Environmental Oxidants:

Environmental Oxidants Jerome O. Nriagu, Milagros S. Simmons, 1994-06-16 The chemical enigma that is both a pollutant and an antipollutant and environmental science's newest cause célèbre: oxidants. Responsible for chemical reactions both harmful and benign, oxidants represent the sort of chemical puzzle that has both concerned and fascinated scientists. Implicated in deadly smog episodes and arteriosclerosis, oxidants have also played a major role in treating polluted waters and in certain anticancer drugs. A broad-based up-to-date examination of the environmental chemistry and toxicology of oxidants. Environmental Oxidants is a compendium of the latest research being done in the field. Bringing together the work of noted researchers, the book contains a detailed look at evolution, production, distribution, and fate of oxidants in the atmosphere, hydrosphere, and biosphere. Influence of human activities on oxidative processes in the atmosphere. Oxidative stress at the cellular, systemic, and ecosystem levels. Use of oxidants in wastewater treatment processes. A selective and incisive look at the current state of research on oxidants. Environmental Oxidants provides environmental scientists and engineers with an informative, detailed discussion of just how and why oxidants have emerged as a key issue in human health and environmental integrity.

Chemistry of the Environment Thomas Spiro, Kathleen L. Purvis-Roberts, William M. Stigliani, Harry B. Gray, 2011-11-24 This completely revised third edition of this intermediate level text uses concise, straightforward language and an accessible narrative style to give a concise, clear account of today's environmental issues and the science one needs to understand them. Chemistry of the Environment 3rd Edition is a concise, clear, and current account of today's environmental issues and the science one needs to understand them. This intermediate level text, which recommends General Chemistry as a prerequisite, systematically lays out themes of sustainability: atmosphere, hydrosphere, lithosphere, and biosphere, while stressing the interconnectedness of environmental problems and solutions. The completely revised third edition explains the natural chemical cycles and how humans affect them. It also analyzes strategies for ameliorating human impacts. This stimulating new text uses concise, straightforward language and an accessible narrative style to inform quantitative thinking.

Environmental Stressors in Health and Disease Jörgen Fuchs, 2001-07-20 This volume illustrates the impact of environmental oxidants on the tissues of the eyes, lungs, and skin, as well as on the immune system, highlighting common illnesses, injuries, and pathologies induced by pro-oxidant environmental xenobiotics such as inflammation, immune response, signal transduction, regulation of gene expression, and carcinogenesis. Environmental Health Perspectives, 2003-02

Environmental Exposure From Chemicals W. Brock Neely, 2018-01-18 This two-volume series will describe the mechanisms that are operating on chemicals as they move in the environment. Knowledge of these mechanisms is a vital component in performing a risk assessment. Volume I will deal with the physical and chemical properties of a material and how these influence the degradation and dissipating reactions. Volume 2 will address the transport of the chemical as it moves through the environment from the source to the final sink. **Oxidants and Antioxidant Defense Systems** Tilman

Grune,2005-01-18 Oxidative stress is one of the major symptoms accompanying physiological functions and numerous diseases Oxidants and free radicals are connected with diseases such as cancer diabetes infectious cardiovascular and neurodegenerative diseases and also in the aging process itself Therefore comprehensive knowledge of the underlying mechanisms of oxidant and free radical production and the defence against this permanent threat to cells is important for the understanding of many physiological and pathophysiological processes This book overviews the basic mechanisms of oxidant formation and antioxidant defences In addition the formation of oxidants and their detoxification the damage of

macromolecules and the major repair and removal systems will be highlighted Pesticidal Pollution of Environment and Control K. V.
