Environmental Organizations in Modern Germany William T. Markham, 2008-08-01 German environmental organizations have doggedly pursued environmental protection through difficult times hyperinflation and war National Socialist rule postwar devastation state socialism in the GDR and confrontation with the authorities during the 1970s and 1980s The author recounts the fascinating and sometimes dramatic story of these organizations from their origins at the end of the nineteenth century to the present not only describing how they reacted to powerful social movements including the homeland protection and socialist movements in the early years of the twentieth century the Nazi movement and the anti nuclear and new social movements of the 1970s and 1980s but also examining strategies for survival in periods like the current one when environmental concerns are not at the top of the national agenda Previous analyses of environmental organizations have almost invariably viewed them as parts of larger social structures that is as components of social movements as interest groups within a political system or as contributors to civil society This book by contrast starts from the premise that through the use of theories developed specifically to analyze the behavior of organizations and NGOs we can gain additional insight into why environmental organizations behave as they do

Kousis, 2012-12-06 Europe is sometimes credited with a polis but not a demos Political integration and economic globalisation cannot diminish local identity and social memories This fascinating collection of national case studies shows why there will always be a local demos located in ecology economy and society But there will never be a transnational demos precisely because locality is the basis for meaningful sustainability Long may it triumph Tim O Riordan CSERGE University of East Anglia The book offers a refreshing perspective on the diversity of Europe and at the same time on the interdependence of the policies economies and societies of European countries Going beyond the dichotomies of good and bad and leaders and laggards in environmental matters the authors contribute to a different understanding of the North South divide in the process of European integration Angela Liberatore European Commission Directorate General for Research This is a self consciously revisionist volume whose findings are theoretically significant policy relevant and timely Its insistence on bringing society back in its debunking of the

judicialization of international law is often lauded for bringing effective global governance upholding the rule of law and protecting the right of individuals Yet at what point does the omnipresence of the international judiciary shackle national sovereign freedom And can the lack of political accountability be justified Follesdal and Ulfstein bring together the crime de la crime of the legal academic world to ask the big questions for the international judiciary whether they are there for mere dispute settlement or to set precedent and how far they can enforce international obligations without impacting on democratic self determination

Localism and Neighbourhood Planning Brownill, Sue, Bradley, Quintin, 2017-01-18 As in many other areas of public policy in the United Kingdom in recent years city planning has increasingly been localized all the way down to the neighborhood level This book is the first to critically analyze this shift which has proved to be among the most contentious and controversial of all contemporary planning initiatives Focusing on the newly granted rights of communities to draw up statutory Neighbourhood Development Plans it moves from there to engage with larger debates about the theory and practice of localism setting this trend within an international context with cases from the United States Australia and France as well as the United Kingdom

Environmental Protest in Western Europe Christopher Rootes, 2003-12-11 The rise of environmentalism has been one of the more remarkable developments in the politics of western societies in recent decades However as environmental awareness has become more generalized the forms of expression of environmental concern have changed Established environmental movement organizations have become embedded in policy networks but in some countries there has been a resurgence of environmental radicalism New groups adopting innovative tactics have mounted spectacular and disruptive protests These developments pose interesting questions for social scientists and policy makers Has the institutionalization of established environmental organizations demobilized their supporters and reduced them to a passive credit card waving conscience constituency Has direct participation in environmental protest become the specialized activity of smaller numbers of people Has there been a decline in the total volume of environmental protest or is it merely that the forms of protest have changed Have the protest repertoires of established groups moderated over time or have they been stimulated by the emergence of more radical groups to adopt more challenging tactics Has environmental protest become more confrontational Do protests employ different repertoires of action according to the issues at stake How does the incidence of protest vary over time and from one country to another Is there evidence of a Europeanization of either the issues or the forms of environmental protest These are some of the questions this volume addresses Based upon an analysis of the protest events reported in one quality newspaper in each of eight countries during the ten years 1988 to 1997 this is the first systematically comparative study of environmental protest in a representative cross section of EU member states It breaks entirely new ground in the study of environmental politics in Europe and is a major contribution to the study of protest events
