Strategic Sustainability Robert Sroufe, Sarkis Joseph, 2017-09-08 The last decade has seen increasing awareness of the importance of understanding corporate environmental management systems EMSs and their relationships with sustainability competitiveness and institutional practice It is now assumed that most large companies have some version of an EMS in place with systems ranging from informal policies and practices to formalised third party certified systems that are widely publicized by companies and are now integral to their strategic direction No matter what level and type of system a firm chooses both practitioners and researchers wish to examine and better understand the extent to which these systems are cross functional how they impact on performance evaluation their capability to monitor supply chains and the life cycles of products and services and most importantly whether these systems actually make a contribution to better environmental performance This book provides intriguing insights into strategic and sustainable EMSs It provides clear evidence of benefits that should exceed the costs tangible and otherwise and help practitioners understand the attributes of well developed and strategically focused EMSs It also demonstrates the link to performance measures such as reputation improved position in the marketplace cost quality waste reduction and numerous sustainable development based metrics and issues The comprehensive scope of topics spans several industries and provides environmental systems insight involving sustainable management systems strategic and operational impacts of environmental systems cross country comparisons of EMS design processes and results product based environmental systems EMS impacts at innovative organisations and environmental systems integration within specific industries The book is split into three sections First the book covers the broad issues of planning and designing an EMS and includes topics such as performance evaluation comparisons between multinational environmental systems sustainable development and links between already established quality systems and an EMS The second section focuses on EMS implementation and operation and incorporates some corporate or industry specific case studies The third and final category of the book highlights the use of an EMS to evaluate business processes Strategic Sustainability will be essential reading for both managers faced with decisions regarding their own EMSs and to researchers seeking additional insights from state of the art examples for further theoretical development and testing **Carbon**

**Neutrality, Social Media, Artificial Intelligence, volume II** Rita Yi Man Li,Xuefeng Shao,James Crabbe,2023-10-20

Carbon neutrality refers to net zero carbon emissions It can be achieved by reducing carbon emissions or increasing carbon adsorption The popularity of social media including Twitter YouTube and LinkedIn provides good channels for sharing relevant information and promoting sustainable carbon neutral living styles For example a motor company has launched social media challenges with Korean pop stars to raise awareness of carbon neutrality Social media provides real time information In Jakarta flood related tweet intensity during a flood peaked at about 900 tweets a minute during the floods of 2015 The tweets created real time maps that people sent a minute before Regarding government policies identification of problem areas is needed to help policymakers to resolve problems Machine learning can monitor these events by studying past records to know how countries and governments performed in a high risk event or environmental crisis and this data can be used to provide future recommendations to governments for policy making Additionally AI can analyze online unstructured data and predict various scenarios of carbon emissions and adsorptions using structured data The world of social media is a huge data source still yet to be fully optimized in science
