

ENVIRONMENTAL PHILOSOPHY AND ENVIRONMENTAL ETHICS

Introduction

Environmental Philosophy is the study of the concepts and principles relating to human interactions with nature and the natural environment, to related presuppositions about the relation of humanity and nature, and to practical implications for both individuals and societies. Environmental Ethics is a key branch of Environmental Philosophy, and studies relevant normative issues, values and principles. This chapter reviews the history, scope and development of Environmental Philosophy and Ethics, presents some of the key issues in these continually broadening fields, and considers possibilities and prospects for their further development.

Some of the relevant concepts, principles, issues and values were used and/or debated during the ancient, medieval and early modern periods, and proposals for a new approach were made during the mid-twentieth century (Leopold, 1949). But the conscious and concerted study of these concepts, principles, issues and values first emerged during the 1970s.
