Environmental Heritage Of Soviet Agriculture:

The Environmental Heritage of Soviet Agriculture Bo Libert, 1995 The environmental problems such as pollution and land degradation of post Soviet agriculture are indeed serious and represent a major obstacle to the expansion of food production in the new political and economic arena This book provides a thorough review of these problems and also responds to several reports claiming that the situation is irremediable Although environmental problems are severe the author shows that they are not necessarily the key limiting factor in agricultural production in the short term Drawing on a range of personal interviews and statistics and on the social economic and political literature as well as information on crop production soil and water use and the environment it is shown how a more sustainable future might be attained A Companion to Global

Environmental History J. R. McNeill, Erin Stewart Mauldin, 2025-02-06 A COMPANION TO GLOBAL ENVIRONMENTAL HISTORY Equips both specialists and newcomers with the historical intellectual and political context for engagement with the environment Providing multiple points of entry into a dynamic fast growing field A Companion to Global Environmental History explores the many contours of the relationship between human societies and the natural world on which they depend Bringing together essays by an international roster of both established experts and emerging scholars this volume covers a uniquely broad range of temporal geographic thematic and contextual approaches to the practice of global environmental history Thirty three detailed chapters describe how the relationship between society and nature has changed over time examine the various drivers of change and environmental transformations survey different types of environmental thought and action around the world and more Now in its second edition the Companion is fully revised to reflect major research developments and new trajectories within the field Updated chapters that present new evidence for longstanding debates and innovative applications of environmental history are accompanied by six entirely new chapters on India China Africa early modern cities global environmental governance and European environmentalism Offering fresh insights into environmental thought culture policy and politics A Companion to Global Environmental History Second Edition is an ideal textbook for undergraduate and graduate students and an invaluable reference for scholars researchers and environmental historians

An Environmental History of Russia Paul Josephson, Nicolai Dronin, Ruben Mnatsakanian, Aleh Cherp, Dmitry Efremenko, Vladislav Larin, 2013-04-08 The former Soviet empire spanned eleven time zones and contained half the world's forests vast deposits of oil gas and coal various ores major rivers such as the Volga Don and Angara and extensive biodiversity These resources and animals as well as the people who lived in the former Soviet Union Slavs Armenians Georgians Azeris Kazakhs and Tajiks indigenous Nenets and Chukchi were threatened by environmental degradation and extensive pollution This environmental history of the former Soviet Union explores the impact that state economic development programs had on the environment The authors consider the impact of Bolshevik ideology on the establishment of an extensive system of nature preserves the effect of Stalinist practices of industrialization and collectivization on nature

and the rise of public involvement under Khrushchev and Brezhnev and changes to policies and practices with the rise of Gorbachev and the break up of the USSR *The Russian Peasantry 1600-1930* David Moon,2014-07-16 This impressive work set to become the standard history on the subject offers a definitive survey of peasant society in Russia from the consolidation of serfdom and tsarist autocracy in the 17th century through to the destruction of the peasant s traditional world under Stalin Over three quarters of Russian society were peasants in these years and David Moon explores all aspects of their life xxx including the rural economy peasant households village communities xxx and their political role including protest against the landowning elites In the process he presents a fresh perspective on the history of Russia itself A big book in every way xxx and compellingly readable **Soil Science: Agricultural and Environmental Prospectives** Khalid

Rehman Hakeem,Javaid Akhtar,Muhammad Sabir,2016-08-01 Soil is the most important natural non renewable resource developed over a longer period of time due to weathering of rocks and subsequently enrichment of organic matter Soil provides habitat for numerous microorganisms and serves as a natural medium for plant growth thereby providing the plants with anchorage nutrients and water to sustain the growth Soil also serves as a universal sink for all types of pollutants purifies ground water and is a major reserve of carbon in the universe The role of soils to provide ecosystem services maintenance of environmental human health and ensuring the food security makes it as the most important and basic natural resource Soil Science helps us to elaborate and understand how the soils provide all these services Soil Science also provides us the basic knowledge dealing with the origin of the soil parent material weathering of parent material and the formation of soils morphological physico chemical and biological features of soils classification of soils and role of soils in the provision and maintenance of ecosystem services food security and environmental quality This book encompasses the various processes functions and behaviour of soils very comprehensively to acquaint the students of soil plant and environmental sciences about their role to perform different agricultural and environmental functions **Conservation Tillage** ,2000

Understanding Marine Changes Savitri Jetoo,Jaana Kouri,Silja Laine,Nina Tynkkynen,Anna Törnroos,2023-11-03 With no linear cause and effect relationship between marine environmental changes and the often human induced stressors which cause them the changes to our seas and oceans are complex uncertain and arising due to multiple and interconnected issues Studying environmental changes to the seas and oceans through a variety of perspectives and disciplines this pioneering book outlines the challenges of researching marine environmental issues Environments in a Changing World John Huckle,Adrian Martin,2014-09-19 While there is no shortage of of books on the environment there are few introductory texts that outline the social theory that informs human geographical approaches to the interactions between ecology and society Students arriving at university often lack the understanding of history economics politics sociology and philosophy that contemporary human geography requires Environments in a Changing World addresses this deficit providing foundation knowledge in a form that is accessible to first year students and applied to the understanding of both contemporary

environmental issues and the challenge of sustainability Students are challenged to develop and defend their own ethical and political positions on sustainability and respond to the need for new forms of ecological citizenship

Environment in the Transition to a Market Economy Progress in Central and Eastern Europe and the New Independent States OECD,1999-10-14 This book provides a coherent analysis of the environmental challenges and achievements in institutional strengthening and policy reform environmental policy instruments environmental financing and environmental management in enterprises in transition countries

OECD Review of Agricultural Policies: Russian Federation 1998 OECD,1998-07-17 This study is one of the most comprehensive analyses and assessments of developments in Russia s agricultural policies since the onset of reform drawing on the OECD s well established method of calculating support from agricultural policies using Producer and Consumer Subsidy Equivalents

Environment in the Transition to a Market Economy Anthony Zamparutti,Centre for Co-operation with Non-members,Organisation for Economic Co-operation and Development,1999-10-14 Severe environmental problems were a key issue in the protests that marked the end of communist regimes in Central and Eastern Europe and the former Soviet Union This groundbreaking book provides new insights into the interaction between economic policy reforms environmental protection efforts and environmental conditions in the region s subsequent transition to market based economies and democratic societies over the past eight to ten years The unique contribution of the book is its synthesis of a vast amount of information and cumulative experience together with detailed examples and case studies to provide a coherent analysis of the challenges and achievements in institutional strengthening and policy reform environmental policy instruments environmental financing and environmental management in enterprises It also reviews the development of domestic public participation and international co operation for the safeguarding of the region s environment and discusses trends in industrial pollution and biodiversity protection The book shows that economic reforms provided a crucial stimulus for environmental improvement leading to reductions in high pollution levels Moreover several countries have strengthened their domestic environmental policies institutions and financing resulting in further improvements Nonetheless many serious problems remain and others have grown worse over the transition period in many countries of the former Soviet Union in particular economic crises and political stagnation have impeded environmental protection efforts Continued partnerships between governments of the region OECD donor countries international financial institutions and organisations environmental NGOs businesses and trade unions as well as public support for these will be essential to reinforce the environmental improvements achieved thus far

The Oxford Handbook of Agricultural History Jeannie M. Whayne,2024 Agricultural history has enjoyed a rebirth in recent years in part because the agricultural enterprise promotes economic and cultural connections in an era that has become ever more globally focused but also because of agriculture s potential to lead to conflicts over precious resources The Oxford Handbook of Agricultural History reflects this rebirth and examines the wide reaching implications of agricultural issues featuring essays that touch on the green

revolution the development of the Atlantic slave plantation the agricultural impact of the American Civil War the rise of scientific and corporate agriculture and modern exploitation of agricultural labor

The Earth Transformed Peter Frankopan, 2023-04-18 A NEW YORKER BEST BOOK OF THE YEAR A revolutionary new history that reveals how climate change has dramatically shaped the development and demise of civilizations across time The ebook edition now includes endnotes Anyone who purchased the book previously can re download this updated edition and access the notes Global warming is one of the greatest dangers mankind faces today Even as temperatures increase sea levels rise and natural disasters escalate our current environmental crisis feels difficult to predict and understand But climate change and its effects on us are not new In a bold narrative that spans centuries and continents Peter Frankopan argues that nature has always played a fundamental role in the writing of history From the fall of the Moche civilization in South America that came about because of the cyclical pressures of El Niño to volcanic eruptions in Iceland that affected Egypt and helped bring the Ottoman empire to its knees climate change and its influences have always been with us Frankopan explains how the Vikings emerged thanks to catastrophic crop failure why the roots of regime change in eleventh century Baghdad lay in the collapse of cotton prices resulting from unusual climate patterns and why the western expansion of the frontiers in North America was directly affected by solar flare activity in the eighteenth century Again and again Frankopan shows that when past empires have failed to act sustainably they have been met with catastrophe Blending brilliant historical writing and cutting edge scientific research **The Earth Transformed** will radically reframe the way we look at the world and our future

Socialist States and the Environment Salvatore Engel-Di Mauro, 2021-07-20 More than thirty years after the collapse of the USSR the critique of state socialism is still used to deny alternatives to capitalism irrespective of global capitalist ecological and social devastation There is seemingly nothing worthwhile salvaging from decades of state socialist experiences As the climate crisis deepens Engel Di Mauro argues that we need to re evaluate the environmental practices and policies of state socialism especially as they had more environmentally beneficial than destructive effects Rather than dismissing state socialism's heritage out of hand we should reclaim it for contemporary eco socialist ends By means of a comparative and multiple scaled approach Engel Di Mauro points to highly diverse and environmentally constructive state socialist experiences Taking the reader from the USSR to China and Cuba this is a fiery and contentious look at what worked what didn't and how we can move towards an eco socialist future

H. Ward,2000-04-13 In this book prominent authors discuss what changes must occur to ensure a successful transition to sustainability **An Environmental History of the World** J. Donald Hughes,2002-09-26 An Environmental History of the World is a concise history from Ancient to Modern times of the interaction between human societies and the other forms of life that inhabit our planet This original work follows a chronological path through the history of mankind in relationship to ecosystems around the world Each chapter concentrates on a general period in human history which has been characterised by large scale changes in the relationship of human societies to the biosphere and gives three case studies that illustrate the significant patterns occurring at that time Little environmental or historical knowledge is assumed from the reader in this introduction to environmental history **The Plough that Broke the Steppes** David Moon,2013-02-28 This is the first environmental history of Russia s steppes From the early eighteenth century settlers moved to the semi arid but fertile grasslands from wetter forested regions in central and northern Russia and Ukraine and from central Europe By the late nineteenth century they had turned the steppes into the bread basket of the Russian Empire and parts of Europe But there was another side to this story The steppe region was hit by recurring droughts winds from the east whipped up dust storms the fertile black earth suffered severe erosion crops failed and in the worst years there was famine David Moon analyses how naturalists and scientists came to understand the steppe environment including the origins of the fertile black earth He also analyses how scientists tried to understand environmental change including climate change Farmers and the scientists who advised them tried different ways to deal with the recurring droughts planting trees irrigation and cultivating the soil in ways that helped retain scarce moisture More sustainable however were techniques of cultivation to retain scarce moisture in the soil Among the pioneers were Mennonite settlers Such approaches aimed to work with the environment rather than trying to change it by planting trees or supplying more water artificially The story is similar to the Dust Bowl on the Great Plains of the USA which share a similar environment and environmental history David Moon places the environmental story of the steppes in the wider context of the environmental history of European colonialism around the globe Making World Development Work Grégoire Leclerc,Charles A. S. Hall,2007-06-16 The authors reexamine world development usually the province of economists as professionals trained in the natural sciences They show how we have and might use tested scientific and technical procedures and concepts as well as science itself to achieve much better results than what has been characteristic of the past Leclerc and Hall contend that to scholars with a scientific background the process of development and the economic logic behind it often look almost surrealistic The basic question at the foundation of this review is this Why should something so important as world development something capable of absorbing such vast sums of money and of human

goodwill something that impacts the people and the environment so much continue to be organized and planned using economic techniques and theories that are both unconfirmed experimentally and proven to have led to development failures

BOOK JACKET *Forestry, Economics and the Environment* Wiktor L. Adamowicz, 1996 Global interest in forest conservation biodiversity preservation and non timber values has risen while pressures on the forest as a source of income and employment have also increased These demands are often conflicting making forest planning allocation and policy formation very complex This volume explores theoretical and applied issues surrounding forest resource allocation The book is divided into three main subject areas 1 tropical forests environment economics and trade 2 non timber valuation theory and application and 3 ecosystem management The first of these focuses on tropical forests reflecting the fact that global environmental concerns surrounding these regions are often in conflict with local economic objectives The second section examines non timber values which are important in planning and policy decisions but are also very controversial The third group of chapters consider ecosystem management a concept that promotes the use of forest harvesting practices that mimic natural disturbance patterns Overall the book will be of interest to readers in forestry and environmental economics
