Environmental Politics And Policy Making In Australia:

Environmental Politics and Policy Making in Australia Timothy Doyle, Aynsley John Kellow, 1995 Environmental politics and policy making in Australia *The Cambridge Handbook of Social Sciences in Australia* Ian McAllister, Steve Dowrick, Riaz Hassan, 2003-08-07 First published in 2003 The Cambridge Handbook of Social Sciences in Australia is a high quality reference on significant research in Australian social sciences The book is divided into three main sections covering the central areas of the social sciences economics political science and sociology Each section examines the significant research in the field placing it within the context of broader debates about the nature of the social sciences and the ways in which institutional changes have shaped how they are defined taught and researched *Security, the Environment and Emancipation* Matt McDonald, 2012-01-30 This book offers an examination of the role of emancipation in the study and practice of security focusing on the issue of environmental change The end of the Cold War created a context in which traditional approaches to security could be systematically questioned This period also saw a concerted attempt in IR to argue that environmental change constituted a threat to security This book argues that such a notion is problematic as it suggests that a universal definition of security is possible which prevents a recognition of security as a site of contestation in which a range of actors articulate alternative visions of who or what is in need of being secured If security is understood and approached in traditional terms as the territorial preservation of the nation state from external threat then it is indeed difficult to see how environmental issues would benefit from being placed on states security agenda If however security is defined in terms of the emancipation of the most vulnerable individuals from contingent structural oppressions then drawing a relationship between environmental change and security may be beneficial for redressing those environmental issues and prioritising the needs of those most at risk from the manifestations of global environmental change This book takes the limitations of contemporary approaches to the relationship between the environment and security as its starting point and seeks to do two things First it aims to illustrate the ways in which arguments over approaches to environmental issues can be viewed as contestation over the meaning of security in particular political contexts Central here is the composition and assumptions of the dominant security discourse to emerge regarding those issues a framework of meaning for the most important forms of action on behalf of a particular group defining the terms for meaningful contestation and negotiation about security itself within that group As such the book attempts to illustrate the dynamics of competition over the meaning of security with reference to environmental issues particularly focusing on instances of political change in the dominant security discourse through which that issue is approached In the process the author points to the central role of these dominant security discourses in underpinning the most practically significant actions regarding environmental issues such as deforestation and global climate change The book employs methodological tools that enable a focus on how particular frameworks of meaning are constituted and become dominant how they provide a lens through which various issues are

approached and how discourses most consistent with redressing environmental change and the suffering of the most vulnerable might come to provide the framework through which security is viewed in particular contexts This book will be of much interest to students of Critical Security Studies geography sociology IR and Political Science in general

Environment and Politics Timothy Doyle, Doug McEachern, 2007-08-31 Concise introduction to the study of environmental politics explaining the key concepts conflicts political systems and the practices of policy making A diverse range of environmental problems and policy solutions are examined

Capacity Building in National Environmental Policy Helmut Weidner, Martin Jänicke, 2013-03-09 This book is the second collection of systematic case studies describing national environmental policies in 17 countries in terms of capacity building see Appendix The OECD defines environmental capacity building as a society's ability to identify and solve environmental problems While various institutions including UNEP FAO World Bank and OECD have hitherto used the terms environmental capacity and capacity building almost exclusively with reference to developing countries we have extended the concepts to industrialized countries as well The first collection edited by Martin Jänicke Helge Joergens both Free University Berlin and Helmut Weidner Social Science Research Center Berlin was published in 1997 under the title *National Environmental Policies A Comparative Study of Capacity Building* Berlin etc Springer Verlag It included 13 studies of countries As in the first volume chapter I presents the conceptual framework underlying the national case studies It is a slightly shorter version of the corresponding chapter in volume I The design of all case studies in the two volumes is largely congruent with this conceptual framework Although the various sections of the studies do not always have identical titles and subtitles the central elements of the capacity building approach have been applied in all cases

Environmental Movements in Minority and Majority Worlds Timothy Doyle, 2005 Environmental

movements are among the most vibrant diverse and powerful social movements occurring today across all corners of the globe Drawing on his primary fieldwork in six countries environmental researcher Timothy Doyle argues that there is in fact no one global environmental movement rather there are many and the differences among them far outweigh their similarities

Environment, Education and Society in the Asia-Pacific John Fien, Helen Sykes, David Yencken, 2003-09-02 This important book explores the interaction of global environmental discourses and local traditions and practices in twelve countries in the Asia Pacific region Based upon two parallel groups of studies reviewing cultural influences in individual countries and the attitudes of young people across the region it has important implications for environmental policy and education

Environmental Politics and Policy in Industrialized Countries Uday Desai, 2002 Comparative analyses of environmental policy and politics in seven major industrialized nations **Australian Environmental Policy 2** Ken J. Walker, Kate Crowley, 1999 A textbook of readings that replaces Australian Environmental Policy 1992 edited by Ken Walker *Energy, Governance and Security in Thailand and Myanmar (Burma)* Adam Simpson, 2016-04-29 Across the world states are seeking out new and secure supplies of energy but this search is manifesting itself most visibly in Asia where rapid industrialisation in states such as China and India is fomenting a frantic scramble for energy resources Due to entrenched societal inequities and widespread authoritarian governance however the pursuit of national energy security through transnational energy projects has resulted in devastating impacts on the human and environmental security of local populations These effects are particularly evident in both Thailand and Myanmar Burma which located at the crossroads of Asia are increasingly engaged in the cross border energy trade Based on extensive fieldwork and theoretical analysis this ground breaking book proposes a new critical approach to energy and environmental security and explores the important role that both local and transnational environmental movements are playing in the absence of effective and democratic governments in providing activist environmental governance for energy projects throughout the region By comparing the nature of this activism under two very different political regimes it delivers crucial theoretical insights with both academic and policy implications for the sustainable and equitable development of the South's natural resources **Handbook of Global Environmental Policy and Administration** Dennis Soden, Brent R. Steel, 1999-07-16 Presenting case studies involving Rwanda Nepal Australia Japan and Mexico including real time policy and administrative questions this versatile reference text provides a wide perspective on national and international environmental problems and policies featuring discussions with a regional emphasis as well as global significance Pooling the work of over 60 international contributors in disciplines ranging from anthropology to political science the Handbook of Global Environmental Policy and Administration illustrates how environmental concerns are incorporated into administrative functions and policy processes **Environmental Technology Development in Liberal and Coordinated Market Economies** S. Wong, 2006-11-27 This book explores the role of institutions in policy making and the states role in promotion of technology focusing on environmental technology

development Case studies include wind power diffusion in the UK and Germany waste recycling in a variety of countries and green automobile technology in the US and Japan

The Rules of Federalism R. Daniel Kelemen, 2004-04-30 This book examines patterns of environmental regulation in the European Union and four federal polities the United States Germany Australia and Canada Daniel Kelemen develops a theory of regulatory federalism based on his comparative study arguing that the greater the fragmentation of power at the federal level the less discretion is allotted to component states Kelemen's analysis offers a novel perspective on the EU and demonstrates that the EU already acts as a federal polity in the regulatory arena In *The Rules of Federalism* Kelemen shows that both the structure of the EU's institutions and the control these institutions exert over member states closely resemble the American federal system with its separation of powers large number of veto points and highly detailed judicially enforceable legislation In the EU as in the United States a high degree of fragmentation in the central government yields a low degree of discretion for member states when it comes to implementing regulatory statutes
