## **Environmental Conflict In Search Of Common Ground:**

Environmental Conflict Jeffrey J. Pompe, James R. Rinehart, 2002-08-01 Explores how economics can help solve environmental problems     Routledge Handbook of Environmental Conflict and Peacebuilding Ashok Swain, Joakim Öjendal, 2018-04-17 The past two decades have witnessed the emergence of a large body of research examining the linkage between environmental scarcity violent conflict and cooperation However this environmental security polemic is still trying to deliver a well defined approach to achieving peace Studies are being undertaken to find the precise pathways by which cooperative actions are expected not only to pre empt or moderate resource conflicts but also to help diffuse cooperative behaviour to other disputed issues The recognition that environmental resources can contribute to violent conflict accentuates their potential significance as pathways for cooperation and the consolidation of peace in post conflict societies Conceived as a single and reliable reference source which will be a vital resource for students researchers and policy makers alike the Routledge Handbook of Environmental Conflict and Peacebuilding presents a wide range of chapters written by key thinkers in the field organised into four key parts Part I Review of the concept and theories Part II Review of thematic approaches resources scarcity intervention adaptation and peacebuilding Part III Case studies Middle East Iraq Jordan Liberia Nepal Colombia Philippines Part IV Analytical challenges and future oriented perspectives Enabling the reader to find a concise expert review on topics that are most likely to arise in the course of conducting research or policy making this volume presents a truly global overview of the key issues and debates in environmental conflict and peacebuilding

*Altered Environments* Jeffrey Pompe, 2012-11-26 An illustrated history of how natural and human forces have shaped the development of a coastal community The constant assault of natural forces make fragile barrier islands some of the most rapidly changing locations in the world but human activities have had enormous impact on these islands as well In *Altered Environments* Jeffrey and Kathleen Pompe explore the complex interactions between nature and human habitation on the resilient Outer Banks of North Carolina The Pompes employ modern and historical photographs and maps to illustrate the geographic and ecologic changes that have taken place on the Outer Banks evaluating efforts to preserve these lands and also meet the evolving needs of a growing population The Pompes examine the various forces that have created an environment so very different from the Outer Banks of only a few decades ago The defining event in the reshaping of the islands for expanded development was the dune construction project of the 1930s when the Civilian Conservation Corps constructed a wall of self sustaining dunes along 125 miles of Outer Banks shoreline in an effort to stave off beach erosion This event created a historical demarcation in conservation efforts and heralded the beginning of a period of rapid economic development for the Outer Banks The construction project reshaped the islands geography to accomplish perceived economic advantages and prepared the Outer Banks for the last half of the twentieth century when tourists increasingly visited this shore bringing corresponding developments in their wake The dune restoration project is just one of the Pompes examples of

how human actions have altered the islands to meet the demands of a growing number of visitors and residents While *Altered Environments* focuses on the Outer Banks the narrative also considers social environmental and economic issues that are relevant to much of the seashore Most coastal communities face similar problems such as natural disasters and shoreline erosion and in recent decades rapid population growth has exacerbated many conservation problems Real estate developments the fisheries industry tourism climate change and oil exploration all come under scrutiny in this investigation Using the Outer Banks as a case study to frame a host of environmental challenges faced along the Atlantic seaboard today the *Pompes* provide a valuable commentary on the historical context of these concerns and offer some insightful solutions that allow for sustainable communities

**Re-Thinking Green** Robert Higgs, 2005-07-15 Environmental quality has been a major public concern since the first Earth Day in 1970 yet the maze of environmental laws and regulations enacted since then has fostered huge government bureaucracies better known for waste and failure than for innovation and success Can we do better than this failed environmental bureaucracy The noted contributors to this volume answer with a resounding yes *Re Thinking Green* exposes the myths that have contributed to failed environmental policies and proposes bold alternatives that recognize the power of incentives and the limitations of political and regulatory processes It addresses some of the most hotly debated environmental issues and shows how entrepreneurship and property rights can be utilized to promote environmental quality and economic growth *Re Thinking Green* will challenge readers with new paradigms for resolving environmental problems stimulate discussion on how best to humanize environmental policy and inspire policymakers to seek effective alternatives to environmental bureaucracy

*Charles Taylor's Ecological Conversations* Glen Lehman, 2015-07-30 The author uses the work of the eminent Canadian philosopher Charles Taylor to develop a critique of those political perspectives that are based on instrumental ways to reason about the world claiming that such perspectives invariably sever the connections between the social and natural worlds

*Responding to Environmental Issues through Adaptive Collaborative Management* Carol J. Pierce Colfer, Ravi Prabhu, 2023-03-15 Focused on forest management and governance this book examines two decades of

experience with Adaptive Collaborative Management ACM assessing both its uses and improvements needed to address global environmental issues The volume argues that the activation and the empowerment of local peoples are critical to addressing current environmental challenges and that this must be enhanced by linking and extending such stewardship to global and national policymakers and actors on a broader scale This can be achieved by employing ACM's participatory approach characterized by conscious efforts among stakeholders to communicate collaborate negotiate and seek out opportunities to learn collectively about the impacts of their action The case studies presented here reflect decades of experience working with forest communities in three Indonesian Islands and four African countries Researchers and practitioners who participated in CIFOR's early ACM work had the rare opportunity to return to their research sites decades later to see what has happened These authors reflect critically on their own experience and local site conditions to glean insights that guide us in more effectively addressing climate change and other forest related challenges They showcase how global and regional actors will have to work more closely with smallholders Indigenous Peoples and local communities recognizing the key local roles in forest stewardship This book will be of great interest to students scholars and practitioners working in the fields of conservation forest management community development natural resource management and development studies more broadly The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
