Environmental Policy Analysis A General Equilibrium Approach:

Environmental Policy Analysis Jian Xie, 1996 Using the computable general equilibrium CGE approach this work develops an integrated economic and environmental model for environmental policy analysis for developing countries The model is applied to China and the policies under scrutiny include pollution emission taxes *Energy Abstracts for Policy Analysis*, 1986 Essays on Environmental Policy Analysis Martin Hill, 2001-01-01 **Empirical Studies of**

Environmental Policies in Europe John W. Maxwell, Jürgen von Hagen, 2012-12-06 John W Maxwell and Jiirgen von Hagen Kelley School of Business Indiana University ZEI University of Bonn Indiana University and CEPR Prior to the 1970 s economic studies of the natural environment were chiefly concerned with the optimal extraction of natural resources such as oil coal and timber This focus reflected the commonly held belief that the natural environmental was sufficient to sustain the world s population in relative comfort at least in developed nations and was there for the taking By the late 1960 s however the spectacular levels of economic growth that had taken place since the Second World War began to exact a visible toll on the natural environment This visibility prompted growing concern for the environment among activists government officials academics and the pUblc This concern has followed a general upward though cyclic trend to the present day Remarkable events during this trend include the issuing of the Brundtland report and the world environmental summits held in Rio and Kyoto Concern for the natural environment has impacted the discipline of economics resulting in the birth of the field of environmental economics that has recently eclipsed in popularity its parent field of natural resource economics **Wspc**

Reference On Natural Resources And Environmental Policy In The Era Of Global Change, The (In 4 Volumes), 2016-10-21 The WSPC Reference on Natural Resources and Environmental Policy in the Era of Global Change provides a comprehensive and prominent reference of various highly authoritative volumes of long term scientific value for milestone concepts and theories The books in the reference set are edited by leading experts in the fields of Game Theory International Relations and Global Politics Computable General Equilibrium CGE Economy Wide Modeling and Experimental Economics Each book in the reference set includes chapters that are laid out by recognized broadly respected researchers in fields associated with issues related to natural resources and environmental policy in the era of global change The reference set focuses on the economic and strategic aspects of interactions among various parts of society all dependent on the availability and utilization of limited natural resources and their impact on the environment Policy implications are addressed including current challenges and future perspectives The combination of the four books provides a unique perspective on the issues that engage the public discourse of researchers and policy makers at state regional and global levels Each of the books in the reference set and all four books as a whole provide coverage of disciplines and angles through which the reader can obtain an understanding of the state of the art of dealing with natural resources and environmental policy in the era of global change The books in the reference set complement each other and provide a scientific understanding of our ability to address

the issues covered **Handbook of Environmental Economics** Karl-Goran Maler,2005-12-09 Many of the frontiers of environmental economics research are at the interface of large scale and long term environmental change with national and global economic systems This is also where some of the most of challenging environmental policy issues occur Volume 3 of the Handbook of Environmental Economics provides a synthesis of the latest theory on economywide and international environmental issues and a critical review of models for analyzing those issues It begins with chapters on the fundamental relationships that connect environmental resources to economic growth and long run social welfare The following chapters consider how environmental policy differs in a general equilibrium setting from a partial equilibrium setting and in a distorted economy from a perfect economy The volume closes with chapters on environmental issues that cross or transcend national borders such as trade and the environment biodiversity conservation acid rain ozone depletion and global climate change The volume provides a useful reference for not only natural resource and environmental economists but also international economists development economists and macroeconomists Handbook of Environmental and Resource Economics Jeroen C. J. M. Timilsina, **Assessing the Environmental Effects of Trade Liberalisation Agreements Methodologies** OECD,2000-02-11 This conference proceedings examines how to assess the environmental effects of trade liberalisation agreements **Import Tariffs as Environmental Policy Instruments** C. Kraus,2013-06-29 The theoretical claims for eco tariffs are rigorously analyzed within a unified framework formed of an

international trade model enriched with both a domestic and a global externality During the course of the analysis the model is modified to analyze an array of contexts for which eco tariffs have been claimed to improve environmental quality or welfare The circumstances and conditions are characterised under which such tariffs can be shown to improve environmental quality and social welfare taking account of general equilibrium effects The theoretical results are applied in a policy analysis of eco tariffs and other trade instruments in the context of domestic and global environmental policy in order to assess the relevance of the eco tariffs that have been subjected to the theoretical analysis Finally the GATT WTO rules and regulations are presented since to date these have banned the use of eco tariffs The rules and regulations are mapped against the theoretical results to show which rules ought to be changed

Evaluating Climate Change and Development Osvaldo N.

Feinstein,2017-07-28 Climate change has become one of the most important global issues of our time with far reaching natural socio economic and political effects To address climate change and development issues from the perspective of evaluation an international conference was held in Alexandria Egypt This book distills the essence of that timely conference building on the experiences of more than 400 reports and studies presented Developing countries may be particularly vulnerable to the expected onslaught of higher temperatures rising sea levels changing waterfall patterns and increasing natural disasters All societies will have to reduce their vulnerability to these changes and this book describes how vulnerabilities may be addressed in a systematic manner so that governments and local communities may better understand what is happening Different approaches are also discussed including the use of human security as a criterion for evaluation as well as ways to deal with risk and uncertainty Evaluating Climate Change and Development presents a rich variety of methods to assess adaptation through monitoring and evaluation The volume deals with climate change development and evaluation challenges and lessons learned from evaluations mitigation of climate change adaptation to climate change vulnerability risks and climate change and presents a concluding chapter on the road ahead Collectively the authors offer a set of approaches and techniques for the monitoring and evaluation of climate change

Trade and Environment Karl W. Steininger,2012-12-06 Even though the interlinkage between trade and environment is obvious and important it has been acknowledged as such only recently by the world community Yet it is far from being truly addressed as is indicated by the negotiations up to the Uruguay Round Final Act signed in April 1994 as the most current example Mankind remains faced with the crucial need of addressing this interlinkage the objective to which this report is devoted My own growing interest in this subject and the choice to work on and publish this report which has been defended as my Ph D dissertation at the University of Vienna has had a long personal history Ultimately it was made possible by important teachers of mine from primary and high school up to universities by colleagues and friends but certainly also by my family as each of them answered my questions and communicated their own ideas Along the path of research it was only the specific support and inspiration of a large number of people in various different ways that made it possible for the report to now be in front of you in the current form
