Environmental Change in South-East Asia Raymond Bryant, Michael Parnwell, 2005-08-03 *Environmental Change in South East Asia* brings together scholars journalists consultants and NGO activists to explore the interaction of people politics and ecology Ostensibly green activities plantation forestry eco tourism hydro electricity are revealed as guises used by elites to promote their own political and economic interests Highlighting fatal flaws in presently exclusive economic and ecological approaches the authors stress that neither the quest for

sustainable development nor the process of environmental change itself can be understood without reference to political processes

Sustainable Development in India and South-East Asia Ishwar C. Dhingra, 2023-06-02 India and the South East Asia are typical case studies of interest for students of development economics These countries have served as role models for most of the emerging economies Sustainable Development in India and South East Asia attempts to explore and analyse the nature of economic relationship between India and the South East Asia It assesses the prospects for this relationship to grow and flourish Finally it makes suggestions to strengthen and carry forward this relationship Print edition not for sale in South Asia India Sri Lanka Nepal Bangladesh Pakistan and Bhutan

The Politics of Environment in Southeast Asia Philip Hirsch, Carol Warren, 2002-01-31 The environment in Southeast Asia is now a major issue of topical concern First book to give analysis in depth of the political processes involved in environmental disputes Provides a good selection of case studies in the region Questions the assumption that the middle classes are in the vanguard of the environmental movement

Environmental Politics and Governance in Southeast Asia Syed Mohammed Ad'ha Aljunied, 2025-10-02 In this book Aljunied analyses how ASEAN and its key maritime member states of Singapore Malaysia and Indonesia govern environmental issues through strategic engagements with social forces In the new millennium ASEAN states power is enhanced and solidified through regulatory statehood strategic renewal and moral ideology in order to subdue civil resistance while managing non traditional security threats Through a comparative analysis of Southeast Asia this book highlights how state capitalist society relations are shaped by politics of scale and social conflict in order to reinforce authoritarianism and intensify capitalism development agendas at the expense of environmental preservation With this the book explores how civil society challenge and are suppressed by state power at national and regional platforms A pioneering scholarly work this book represents a major contribution to the intersection between political science environmental governance and Southeast Asian Studies by offering rich theoretical and empirical insights into the dynamics of state capitalist society relations in an era of global environmental crisis

The Far East and Australasia 2003 Europa Publications, 2002 A unique survey of each country in the region It includes an extensive collection of facts statistics analysis and directory information in one accessible volume

East and South-East Asia Andrew T. H. Tan, 2013-07-03 The economic growth of East and South East Asia in the context of the global financial crisis has strengthened the view that this region is emerging in the 21st century as the most economically vibrant region in the world With some of the largest economies and generally high economic growth rates compared to the rest of the world it is unsurprising that East and South East Asia has become the subject of global interest East Asia's rise inevitably focuses attention on the issue of China's emergence as a regional and global power Such a prospect challenges the current status quo in which the region is dominated by the USA and its regional allies and issues in Sino US strategic relations have raised global awareness of the need to understand this pivotal region better In addition the Taiwan issue continues to evoke nationalist sentiments in China

and North Korea continues to threaten regional stability Non traditional or alternative security issues are also of major importance in the region including natural disasters and epidemics as well as challenges relating to human rights and governance transnational crime demographic issues economics and trade and regionalism This Handbook aims to offer an insight into these issues The volume is divided into two main sections The first International Relations and Security Perspectives will focus on the international relations of the region paying special attention to the key state players The chapter contributions will examine the security perspectives and foreign and defence policies of these states as well as key bilateral relationships The second section will examine key Regional Non traditional Security Issues including globalization transnational health challenges population growth and the environment Routledge Handbook of Environment and Society in Asia Paul G. Harris, Graeme Lang, 2014-09-19 Nowhere is the connection between society and the environment more evident and potentially more harmful for the future of the world than in Asia In recent decades rapid development of Asian countries with very large populations has led to an unprecedented increase in environmental problems such as air and water pollution solid and hazardous wastes deforestation depletion of natural resources and extinction of native species This handbook provides a comprehensive survey of the cultural social and policy contexts of environmental change across East Asia The team of international experts critically examine a wide range of environmental problems related to energy climate change air land water fisheries forests and wildlife The editors conclude that with nearly half of the human population of the planet and several rapidly growing economies most notably China Asian societies will determine much of the future of human impacts on the regional and global environments As climate change related threats to society increase the book strongly argues for increased environmental consciousness and action in Asian societies This handbook is a very valuable companion for students scholars policy makers and researchers working on environmental issues in Asia

Regimes in Southeast Asia Henriette Litta, 2011-11-01 In the context of massive environmental problems in Southeast Asia the countries in the region have decided at least in some instances to create regimes to solve these problems jointly This empirical observation is surprising given the Southeast Asian countries general reluctance to regional cooperation the governance and budgetary constraints that are typical for developing countries and the huge heterogeneity of the involved countries in terms of environmental vulnerability economic capacity and hegemonic power This book analyzes the creation and effectiveness of two environmental regimes one on transboundary haze pollution and a second on resource management of the Mekong It will be shown that regime creation is extremely problematic and strategies to overcome conflicting actor constellations are mostly lacking *Environmental Challenges and Governance* Sacchidananda Mukherjee, Debashis Chakraborty, 2015-03-02 The economies located in East South and Southeast Asia have witnessed an interesting growth sustainability trade off over the last decades While growth considerations have paved ways for deepened ties with growing trade investment waves and increasing population pressure necessitated exploitation of hitherto unutilized natural resources focus on environmental

sustainability has been a recent consideration The growth impetus still playing a key role in these economies it becomes imperative that the countries effectively address the key sustainability concerns e g air and water pollution land degradation loss of biodiversity climate change issues like CO2 emissions etc But how prepared is the governance mechanism of these countries covering not only the legislative and administrative framework but also involvement of the judiciary presence of spirited civil society and active engagement of stakeholders in policy framing dialogues to rise up to these challenges The book seeks an answer to this question through the environmental governance mechanism and natural resource conservation policies in three vibrant regions within Asia A holistic development dimension of sustainable development path emerges through discussion of policies adopted by developed Japan South Korea upper middle China Malaysia developing India Indonesia Philippines Sri Lanka Thailand and least developed countries Bangladesh Myanmar Nepal **Environmental Management in ASEAN** Maria Seda,1993 The problem of environmental degradation in the ASEAN region cannot be underestimated The articles in this book examine some of the common environmental issues faced by countries in the region They provide a brief overview of some major environmental problems such as fisheries management tropical deforestation and pollution in urban areas and highlight some of the research policy and institutional constraints in the region

Sustainable Cities Mélanie Robertson,2012 4 Healthy sustainable and culturally appropriate living and working environments Domestic pig production in Malika Senegal⁵ Housing for the urban poor through informal providers Dhaka Bangladesh 6 Socio spatial tensions and interactions An ethnography of the condominium housing of Addis Ababa Ethiopia 7 Partnership modalities for the management of drinking water in poor urban neighbourhoods The example of Kinshasa Democratic Republic of Congo 8 Rethink reuse Improving collective action capacity regarding solid waste management and income generation in Koh Kred Thailand *Histories of the Borneo Environment* Reed L. Wadley,2022-07-04 In light of the tremendous changes that have come to the island of Borneo in recent decades this volume takes a detailed historical look at the Borneo environment from native colonial and national perspectives It examines change and continuity in the economic political and social dimensions of human environment interactions Reflecting the increasingly multidisciplinary nature of environmental history the book brings together an international group of historians anthropologists geographers and social foresters all looking through a historical lens at the environment in the Malaysian states of Sabah and Sarawak and the Indonesian province of Kalimantan and Brunei Drawing on extensive archival research and fieldwork these ten original contributions encompass eleven centuries of history on Borneo examining interrelated topics that include long distance trade conservation land tenure resource access property rights perceptions of the environment migration and development policy and practice The chapters in this volume are extensively revised versions of selected papers presented at an international seminar on Environmental change in native and colonial histories of Borneo Lessons from the past prospects for the future held in Leiden under the auspices of the International Institute for Asian Studies **Borneo Studies in History, Society**

and Culture Victor T. King, Zawawi Ibrahim, Noor Hasharina Hassan, 2016-08-12 This edited book is the first major review of what has been achieved in Borneo Studies to date. Chapters in this book situate research on Borneo within the general disciplinary fields of the social sciences with the weight of attention devoted to anthropological research and related fields such as development studies, gender studies, environmental studies, social policy studies and cultural studies. Some of the chapters in this book are extended versions of presentations at the Borneo Research Council's international conference hosted by Universiti Brunei Darussalam in June 2012 and a Borneo Studies workshop organised in Brunei in 2012. The volume examines some of the major debates and controversies in Borneo Studies including those which have served to connect post-war research on Borneo to wider scholarship. It also assesses some of the more recent contributions and interests of locally based researchers in universities and other institutions in Borneo itself. The major strength of the book is the inclusion of a substantial amount of research undertaken by scholars working and teaching within the Southeast Asian region. In particular, there is an examination of research materials published in the vernacular, notably the outpouring of work published in Indonesian by the Institut Dayakologi in Pontianak. In doing so, the book also addresses the urgent matters which have not received the attention they deserve, specifically subjects, themes and issues that have already been covered but require further contemplation, elaboration and research, and the scope for disciplinary and multidisciplinary collaboration in Borneo Studies. The book is a valuable resource and reference work for students and researchers interested in social science scholarship on Borneo and for those with wider interests in Indonesia and Malaysia and in the Southeast Asian region.

International Seminar On Nuclear War And Planetary Emergencies - 30th Session Richard C Ragaini, 2004-03-09. The proceedings have been selected for coverage in The Haze Problem in Southeast Asia Helena Varkkey, 2015-07-16. Despite the efforts of Southeast Asian governments and of ASEAN, transboundary haze continues to be a major environmental problem in Southeast Asia. This book demonstrates that the issue is complex and explains why efforts to solve the problem in purely political terms are ineffective and likely to continue to be ineffective. The book shows how state-led, state-incentivised agribusiness development lies at the heart of the problem, leading to a large rise in palm oil production with extensive clearing of forests leading to deliberate or accidental fires and the resulting haze. Moreover, although the forest clearing is occurring in Indonesia, many of the companies involved are Malaysian and Singaporean and further, many of these companies have close relationships with the politicians and officials responsible for addressing the problem and who thereby have a conflict of interest. The author concludes by discussing the huge difficulties involved in overturning this system of patronage politics.

Law of the Sea in South East Asia Donald R Rothwell, David Letts, 2019-07-19. The United Nations Convention on the Law of the Sea (LOSC) represents one of the most successful examples of multilateral treaty making in the modern era. The convention has 168 States parties and most non-signatory States recognise nearly all of its key provisions as binding under customary international law, including the United States. Nevertheless, there remain significant differences in

interpretation and implementation of the LOSC among States as well as calls on occasion for its amendment This book analyses the impact influence and ongoing role of the LOSC in South East Asia one of the most dynamic maritime regions in the world Maritime security is a critical issue within the region and it is separately assessed in light of the LOSC and contemporary challenges such as environmental security and climate change Likewise navigational rights and freedoms are a major issue and they are evaluated through the LOSC and regional state practice especially in the South China Sea Special attention is given to the role of navies and non state actors Furthermore the book looks at regional resource disputes which have a long history These disputes have the potential to increase into the future as economic interests and concerns over food security intensify Effective LNG and fisheries resource management is therefore a critical issue for the region and unless resolved could become the focal point for significant maritime disputes These dynamics within the region all require extensive exploration in order to gauge the effectiveness of LOSC dispute resolution mechanisms The Law of the Sea in South East Asia fills a gap in the existing literature by bringing together a holistic picture of contemporary maritime issues affecting the region in a single volume It will appeal to academic libraries government officials think tanks and scholars from law strategic studies and international relations disciplines
