Ruined by Excess, Perfected by Lack R. Patton, 2011-02-01 Discussing the worldwide problem of overweight pets this comprehensive writing explains how

behavior both of pets and people is a critical aspect of any proper diet. It discusses how pets are poorly adapted to cope with a constant excess of soluble carbohydrate, a common feature found in the majority of dry kibble diets. Therefore, this reference shows how oftentimes while pet owners believe that they are providing the best nutrition for their pets, they are actually silently robbing their companions of health and longevity in their failure to restrict carbohydrates. In response to this situation, this informative book draws on anthropology, genetics, and behavior to establish logical nutrition, thereby educating pet owners on how they can improve the length and quality of their pets' lives.

Encyclopedia of Environmental Change John A. Matthews, 2013-12-13. Accessibly written by a team of international authors, the *Encyclopedia of Environmental Change* provides a gateway to the complex facts, concepts, techniques, methodology, and philosophy of environmental change. This three-volume set illustrates and examines topics within this dynamic and rapidly changing interdisciplinary field. The encyclopedia includes all of the following aspects of environmental change: Diverse evidence of environmental change, including climate change and changes on land and in the oceans; Underlying natural and anthropogenic causes and mechanisms; Wide-ranging local, regional, and global impacts from the polar regions to the tropics; Responses of geo-ecosystems and human environmental systems in the face of past, present, and future environmental change; Approaches, methodologies, and techniques used for reconstructing, dating, monitoring, modelling, projecting, and predicting change; Social, economic, and political dimensions of environmental issues; environmental conservation and management; and environmental policy. Over 4,000 entries explore the following key themes and more: Conservation; Demographic change; Environmental management; Environmental policy; Environmental security; Food security; Glaciation; Green Revolution; Human impact on environment; Industrialization; Land-use change; Military impacts on environment; Mining and mining impacts; Nuclear energy; Pollution; Renewable resources; Solar energy; Sustainability; Tourism; Trade; Water resources; Water security; Wildlife conservation. The comprehensive coverage of terminology includes layers of entries ranging from one-line definitions to short essays, making this an invaluable companion for any student of physical geography, environmental geography, or environmental sciences.

Security and Environment in the Mediterranean Hans Günter Brauch, Peter H. Liotta, Antonio Marquina, Paul F. Rogers, Mohammad El-Sayed Selim, 2012-12-06. In this volume, security specialists, peace researchers, environmental scholars, demographers, as well as climate, desertification, water, food, and urbanisation specialists from the Middle East and North Africa, Europe, and North America, review security and conflict prevention in the Mediterranean. They also analyse NATO's Mediterranean security dialogue and offer conceptualisations on security and perceptions of security challenges as seen in North and South. The latter half of the book analyses environmental security and conflicts in the Mediterranean and environmental consequences of World War II, the Gulf War, the Balkan wars, and the Middle East conflict. It also examines factors of global environmental change: population growth, climate change, desertification, water scarcity, food, and urbanisation issues, as well as natural disasters. Furthermore, it draws conceptual conclusions for a fourth phase of

research on human and environmental security and peace as well as policy conclusions for cooperation and partnership in the Mediterranean in the 21st century **Ecology, Environmental Science and Conservation 2nd Edition** JS Singh | SP Singh | SR Gupta | Rishikesh Singh, The updated second edition of the book offers an innovative synthesis of fundamental ecological concepts and practical applications in environmental science and conservation It is the first textbook on the subject by eminent Indian researchers and presents most of the examples from the Indian subcontinent The book covers a wide range of topics including fundamental concepts required to comprehend the physical environment population dynamics community characteristics patterns and gradients in biodiversity ecosystem functioning and dynamics and the study of biogeography It also addresses applied topics such as environmental pollution impact assessment natural resource management biodiversity conservation ecosystem services global climate change ecosystem restoration urban ecology and sustainable development The main issues are discussed within the sustainability framework considering humans as part of ecosystems and recognising that sustainable development requires the integration of ecology with social sciences for policy formulation and implementation The updated edition of the book aligns with the National Education Policy 2020 and the revised UGC Guidelines It aims to meet the needs of students in basic and multidisciplinary courses in ecology and environmental science as well as professionals in agriculture forestry and geography at both the graduate and postgraduate levels Community Governance and Citizen-Driven Initiatives in Climate Change Mitigation Jens Hoff, Quentin

Gausset, 2015-08-20 One of the most heartening developments in climate change mitigation in recent years has been the increasing attention paid to the principle of thinking globally and acting locally The failure of the international community to reach significant global agreements on the reduction of greenhouse gas emissions has led local governments environmental organisations and citizens themselves to focus increasingly on the local possibilities for action on climate change This book analyses the strengths and weaknesses of the co production of climate policies that take place where citizen engagement and local initiatives converge with public agencies Case studies from Northern Europe Australia New Zealand and the USA reveal that traditional individualist approaches to promoting environmental behaviour epitomised by information campaigns and economic incentives cannot trigger the deep behavioural changes required to materially improve our response to climate change Only by marshalling the forces of thousands and eventually millions of citizens can we manage to reach environmental sceptics reinforce political action and create the new social norms that are sorely needed in our local and global response to climate change This book will be of great relevance to scholars and policy makers with an interest in climate change politics and governance community engagement and sustainable development **Global Environment**

Outlook 4 United Nations Environment Programme, 2007 The fourth report in the Global Environment Outlook series provides a comprehensive scientifically credible policy relevant and up to date assessment of and outlook for the state of the global environment Environment for development is the GEO 4 underlying theme and the report pays special attention to the

role and impact of the environment on human well being as well as to the use of environmental valuation as a tool for decision making GEO 4 s 2007 publication date marks the half way point for the Millennium Development Goals The environment as well as being the subject of MDG 7 is also a thread that runs through all the goals Includes Errata
