental compliance Focusing on the features that make self-regulation or compliance management systems effective Parker argued that law and regulators needed to focus much more on meta-regulating corporate self-regulation if democratic control over corporate action was to be established

Environmental Compliance Tools for Small Business United States. Congress. Senate. Committee on Small Business, 1998 Managing Food Safety and Hygiene Bridget M. Hutter, 2011-01-01 One of the most thorough and considered studies we have of the relationship between regulation and business risk management practices Food regulation provides a revealing canvas for understanding the dynamics of the governance of risk John Braithwaite Australian National University Food safety and hygiene is of critical importance to us all yet as periodic food crises in various countries each year show we are all dependent on others in business and public regulation to ensure that the food we consume from food in the retailing and hospitality sectors is safe Bridget Hutter considers the understandings of risk and regulation held by those in business and considers the compliance pressures on managers and owners and how these relate to understandings of risk and uncertainty Using data from an in-depth case study of the food retail and catering sectors in the UK the research investigates how business risk management practices are influenced by external pressures such as state regulation, consumers' insurance and the media and by pressures within business The argument of the book is that food businesses in the UK are generally motivated to manage risk They realize that good risk management aligns with good business practice However there are challenges for an industry that is highly segmented in terms of risk management capacity The findings have implications for contemporary risk regulation in the increasingly number of countries that rely on self-regulation *Managing Food Safety and Hygiene* will prove invaluable for academic researchers and students in risk regulation studies, business studies, food studies, organizational studies, social psychology, socio-legal studies, sociology, management, public administration and political science In addition the

book will also appeal to practitioners specifically to senior policy makers regulators and business risk managers charged with managing risk in diverse organizational settings and across different functional jurisdictions Environmental Liability Patricia Thomas,1991-06-26 There is little dispute that over the last ten years far greater recognition has been accorded to global responsibility for the environment and as a consequence a wider acceptance in the developed world of the US model of strict liability in respect of environmental harm This volume presents the widespread and informed debate on the subject undertaken by the Environmental Law Committee of the IBA s Section on Business Law The philosophical and economic concept of sustainable development is addressed as is the response required from financial and political institutions The role of international agencies is examined Regional perspectives on such liability are given Europe North America Asia Africa and Australasia and insurance indemnities non fault liability and environmental impact assessment are evaluated as means of securing responsibility The effectiveness of enforcement an area of potentially far reaching legislation across a range of jurisdictions is closely examined and clear developments and trends are identified The implications of liability continue to involve corporate and banking lawyers and insurance litigators surely placing upon the environmental lawyer an educative and pivotal place in the promotion of sustainable development and growth The volume reproduces the edited and revised papers of the Committee s Seventh Residential Seminar held in Montreux June 1990 and faithfully reflects the wide range of expertise brought to bear on the subject Regulation and Risk Bridget M. Hutter,2001 This study examines the impact of a system of enforced self regulation on the corporate life of British Railways The book raises important questions about how workplace risks are managed and what influence the law can have
