**Countries** Achiransu Acharyya, 2022-11-02 The COVID 19 pandemic has laid bare the vulnerabilities of socio-economic systems globally and exposed the risks that natural capital degradation imposes on human health, economy and society. This book studies the environmental challenges faced by developing economies in a post COVID 19 world. Exploring diverse case studies from South Asia and Sub-Saharan Africa, the volume discusses the impact that economic development and recently COVID 19 has had on the environment, ecology and economy of these regions. It analyses nature conservation policies aimed at minimizing ecological damage arising from economic development and discusses the policy objectives of sustainable development. It also highlights the significant role that environmental economics networks have played in capacity building, framing of policies using ecological economics tools and developing a local leadership trained in addressing local sustainability issues. An important contribution to the study of environmental economics of the Global South, the book will be of interest to students and researchers of economics, environment, development studies, development economics, environmental policies and South Asia studies. It will also be useful for policymakers and NGOs working in this field. **Air**

**Pollution and the Forests of Developing and Rapidly Industrializing Regions** John L. Innes, Abu Hassan Haron, 2000-06-27 This book examines the importance of air pollution for the forests of rapidly industrialising countries and regions. Its geographical coverage includes South and Central America, Africa and Asia including Siberia, China and Korea. The problems presented by air pollution are placed within the more general context of sustainable development within these regions and the historical legacy that they are attempting to deal with. Attention is drawn to the very serious problems associated with poor air quality in cities such as Mexico City and Chongqing, China. Air pollution in these areas is amongst the worst in the world. Several chapters examine the importance of forest fires as a source of air pollution, with particular reference being made to the Southeast Asian fires in recent years. The available information about the effects of this pollution on the surrounding forests is reviewed and recommendations are made for a better understanding of the impacts. A final chapter reviews the recent developments in air pollution control policies in the different regions covered by the book. **A**

**Vision for Environmental Sustainability: Overcoming Waste Management Challenges in Developing Countries** Ashootosh Mandpe, Sonam Paliya, Maulin P. Shah, 2025-07-11 This book encapsulates numerous ideas for developing novel strategies toward sustainable waste management incorporating technology transfer and capacity building for sustainable waste management and enforcing the stringent policy framework for environmental protection from improper waste management practices. Sustainable waste management is a complex issue that is of increasing concern in developing countries. In these

countries waste management often faces significant challenges due to factors such as inadequate infrastructure lack of funding and resources and limited public awareness of the importance of waste management However there are also significant opportunities to improve waste management practices and create a more sustainable future One of the major challenges of waste management in developing countries is inadequate infrastructure Many developing countries lack the necessary infrastructure to properly manage waste including landfills recycling facilities and waste treatment plants This leads to significant environmental and health problems including water pollution soil contamination and the spread of disease This book is an essential resource for researchers and students studying solid waste management waste valorization biorefineries biofuels products processes as well as for geo environmental engineers biochemical chemical engineers and biotechnologists working in industries and government agencies policymakers conservationists NGOs working for environment protection etc The authors are thankful to the contributors of these books for their cooperation and patience in the compilation of this task The authors are also thankful to Springer team for their constant support in the publication of this work
