**Management of Waste to Control**

**Environmental Pollutions: Sustainability and Economic Feasibility** Javid Ahmad Parray, Nowsheen Shameem, A. K.

Haghi, 2025-03-28 This book analyzes the harmful effects of conventional waste treatments and pollution monitoring methods on the environment. It critically evaluates these methods and highlights their shortcomings that have significantly damaged the environment. The book provides a comprehensive overview of alternative waste and pollution treatment methods that can be adopted locally and internationally. It also examines appropriate resource management strategies for environmental issues and emphasizes the need for sustainable resource management practices. The book highlights the importance of education in achieving ecological sustainability, particularly in urban waste management. It elaborates on how education can raise awareness and promote sustainable waste management practices. Furthermore, the book presents the latest research topics, innovative ideas, and remediation strategies for various hazardous pollutants related to environmental issues and solutions. It provides a detailed analysis of the different remediation strategies and highlights their effectiveness in tackling environmental issues. The book also explores the innovative use of nanotechnology to achieve ecological sustainability and economic feasibility in wastewater treatment. One of the standout features of this approach is the use of microbial consortiums, which offer significant advantages over pure cultures. The need for hybrid treatment technology to effectively remediate different types of organic and inorganic pollutants from wastewater is also explored. In addition, the book highlights the application of green technology for waste management, providing innovative solutions using advanced green technologies that promote international cooperation and networking to achieve a sustainable environment. It covers advanced green technologies used to manage energy and bioproducts from waste, such as biofuel, biopolymers, fertilizers, and chemicals without causing harm to the environment. *Principles of Sustainable Development - Volume III* Giancarlo

Barbiroli, 2009-10-20 Principles of Sustainable Development is the component of Encyclopedia of Development and Economic Sciences in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty-one Encyclopedias. Sustainable Development is a term of differing definitions. Standing alone, the term is abstract and ambiguous. The meaning most often cited is that adopted by the World Commission on Environment and Development meeting today's true needs and opportunities without jeopardizing the integrity of the planetary life support base, the environment, and diminishing its ability to provide for needs, opportunities, and quality of life in the future. This definition may serve as a general principle, but for a guide to action, its components—sustainability and development—must be given substance: what is to be sustained and what developed. Is development essentially economic or material growth, and is sustainability mostly a means to keep economic growth growing? Consequently, should development represent means toward ecologically sustainable ends? The concept of ecological sustainability has been advanced as a restriction on economic development. It follows, therefore, that principles of sustainable development depend upon how the term is understood and how it is put into practice. Even so, the definition of the World Commission on Environment and Development, given the adequate definition of variable

needs provides the most reliable principle for testing the qualitative and ecological sustainability of development proposals The Theme on Principles of Sustainable Development in three volumes deals with the diversity of points of view on this complex subject These three volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs
