## **Environmental Management In The South China Sea Legal And Institutional Developments:**

Environmental Management in the South China Sea Douglas Millar Johnston (jurist), 1982      **Environmental Management in the South China Sea** Douglas M. Johnston, 1982      *Protecting the Marine Environment From Land-Based Sources of Pollution* Daud Hassan, 2017-05-15

Global findings estimate that 80 per cent of marine pollution originates from land based sources and is trans boundary in nature These problems persist in spite of a number of legal and policy initiatives taken to protect the marine environment This volume explores the applications and shortcomings of current international regimes in addressing these issues The book identifies the sources and effects of land based marine pollution and analyzes the problems of controlling them Management principles policy and regulation are examined at both regional and international level The author discusses the strengths and weaknesses of existing regimes and advances a more effective international legal framework The text provides a valuable insight into an important area of international environmental law It will be of interest to researchers and policy makers working in this area      *Asia-Pacific Legal Development* Gerry Ferguson, 1998-11-01

In this age of globalization many legal experts see evidence of swift global movement toward an eventual single world legal system Yet the trend to political and economic integration in some parts of the world is matched by the trend to disintegration in others where strong cultural and political resistance to external influences exists Asia Pacific Legal Development traces current and prospective developments in several legal systems of the Asia Pacific region to make sense of these trends and counter trends The contributing authors represent a wide variety of specialist expertise both public and private and together they encompass the three sectors that constitute a modern system of formal law the economic the behavioural and the civic Taking into account the opinions and perspectives of both indigenous and non indigenous experts on topics ranging from prostitution to constitutional law the book surveys how several ASEAN nations as well as Canada Australia and New Zealand are confronting social economic and legal change In the first three parts chapters are grouped along general sectoral lines to cover economic civic and behavioural themes while in the fourth cross sectoral contexts are addressed With the introduction and concluding chapter the editors provide an overall integrating framework as well as provocative insights into trends in legal development in the Asia Pacific region and on comparative legal research and writing in general Asia Pacific Legal Development is not only an exemplary model for cooperative and comparative legal research and scholarly pluralism but also a rich study of the increasingly relevant issue of convergence and divergence of legal systems with a unique Asian focus      **Canada and the New International Law of the Sea** Douglas M. Johnston, 1985-12-15

This is the last of three volumes dealing with the International Legal Environment see list in back of book included in the Collected Research Studies of the Royal Commission on the Economic Union and Development Prospects for Canada The Third United Nations Conference on the Law of the Sea UNCLOS 3 culminated in the adopted of the United Nations convention on the law of the sea in 1982 Since then 150 countries including Canada have signed this

historic treaty It affects Canada's four major ocean industries fishing offshore petroleum shipping and ocean mining As Canada contemplates ratification of this agreement it must consider these as well as several other maritime matters including transit management offshore development marine technology development and ocean science policy This volume delineates the issues and their implications for Canada's future at sea and recommends the establishment of an independent advisory body to ensure serious and comprehensive treatment of maritime concerns Training Manual on International Environmental Law, 2006 It is widely recognized that most environmental problems challenges and solutions are transboundary regional or global in scope The environment is an area where states and stakeholders are cooperating extensively and progressively This manual seeks to provide a comprehensive overview of the current body of environmental law Publisher's description The Future of Ocean Regime-Building Aldo Chircop, Theodore McDorman, Susan Rolston, 2009-02-23 One of the most creative innovations of the international diplomatic community in the 20th century was its invention of the international regime wrote Douglas M Johnston in his last major work published posthumously *The Historical Foundations of World Order The Tower and the Arena* Nijhoff 2008 While regimes often provide order and certainty and a consequent reduction in disputes and misunderstandings regimes are driven by specific concerns With diverse disciplinary backgrounds and perspectives the distinguished contributors to this tribute follow a long tradition of scholarly inquiry into the governance creation operation viability and maintenance of international regimes Their contributions on ocean and environmental regimes as diverse as fisheries ocean dumping maritime security seafarers rights or enhancement of marine environmental protection attest to the depth to which modern international law and the underlying international relations have been transformed into an international law of structured cooperation This book includes biographical and bibliographic notes on Douglas M Johnston **War Or Peace in the South China Sea?** Timo Kivimäki, 2002 Not only is the South China Sea of strategic importance it is also rich in oil and other natural resources As such it is the subject of overlapping territorial disputes between several East and Southeast Asian countries as well as the scene of military tensions and potentially dangerous conflicts But disputes over the South China Sea are much more complex than simply issues of military security Environmental values economic security and political developments are also involved Spanning the full complexity of the situation this volume covers its historical and legal background analyses its environmental economic military and political dimensions assesses the potential for containing and resolving disputes as well as transforming the structures of conflict in the region **Marine Affairs Bibliography** Christian L. Wiktor, L.A. Foster, 2024-12-02 Environmental Law in Development N. Niessen, 2006-01-01 an important addition to the small but growing published literature on the development of environmental law in developing countries It will be of interest to academics and those involved in law development in Indonesia and the other developing countries Jennifer Mohamed Katerere *Journal of Environmental Law* This book asks whether environmental law and policy in developed countries can be

successfully transferred to developing countries. It questions whether developing countries are indeed ready and able to implement new ideas from the developed world such as the integration of environmental law and use of market oriented instruments. The authors draw insights from the case of Indonesia where they have experience of drafting environmental legislation and which is itself in the early stages of development. Through these insights they seek to understand why environmental law that has been well developed in theory can in practice be difficult to monitor and adequately enforce. Indeed a further question central to the book is why developing environmental law does not necessarily result in an efficient environmental policy. Taking a comparative perspective and using a multi faceted methodology that draws on constitutional and administrative law, human rights law, criminal and liability law and international law as well as law and economics, the authors conclude with an outline of some of the lessons that can be learnt by other jurisdictions seeking to develop environmental law. Lawyers, environmental engineers and social scientists involved in environmental law and policy in developing countries will find much to interest them in this book as will those concerned with development studies or with a particular interest in the case of Indonesia. *Recent Developments in the South China Sea Dispute* Wu Shicun, Nong Hong, 2014-05-30. The South China Sea region contains potentially huge deposits of petroleum and natural gas, important shipping lanes and fishing areas and is subject to a number of maritime territorial disputes. This edited volume analyzes the most recent development in the South China Sea dispute looking at the positions taken by China, the ASEAN countries and the US. In recent years maritime joint development zones have emerged as an important means to overcome deadlock in relation to maritime jurisdictional claims. This book tests the applicability of joint development regime in this region and explores the prospect of joint development of resources as a way to successfully manage the conflict in the South China Sea. Eminent scholars in the field of South China Sea studies have contributed original chapters to the volume covering such issues as the legal framework for joint development, how joint development might work in practice, the challenges faced by and the prospects arising from joint development and the way forward for the region. *Marine Policy in Southeast Asia* George Kent, Mark J. Valencia, 1985. **Ocean Boundary**

**Making** Douglas M. Johnston, Phillip Saunders, 2024-05-01. Originally published in 1988, this book was written at a time when many nations were engaged in various forms of ocean boundary making. This created new regional pressures and the need for collective regional responses to these issues. This book examines the issues at stake and the boundary making processes. It discusses these in a general way showing how the Third UN conference on the Law of the Sea helped resolve the problems whilst leaving some issues unresolved. The book goes on to examine the issues and boundary making processes in 7 important areas of the world. **Regions, Institutions, and Law of the Sea** Harry N. Scheiber, Jin-Hyun Paik, 2013-05-01. *Regions, Institutions and Law of the Sea Studies in Ocean Governance* offers fresh perspectives both on issues specific to major ocean

regions and on the nature and functions of institutions that implement the legal order of the oceans Of special interest is a set of chapters by distinguished scholars and jurists providing nuanced analysis of the International Tribunal for the Law of the Sea as a key actor in the institutional and regime structure Other expert authors contribute timely analysis of specific ocean uses in the context of implementation of soft and hard law Piracy global warming and ecosystem challenges geo engineering control of pollution in shipping operations Seabed Authority policy and performance of the UN Regional Seas Programme are among key issues presented in both their regional and legal dimensions Also considered in depth are law ocean policy and the operation of international organizations in Northeast Asia Latin America the Indian Ocean region the African coastal areas and the Arctic The accessibility of subject matter and the readability of the text s 26 chapters enhance the value of this book as an important addition to the literature Regions Institutions and Law of the Sea is the latest publication of the Law of the Sea Institute at UC Berkeley a major voice in the global debates of contemporary ocean law and policy Inha University Incheon was a major co sponsor of the project

[Ocean Governance and Conflict in the East and South China Sea](#) Christian Schultheiss, 2025-10-01 This book tells the story of the negotiations between China Japan Taiwan the Philippines Vietnam and other Southeast Asian countries about the East and South China Sea disputes Tapping into formerly classified and newly available primary sources the book meticulously tracks these negotiations and their sudden U turns It is a story about the promises and perils of cooperation as much about pragmatic gradual and surprisingly resilient approaches to conflict resolution and ocean governance as it is about the expansion of states bargaining power through institutions The book hinges on the question of when and why disputing parties reach agreement on joint oil and gas development fisheries and codes of conduct and when and why negotiations end in impasse It is the first comprehensive and theoretically informed study of decades long dispute settlement efforts in a central region of the Indo Pacific where the expansion of China challenges the law of the sea and regional security

*Marine Protected Areas Network in the South China Sea* Vu Hai Dang, 2014-01-09 The once pristine and rich marine environment of the South China Sea is degrading at an alarming rate due to the rapid socioeconomic development of the region Despite this and due mainly to complicated sovereignty and maritime disputes coastal States have not been able to develop effective regional cooperation to safeguard the shared marine environment Marine Protected Areas Network in the South China Sea discusses legal and political measures to support the development of a network of marine protected areas in the South China Sea Such a network if properly developed would not only help to protect the marine environment and resources of the region but also contribute to decreasing the tension among its coastal States These measures are suggested in accordance with international law based on the specific geopolitical context of the South China Sea region and take into consideration experiences in developing regional networks of marine protected areas from other marine regions
