Environmental Justice Creating Equity Reclaiming Democracy:

Environmental Justice Kristin Shrader-Frechette, 2002-09-26 Shrader Frechette offers a rigorous philosophical discussion of environmental justice Explaining fundamental ethical concepts such as equality property rights procedural justice free informed consent intergenerational equity and just compensation and then bringing them to bear on real world social issues she shows how many of these core concepts have been compromised for a large segment of the global population among them Appalachians African Americans workers in hazardous jobs and indigenous people in developing nations She argues that burdens like pollution and resource depletion need to be apportioned more equally and that there are compelling ethical grounds for remedying our environmental problems She also argues that those affected by environmental problems must be included in the process of remedying those problems that all citizens have a duty to engage in activism on behalf of Environmental Justice and that in a democracy it is the people not the government that are ultimately responsible for fair use of the environment *Environmental Justice* Shrader-Frechette, Kristin Sharon Shrader-Frechette, 2002

Environmental Justice Kristin Sharon Shrader-Frechette, 2006 Explaining fundamental ethical concepts such as equality property rights procedural justice free informed consent intergeneration equality just compensation and moral heroism and then bringing them to bear on real world social issues Shrader Frechette shows how many of these core concepts have been compromised for a large segment of the global population among them Appalachians African Americans workers in hazardous jobs and indigenous people living in developing nations She argues that there are strong and compelling grounds for remedying our environmental problems and that burdens like pollution and resource depletion need to be apportioned more equally She also argues vehemently that not only do we have strong ethical grounds for remedying environmental problems but that these remedies need to involve the participation of those affected that all citizens have a duty to engage in activism an behalf of Environmental Justice and that in a democracy it is the people not the government that are ultimately and truly responsible for equitable and fair use of the environment Combining rigorous philosophical scholarship with a deep knowledge of actual problems in the environment and among the disenfranchised Environmental Justice is a new look at an old problem and will encourage debate among those concerned with both social and environmental justice *Environmental Justice* Kristin Shrader-Frechette, 2002-09-26 Shrader Frechette offers a rigorous philosophical discussion of environmental justice Explaining fundamental ethical concepts such as equality property rights procedural justice free informed consent intergenerational equity and just compensation and then bringing them to bear on real world social issues she shows how many of these core concepts have been compromised for a large segment of the global population among them Appalachians African Americans workers in hazardous jobs and indigenous people in developing nations She argues that burdens like pollution and resource depletion need to be apportioned more equally and that there are compelling ethical grounds for remedying our environmental problems She also argues that those affected by

environmental problems must be included in the process of remedying those problems that all citizens have a duty to engage in activism on behalf of Environmental Justice and that in a democracy it is the people not the government that are ultimately responsible for fair use of the environment **Environmental Justice** Pamela Hill, 2025-10-03 Environmental justice is an important idea in the larger context of environmental protection It has gained importance globally the UN governments and nongovernmental organizations now regularly address it Environmental justice concerns the unfair treatment of underserved and disenfranchised people It challenges all of us to acknowledge the responsibilities of affluent populations and developed countries to correct the environmental harms such as disproportionate industrial pollution and rising seas from climate change that they have unwittingly or not inflicted on those who are less powerful Relying on the latest scholarship and highlighting relevant events this book provides readers with the foundational knowledge of environmental justice what it is and its causes as well as governmental and international responses to it **Managing Environmental Justice** Dennis

Pavlich, 2010 Environmental justice is the subtext of this collection of anxieties around the need for a sustainable future on Planet Earth Thinkers and scholars from a diversity of backgrounds reflect on what it means and how cultures must change to greet this future From Romania to Mexico Bosnia to Canada Sweden to California authors analyze and recount community experiences and expectations leading to justice for land sea air and wildlife The kind of ethical weltanschauung for a society in which this kind of justice is achievable is suggested The collection points to the myriad of single instance decisions that we must all make in living our daily lives whether in our homes workplaces or leisure time From good policies to sound management governments corporations and community based organizations will find prudent praxis from cover to cover

Benefit-sharing in Environmental Governance Louisa Parks, 2019-11-20 Taking a bottom up perspective this book explores local framings of a wide range of issues related to benefit sharing a growing concept in global environmental governance Benefit sharing in Environmental Governance draws on original case studies from South Africa Namibia Greece Argentina and Malaysia to shed light on what benefit sharing looks like from the local viewpoint These local level case studies move away from the idea of benefit sharing as defined by a single international organization or treaty Rather they reflect different situations where benefit sharing has been considered including agriculture access to land and plants wildlife management and extractives industries Common themes in the experiences of local communities form the basis for an exploration of spaces for local voices at the international level in the Convention on Biological Diversity CBD often argued to be the most open arena to non state actors and therefore vital to how local voices may be included at the global level The book analyzes the decisions of the CBD parties to produce an in depth reflection on how this arena builds and delimits spaces for the expression of local community themes and paths for local community participation including community protocols The book then situates the bottom up findings in the wider debate about global civil society and deliberative democracy in environmental governance This interdisciplinary book will be of great interest to students and scholars of environmental

politics environmental law political ecology and global governance as well as practitioners and policymakers involved in multilateral environmental agreements *The Oxford Handbook of Public Health Ethics* Anna C. Mastroianni, Jeffrey P. Kahn, Nancy E. Kass, 2019 Public health raises critical ethics issues and concerns making public health ethics an essential topic for students and public health professionals The 73 chapters in this volume examine public health ethics across a broad range of public health topics both in the U S and globally It is the first ever comprehensive collection devoted to public health ethics

Environment, Power, and Justice Graeme Wynn, Jane Carruthers, Nancy J. Jacobs, 2022-07-26 Spanning the colonial postcolonial and postapartheid eras these historical and locally specific case studies analyze and engage vernacular activist and scholarly efforts to mitigate social environmental inequity This book highlights the ways poor and vulnerable people in South Africa Lesotho and Zimbabwe have mobilized against the structural and political forces that deny them a healthy and sustainable environment Spanning the colonial postcolonial and postapartheid eras these studies engage vernacular activist and scholarly efforts to mitigate social environmental inequity Some chapters track the genealogies of contemporary activism while others introduce positions actors and thinkers not previously identified with environmental justice Addressing health economic opportunity agricultural policy and food security the chapters in this book explore a range of issues and ways of thinking about harm to people and their ecologies Because environmental justice is often understood as a contemporary phenomenon framed around North American examples these fresh case studies will enrich both southern African history and global environmental studies Environment Power and Justice expands conceptions of environmental justice and reveals discourses and dynamics that advance both scholarship and social change Contributors Christopher Konz Marc Epprecht Mary Galvin Sarah Ives Admire Mseba Muchaparara Musemwa Matthew A Schnurr Cherryl Walker

Justice Unbound Patrizia Longo, 2018-12-17 This important anthology provides students and teachers with voices of social and global justice that have been marginalized or forgotten by history It gives thought leaders from the Global South a platform and engages the voices of oppressed communities including Charles Mills and Franz Fanon and Ella Baker This text is a comprehensive analysis of modern and contemporary theories of justice Since the publication in 1971 of John Rawls's *A Theory of Justice* there has been much debate on his views from both the right and the left of the political spectrum But there is a lack of textbooks that provide not only a compilation of substantial selections on challenges to Rawls's theory from feminist and postcolonial scholars but that also include writings by non white and non Western authors on different aspects of justice This book fills this huge gap and brings together many influential writings on the topic of justice that are often omitted in philosophy and political theory collections This work addresses complex issues in an increasingly diverse society

Shipbreaking in Developing Countries Md Saiful Karim, 2017-12-06 This book explores the process of shipbreaking in developing countries with a particular focus on Bangladesh In the past shipbreaking the disposal of obsolete ships was a very common industrial activity in many developed

countries However due to stringent domestic environmental and labour laws it is almost impossible for the increasing number of vessels to be disposed of domestically and now developing nations including Bangladesh China India Turkey and Pakistan regularly participate in this activity The shipbreaking yards in these countries are not only detrimental to the marine and coastal environment but also represent significant health hazards to local people and workers Given the global importance of the issue an effective legal and institutional framework for a sustainable operation of the shipbreaking industry is desperately needed Sitting at the intersection of three distinct fields environmental justice international environmental law and international maritime law this book offers an innovative take on the issues surrounding the shipbreaking process Drawing on the case study of Bangladesh due to its prominence in the shipbreaking industry the author implements an environmental justice framework to examine the issues of sustainability surrounding shipbreaking and analyses the relationship between social development economic development and environmental protection Maritime perspectives of environmental justice will also be highlighted through a discussion of the International Maritime Organization s role in the implementation of the Hong Kong Convention in developing countries This book will be of great interest to scholars of environmental justice international maritime law and international environmental law Environmental Health Perspectives,1993
