Partnerships for Sustainability in Contemporary Global Governance Liliana B. Andonova, Moira V. Faul, Dario Piselli, 2022-05-30 Partnerships for Sustainability in Contemporary Global Governance investigates the goals ideals and realities of sustainability partnerships and offers a theoretical framework to help disentangle the multiple and interrelated pathways that shape their effectiveness Partnerships are ubiquitous in research and policy discussions about sustainability and are important governance instruments for the provision of public goods While partnerships promise a great deal there is little clarity as to what they deliver If partnerships are to break free from this paradox more nuance and rigor are required for understanding and assessing their actual effects This volume applies its original framework to diverse empirical cases in a way that could be extended to broader data sets and case studies of partnerships The dual contribution of this volume theoretical and empirical holds promise for a more thorough and innovative understanding of the pathways to partnership effectiveness and the conditions that can shape their performance The broad range of crosscutting analyses suggest important practical implications for the design of new partnerships and the updating of existing initiatives This

interdisciplinary book will be of great interest to researchers students and practitioners within international relations political science sociology environmental studies and global studies as well as the growing number of scholars in public policy global health and organizational and business studies who are keen to gain a deeper understanding of the pathways and mechanisms that influence the outcomes and effectiveness of cross sector collaboration and transnational governance more broadly The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

environmentalist or simply someone who is concerned about the future of our planet this book is an essential resource It provides the knowledge and tools you need to make a difference Together we can create a more sustainable future for all If you like this book write a review *Partnership and Leadership* T. de Bruijn,Arnold Tukker,2013-10-14 Sustainable development has become a central perspective in environmental strategies around the world It is clear that neither governments nor businesses have the capability to bring about sustainability on their own Therefore collaboration has emerged as a central concept At the same time it is obvious that someone has to take the lead in the development towards sustainability This book focuses on different forms of collaboration emerging between various actors The objective of the book is to more systematically explore the different roles and relationships between partnership and leadership Basically both partnership and leadership can be seen in a positive and negative way for example as far as partnership is concerned we can assume that the path towards sustainability can be paved by parties coming together taking some initiative collaborating On the opposite partnership and consensus based decisions can be seen as an obstacle to foster radical changes in production and consumption patterns Similarly leadership can be seen as an obstacle to sustainable development if leaders form close circles and are not willing to share experiences with other actors but leadership could also be considered as an important element to keep concepts and practices forward The book holds this double perspective explaining mapping and analyzing different goals formats methods of more and less collaborative approaches but at the same time taking a critical approach to the theme by understanding related risks effects prospects and corrective actions Next to a conceptual part the book brings together case studies from around the world The focus is in describing and understanding various formats of collaboration and critically evaluating its effects and prospects A concluding chapter discusses the role of partnership and leadership in realizing various levels of environmental innovations optimization and re design that usually affect only a small part of the production consumption structure and much more complicated radical innovations that have to deal with societal sub systems The book is in part an edited version of selected papers presented during the 1998 Greening of Industry Conference in Rome on the subject enriched with contributions of other invited authors Environment and the OECD Guidelines for Multinational Enterprises Corporate Tools and Approaches OECD,2005-09-05 This book provides an overview of the main tools and approaches available to enterprises wishing to put the Environment chapter of the OECD Guidelines into practice Gaines V. White River Environmental Partnership ,2000 **Greener Marketing** Martin Charter,Michael Jay Polonsky,2017-09-29 Building on the strengths of the material published in the hugely successful first edition of Greener Marketing this important new title examines on a global scale the progress of environmental marketing in the 1990s and considers how social issues are increasingly becoming critical factors in how corporations meet the ever growing demands and expectations of customers Despite the fact that such issues are increasingly important in marketing activities around the world it is difficult for practitioners to keep up to date with complex and rapidly changing information and ideas The purpose

of this book is to provide practitioners and academics with best practice examples and actionable recommendations on how to implement and appraise green marketing activities It will provide information and ideas for those involved in marketing on how to incorporate environmental and social considerations as well as providing new perspectives on marketing for environmental managers To achieve a comprehensive viewpoint the book is split into three sections The first sets out the strategic issues and rationale for green marketing the second addresses tactical issues in more detail and the third provides detailed international case studies Topics addressed by the global set of contributors include the growing area of products versus services environmental product development green marketing alliances environmental communications green consumers eco tourism and environmental marketing in developing countries reener Marketing is not only a sequel to the successful first volume but redefines global progress towards the successful marketing of greener products and services
