Helping Nature Heal Richard Nilsen, 1991 Tells the stories of restoration projects in Kenya Brazil Florida Chicago California and Australia

Earth Repair Marcus Hall, 2005 Just as the restoration of Michelangelo s Last Judgment sparked enormous controversy in the art world so are environmental restorationists intensely divided when it comes to finding ways to rehabilitate damaged ecosystems Although environmental restoration is quickly becoming a widespread pursuit debate over the methods and goals of this endeavor often halts progress The same question confronts artistic and environmental restorationists Which systems need restoring and to what states should they be restored In *Earth Repair A Transatlantic History of Environmental Restoration* Marcus Hall explores the answer to this question while offering an alternative to the usual narrative of humans disrupting and spoiling the earth Hall s purpose is not to deny that humans have done lasting damage but to show that those who believed in restoration did not always agree on what they wanted to restore or how or to what form With guidance from the pioneer conservationist George Perkins Marsh the reader travels between the United States and Italy to see that restoration has taken many forms over the past two hundred years from maintaining and repairing to gardening and naturalizing By contrasting land management in these two countries and elsewhere *Earth Repair* clarifies different meanings of restoration shows how such meanings have changed through time and place and suggests how restorationists can apply these insights to their own practices

Routledge Handbook of Ecological and Environmental Restoration Stuart K. Allison, Stephen D. Murphy, 2017-05-18 Ecological restoration is a rapidly evolving

discipline that is engaged with developing both methodologies and strategies for repairing damaged and polluted ecosystems and environments During the last decade the rapid pace of climate change coupled with continuing habitat destruction and the spread of non native species to new habitats has forced restoration ecologists to re evaluate their goals and the methods they use This comprehensive handbook brings together an internationally respected group of established and rising experts in the field The book begins with a description of current practices and the state of knowledge in particular areas of restoration and then identifies new directions that will help the field achieve increasing levels of future success Part I provides basic background about ecological and environmental restoration Part II systematically reviews restoration in key ecosystem types located throughout the world In Part III management and policy issues are examined in detail offering the first comprehensive treatment of policy relevance in the field while Part IV looks to the future Ultimately good ecological restoration depends upon a combination of good science policy planning and outreach all issues that are addressed in this unrivalled volume Environmental Restoration J.
