## **Environmental Memory:**

Handbook of Pre-Modern Nordic Memory Studies Jürg Glauser, Pernille Hermann, Stephen A. Mitchell, 2018-11-19 In recent years the field of Memory Studies has emerged as a key approach in the Humanities and Social Sciences and has increasingly shown its ability to open new windows on Nordic Studies as well. The entries in this book document the work to date of this approach on the pre modern Nordic world mainly the Viking Age and the Middle Ages but including as well both earlier and later periods. Given that Memory Studies is an ever expanding critical strategy the approximately eighty contributors in this volume also discuss the potential for future research in this area. Topics covered range from texts to performance to visual and other aspects of material culture all approached from within an interdisciplinary framework. International specialists coming from such relevant fields as archaeology mythology history of religion folklore history law art literature philology language and mediality offer assessments on the relevance of Memory Studies to their disciplines and show it at work in case studies. Finally this handbook demonstrates the various levels of culture where memory had a critical impact in the pre modern North and how deeply embedded the role of memory is in the material itself. *Environmental Cultures in Soviet East Europe* Anna Barcz, 2020-12-10 For more than 40 years Eastern European culture came under the sway of Soviet rule. What is the legacy of this period for cultural attitudes to the environment and the contemporary battle to confront climate change? This is the first in depth study of the legacy of the Soviet era on attitudes to the environment in countries such as Poland Hungary and Ukraine. Exploring responses in literature culture and film to political projects such as the collectivisation of agricultural land the expansion of the mining industry and disasters such as the Chernobyl explosion Anna Barcz opens up new understandings of local political traditions and examines how they might be harnessed in the cause of contemporary environmental activism. The book covers works by writers such as Christa Wolf the Nobel Prize winner Svetlana Alexievich and film makers such as Błażej Tarr Andrzej Wajda and Władysław Pasikowski. **The Essential Handbook of Memory Disorders for Clinicians** Alan D. Baddeley, Michael Kopelman, Barbara A. Wilson, 2004-07-29 This concise version of the Handbook of Memory Disorders is a selection of chapters from the original volume that have been chosen with the busy practitioner in mind. The Essential Handbook provides individual clinicians and students with those parts the editors consider most relevant and useful on a day to day basis as a portable adjunct to the more comprehensive Handbook. *Handbook of Memory Disorders* 047 149819X. Environment and Humanities: An Interdisciplinary Discourse Vandana Beniwal, Poonam Mehra, 2024-08-14 In an era marked by unprecedented environmental challenges from climate change to biodiversity loss the need for comprehensive understanding and thoughtful solutions has never been more urgent. The intersection of human culture philosophy history and the natural world has become a critical space for inquiry. *Environment and Humanities: An Interdisciplinary Discourse* seeks to explore this nexus offering a platform for dialogue between the sciences and the humanities recognizing that both are essential to confronting our shared environmental crises.

This book is the result of a collaborative effort to bridge the gap between these traditionally distinct fields. The research papers contained within provide diverse perspectives on how human values, ethics, and historical experiences shape our relationship with the environment and in turn how environmental changes influence cultural and societal transformations. We believe that engaging with environmental issues from an interdisciplinary viewpoint is not just beneficial but necessary for fostering the kinds of solutions that are both sustainable and equitable. The contributions of scholars from various disciplines—literature, philosophy, history, anthropology, psychology, and environmental studies—demonstrate the vast range of human experience that is intricately tied to the land, water, air, and ecosystems around us. Through this dialogue, we aim to illustrate how environmental concerns can no longer be viewed through a single lens but must be understood as a complex and dynamic web of social, ethical, and ecological factors. Ultimately, *Environment and Humanities* calls for a reevaluation of how humanity perceives its place within the natural world. By fostering an interdisciplinary discourse, we hope to inspire new ways of thinking both within academic circles and in broader society toward a more responsible and compassionate coexistence with our planet.

*The Routledge Companion to the Environmental Humanities* Ursula Heise, Jon Christensen, Michelle Niemann, 2017-01-06. The Routledge Companion to the Environmental Humanities provides a comprehensive transnational and interdisciplinary map to the field, offering a broad overview of its founding principles while providing insight into exciting new directions for future scholarship. Articulating the significance of humanistic perspectives for our collective social engagement with ecological crises, the volume explores the potential of the environmental humanities for organizing humanistic research, opening up new forms of interdisciplinarity, and shaping public debate and policies on environmental issues. Sections cover The Anthropocene and the Domestication of Earth, Posthumanism and Multispecies Communities, Inequality and Environmental Justice, Decline and Resilience, Environmental Narratives, History and Memory, Environmental Arts, Media and Technologies, The State of the Environmental Humanities. The first of its kind, this companion covers essential issues and themes necessarily crossing disciplines within the humanities and with the social and natural sciences. Exploring how the environmental humanities contribute to policy and action concerning some of the key intellectual, social, and environmental challenges of our times, the chapters offer an ideal guide to this rapidly developing field.

**Memory Studies in India**, 2025-05-29. This pioneering volume marks a significant contribution to memory studies in India, offering an in-depth exploration of how collective and individual memories shape and reshape identities, narratives, and historical knowledge. By addressing a diverse array of topics from forgotten events, massacres, and monuments to public spaces and food rituals across various epochs, the essays in this collection bring new insights into India's complex cultural history. With contributions from scholars across different stages of their academic careers, this volume not only enriches the field of memory studies but also paves the way for future research in India and beyond.
